Daniel Jutte

Mies Van Der Rohe Farnsworth House Weekend House:

Mies Van Der Rohe Werner Blaser, 1999 In 1945 Mies van der Rohe built the weekend house Farnsworth House in Plano Illinois Situated on the banks of a river this house is constructed out of steel and glass and captivates with its clear proportions and reduction of the structure to its essence The surrounding landscape provides a direct context Werner Blaser who worked together with Mies van der Rohe presents a vivid picture of this house enlivened by his personal knowledge Together with comments on the architecture and technology the book is complemented by the author's personal experiences of working with Mies van der Rohe and impressions from Peter Palumbo a former inhabitant of Farnsworth House

Farnsworth House: Ludwig Mies Van Der Rohe Maritz Vandenberg, 2003-06-01 The only residence built by Ludwig Mies van der Rohe in America Farnsworth House exemplifies both the central tenet of the International Style by inverting the conventions of traditional architecture and of Mies's design philosophy as it had evolved over the preceding four decades commissioned by Dr Edith Farnsworth to be used as a weekend country retreat the house was conceived by Mies as an envelope of glass and steel floating over the Illinois Fox River flood plain Its spare interior an integrated living space pared down to the last detail was intended to enable a simpler leaner and healthier lifestyle With detailed drawings and specially commissioned photography this addition to the award winning Architecture in detail series provides an in depth and richly illustrated account of this icon of 20th century Modernist architecture It documents how even before its completion in 1951 architect and client had fallen out over expenses and practical defects of the house By the time it was sold to Lord Palumbo in 1972 Edith Farnsworth had changed many of the interior elements dictated so **Weekend Utopia** Alastair Gordon, 2001-05 The Hamptons are hot Gordon who grew up there traces the invention of the idea of the Hamptons as a resort for the elite of New York City and shows how various forces including artists real estate developers and media professionals transformed what had been a quiet rural place into a modern and worldwide phenomenon 175 illustrations

Women and the Making of the Modern House Alice T. Friedman, 2006-01-01 Investigates how women patrons of architecture were essential catalysts for innovation in domestic architectural design This book explores the challenges that unconventional attitudes and ways of life presented to architectural thinking and to the architects themselves Mies Van Der Rohe Dietrich Neumann, 2024-09-24 A landmark survey offering a nuanced and deeply researched account of the career and life of the iconic modern architect Ludwig Mies van der Rohe 1886-1969 was a German born American architect and designer whose work in Europe and North America has had an enduring influence on modern and contemporary architecture worldwide During his sixty year career he fundamentally rethought architectural types that shaped modern life including the office building apartment building and private home True to his alleged dictum less is more Mies van der Rohe's style is characterized by utmost simplicity elegance of materials and radical formal and functional innovation as exemplified by such iconic projects as the Farnsworth House in Plano Illinois and the Seagram Building in New York In this book renowned

architectural historian Dietrich Neumann presents a new critical look at Mies and complicates the established narrative about him Diverging from the reverential posture of many existing accounts Neumann insists on the importance of the contemporary context social political and architectural for understanding the architect's life and work The book draws on many overlooked archival and primary sources to demonstrate how and why Mies's designs were shaped and received foregrounding contemporary critics' responses and the work of Mies's collaborators and peers It presents several previously unknown buildings projects and furniture designs and challenges long established interpretations of key works Comprehensively illustrated and covering the entirety of Mies's career this ambitious book is the most substantial account to date of the life and work of one of the most important architects of the twentieth century

Plans, Sections and Elevations Richard Weston, 2004 CD ROM contains files for all of the plans sections and elevations included in the book

Mies van der Rohe - The Built Work Carsten Krohn, 2014-06-17 This essential and comprehensive Mies monograph focuses in its analysis on Mies design intentions it reconstructs the buildings in their original state examines them from the present day perspective and rediscovers the inspiring architecture of a great modern master The book presents eighty of Mies works in chronological order Approximately thirty of these works are analyzed in detail in three parts In the first part the construction is documented in its built state for this all the ground plans were redrawn by the author The second part outlines the changes to the buildings and the third part develops the results of this investigation with regard to their relevance to the contemporary view of Mies work

Mies Van Der Rohe's Farnsworth House Paul Clemence, 2006 Photographer Paul Clemence celebrates a revered icon of modern architecture the Farnsworth House located near Plano Illinois and designed in 1951 by architect Ludwig Mies van der Rohe in over 70 eye catching color and black and white photographs and drawings

