The Witches of Fife Stuart MacDonald, 2014-08-01 Along the coast of Fife in villages like Culross and Pittenweem history records that some women were executed as witches Nevertheless the reality of what happened the night that Janet Cornfoot was lynched at Pittenweem is hard to grasp as one sits by the harbour watching the fishing boats unload their catch and the pleasure boats rising with the tide How could people do this to an old woman Why was no one ever brought to justice And why would anyone defend such a lynching The task of the historian is to try to make events in the past come alive and seem less strange The details of the witch hunt are fascinating Some of the anecdotes are strange The modern reader finds it hard to imagine illness being blamed on the malevolence of a beggar woman denied charity or the economic failure of a sea voyage being attributed to the village hag not bad weather Witch hunting was related to ideas values attitudes and political events It was a complicated process involving religious and civil authorities village tensions and the fears of the elite The witch hunt in Scotland also took place at a time when one of the main agendas was the creation of a righteous or godly society As a result religious authorities had control over aspects of people's lives which seem as strange to us today as beliefs about magic or witchcraft It was not accidental that the witch hunt in Scotland and specifically in Fife should have happened at this time This book tells the story of what occurred over a period of a century and a half and offers some explanation as to

Campaigns and Elections Stephen K. Medvic, 2017-11-21 Stephen Medvic s Campaigns and Elections is a comprehensive yet compact core text that addresses two distinct but related aspects of American electoral democracy both the processes that constitute campaigns and elections and the players who are involved In addition to balanced coverage of process and actors it also gives equal billing to both campaigns and elections and covers contests for legislative and executive positions at the national and state and local levels including issue oriented campaigns of note The book opens by

providing students with the conceptual distinctions between what happens in an election and the campaigning that precedes it. Significant attention is devoted to setting up the context for these campaigns and elections by covering the rules of the game in the American electoral system as well as aspects of election administration and the funding of elections. Then the book systematically covers the actors at every level: candidates and their organizations, parties, interest groups, the media, and voters, and the macro level aspects of campaigns such as campaign strategy and determinants of election outcomes. The book concludes with a big picture assessment of campaign ethics and implications of the permanent campaign. New to the Third Edition: Fully updated through the 2016 elections. Handbook of Justice Research in Law Joseph Sanders, V. Lee Hamilton, 2007-05-08. Justice, a word of great simplicity and almost frightening scope. When we were invited to edit a volume on justice in law we joked about the small topic we had been assigned. Often humor masks fear and this was certainly one of those times. Throughout the project we found daunting the task of covering even a fraction of the topics that usually fall under the umbrella of justice research in law. Ultimately the organization of the book emerged from the writing of it. Our introductory chapter provides a road map to how the topics weave together but as is so often the case it was written last not first. It was only when we had chapters in hand that we began to see how the many strands of justice research might be woven together. Chapters 2-4 on the basic forms of justice: procedural, retributive, and distributive are the lynchpin of the volume; they provide the building blocks that permit us to think and write about each of the other substantive and applied chapters in terms of how they relate to the fundamental forms of justice. In the large central section of the volume, Chapters 5-9 the contributors address many ways in which the justice dimensions relate to one another. Most important for law is the relationship of perceptions of procedural justice and the two types of substantive justice: retributive and distributive.
