The First Expedition to Mount Everest (Illustrated Edition) Charles Kenneth Howard-Bury, 2018-12-21. This eBook has been formatted to the highest digital standards and adjusted for readability on all devices. The 1921 British Mount Everest reconnaissance expedition set off to explore how it might be possible to get to the vicinity of Mount Everest to reconnoiter possible routes for ascending the mountain and, if possible, make the first ascent of the highest mountain in the world. A feasible route was discovered from the east up the Kharta Glacier and then crossing the Lhakpa La pass north east of Everest. It was then necessary to descend to the East Rongbuk Glacier before climbing again to Everest's North Col. Initially, the expedition explored from the north and discovered the main Rongbuk Glacier only to find that it seemed to provide no likely routes to the summit. However, at the time, it was not realized that the East Rongbuk glacier actually flowed into the Rongbuk glacier; it was thought it descended away to the east. As a reconnaissance, the expedition was a success because it determined that a good route might be to approach the East Rongbuk glacier via the Rongbuk glacier and then follow the North Col route to the summit.