Broken Glass Alex Beam, 2020 In 1945 Edith Farnsworth asked the German architect Mies van der Rohe already renowned for his avant garde buildings to design a weekend home for her outside of Chicago Edith was a woman ahead of her time unmarried she was a distinguished medical researcher whose discoveries put her in contention for the Nobel Prize as well as an accomplished violinist translator and poet The two quickly began an intimate relationship spending weekends together sharing interests in transcendental philosophy Catholic mysticism wine soaked picnics and architecture Their collaboration would produce one of the most important works of architecture of all time a blindingly original house made up almost entirely of glass and steel But the minimalist marvel built in 1951 was plagued by cost over runs and a sudden chilling of the two friends' mutual affection Though the building became world famous Farnsworth found it impossible to live in the transparent house and she began a public campaign against him cheered on by Frank Lloyd Wright Mies in turn sued her for unpaid monies The ensuing trial covered not just the missing funds and the structural weaknesses of the home but turned into a trial of modernist art and architecture itself Interweaving personal drama and cultural history Alex Beam presents a stylish enthralling tapestry of a tale illuminating the fascinating history behind one of the twentieth

century's most beautiful and significant architectural projects **Mies van der Rohe** Franz Schulze, Edward Windhorst, 2020-03-04 An excellent new edition of the definitive biography of the architectural genius with more than a hundred photos Booklist starred review Upon publication this book was praised by the Chicago Tribune and the most comprehensive book ever written about the master designer and by any measure the best while the Christian Science Monitor noted that Schulze has both the gift of an architectural historian able to render Mies's building innovations and that of a biographer able to paint the humanity and shortcomings of the man Newsweek called it a revelation Now this biography of the iconic modernist architect and designer has been extensively updated providing an even more enlightening and intimate portrait of a man who helped to create the twentieth century world This excellent revised edition has 138 illustrations incisive descriptions of Mies' innovative creations and a fascinating account of his Pyrrhic victory in a lawsuit against his disaffected client Edith Farnsworth Booklist starred review This authoritative biography of Mies van der Rohe has been updated through building records the recollections of students and a court transcript It's a gripping read Christopher Woodward Building Design *Transparency* Daniel Jutte, 2023-03-28 A wide ranging illustrated history of transparency as told through the evolution of the glass window Transparency is a mantra of our day It is key to the Western understanding of a liberal society We expect transparency from for instance political institutions corporations and the media But how did it become such a powerful and global idea From ancient glass to Apple's corporate headquarters this book is the first to probe how Western people have experienced conceptualized and evaluated transparency Daniel Jutte argues that the experience of transparency has been inextricably linked to one element of Western architecture the glass window Windows are meant to be unnoticed Yet a historical perspective reveals the role that glass has played in shaping how we see and interpret the world A seemingly pure material glass has been endowed throughout history with political social and cultural meaning in manifold and sometimes conflicting ways At the same time Jutte raises questions about the future of vitreous transparency its costs in terms of visual privacy but also its ecological price tag in an age of accelerating climate change Small Houses Nicolas Pople, 2003 Small houses are no longer synonymous with cheap houses and lack of privilege Instead they symbolize a range of culturally coded values compactness efficiency discrimination discreteness minimalism Opening with a detailed exploration of the social and historical background behind compact housing in the twentieth century this book goes on to feature 37 illustrated case studies that represent some of the best examples of small houses built worldwide within the past decade Plan areas range from 7 to 150 square metres 75 to 1615 square feet and each project embodies a particular design approach towards compact accommodation The case studies are organized into three chapters Rural Retreats Urban and Suburban Bases and Small Clusters and Multiples and include work by such architects as Toyo Ito Lacaton Vassal LOT EK and Kazuyo Sejima **The Architecture of Influence** Amanda Reeser Lawrence, 2023-11-21 How do we create the new from the old The Architecture of Influence explores this fundamental question by analyzing a broad swath of twentieth

century architectural works including some of the best known examples of the architectural canon modern and postmodern through the lens of influence The book serves as both a critique of the discipline's long standing focus on genius and a celebration of the creative act of revisioning and reimagining the past It argues that all works of architecture not only depend on the past but necessarily alter rewrite and reposition the traditions and ideas to which they refer Organized into seven chapters Replicas Copies Compilations Generalizations Revivals Emulations and Self Repetitions the book redefines influence as an active process through which the past is defined recalled and subsequently redefined within twentieth century architecture

Twenty-Five+ Buildings Every Architect Should Understand Simon Unwin, 2023-11-03 The underlying theme of *Twenty Five Buildings Every Architect Should Understand* is the relationship of architecture to the human being how it frames our lives and orchestrates our experience how it can help us make sense of the world and contribute to our sense of identity and place Exploring these dimensions through a wide range of case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading for every architect With the addition of numerous shorter analyses this new edition covers an even greater range of architectural ideas providing students and architects with further inspiration for exploration in their own design work Architects live by ideas But where do they come from And how do they shape buildings There is no one right way to do architecture This book illustrates many Its aim is to explore the rich diversity of architectural creativity by analysing a wide range of examples to extract the ideas behind them *Twenty Five Buildings Every Architect Should Understand* is a companion to Simon Unwin's *Analysing Architecture the Universal Language of Place Making* most recent edition 2021 and part of the trilogy which also includes his *Exercises in Architecture Learning to Think as an Architect* second edition 2022 Together the three books offer an introduction to the workings of architecture providing for the three aspects of learning theory examples and practice *Twenty Five Buildings* focusses on analysing examples using the methodology offered by *Analysing Architecture* which operates primarily through the medium of drawing An underlying theme of *Twenty Five Buildings Every Architect Should Understand* is the relationship of architecture to the human being how it frames our lives and orchestrates our experiences how it can help us give form to the world and contributes to our senses of identity and place Exploring these dimensions through case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading and hopefully an inspiration for every architect In this new edition supplementary analysis and discussion has been added to each of the twenty five case studies drawing attention to their influences from and on other architects A number of extra shorter analyses have been included too following the practice of presenting extra small dishes interspersed among main courses in high end restaurants These additional short analyses account for the sign after Twenty Five in the title of this edition and double the number of buildings analysed to around fifty

Mathematics In Architecture, Art, Nature, And Beyond Alfred S Posamentier, Guenter Maresch, 2025-03-07 There is little opportunity in classrooms today for teachers to explore the amazing applications of

mathematics outside the curriculum This book is intended to show how mathematics manifests itself in areas that most people are unaware of One can even revel in the history of how our number system evolved and how that has enabled us to define the beauty in mathematics as well as in art architecture nature and beyond The first two chapters of this book introduce the Fibonacci numbers and investigate their amazing relationships and applications in our general environment The following four chapters focus on the Golden Ratio and the Golden Rectangle exploring how they manifest all around us often hiding in plain sight in everything from architectural wonders such as the Taj Mahal to coin design and from Greek vases to petal formation We conclude our enjoyable journey through these mathematical wonders by considering conic sections and how they explain many aspects of everyday life such as radar dishes headlight reflectors and whispering halls This exposure to aspects of mathematics that are usually bypassed in the school curriculum will provide high school students teachers and general readers with an opportunity to truly appreciate the power and beauty of mathematics

The New Eco-Architecture: Alternatives from the Modern Movement Colin Porteous,2013-10-11 The New Eco Architecture builds a historical bridge between architectural science and design It seeks to address neglected aspects of the Modern Movement as a prelude to supporting a diversity of architectural insight and experimentation aimed at twenty first century environmental needs and priorities The attitudes and influences of renowned figures are re examined in relation to current issues of architectural sustainability By setting today s green architectural quest within a twentieth century context and evaluating the main protagonists with regard to a modern eco sensitive lineage the book will be of primary interest to architectural students academics and practitioners However it should also intrigue historians theoreticians and critics who tend to gloss over such issues as well as other disciplines engaged with the built environment

Encyclopedia of Architectural and Engineering Feats Christine Garnaut,2001-12-06 Encyclopedia of Architectural and Engineering Feats presents more than 200 achievements in architecture and structural engineering in all the inhabited continents from prehistory to the present An architect once described the built environment as the manifestation of the human spirit in stone wood and steel In this new volume readers can explore the most innovative and magnificent architectural expressions of the human spirit from pre history to the present from all parts of the world Readers can visit the Acropolis and Chartres cathedral along with less familiar places like the ruins of Great Zimbabwe once the greatest city in sub Saharan Africa and China s 71 meter high 1 200 year old Grand Buddha carved from stone They ll learn the secrets behind audacious engineering feats like the Panama Canal the U S interstate highway system and the Deltaworks in the Netherlands They will discover that many of these awe inspiring projects were not the work of trained architects and engineers but of underdeveloped communities where unified will tight social organization and shared commitment to a spiritual ideal were more important than the inventions of the Industrial Age

Twenty Buildings Every Architect Should Understand Simon Unwin,2010-02-25 Have you ever wondered how the ideas behind the world s greatest architectural designs came about

What process does an architect go through to design buildings which become world renowned for their excellence This book reveals the secrets behind these buildings He asks you to read the building and understand its starting point by analyzing its final form Through the gradual revelations made by an understanding of the thinking behind the form you learn a unique methodology which can be used every time you look at any building *Key Houses of the Twentieth Century* Colin Davies, 2006 Featuring over 100 of the most significant and influential houses of the twentieth century For each of the houses included there are numerous accurate scale plans showing each floor together with elevations sections and site plans where appropriate All of these have been specially drawn for this book and are based on the most up to date information and sources **Meaningful Absence Across Arts and Media** , 2019-03-27 This volume focusses on a rarely discussed method of meaning production namely via the absence rather than presence of signifiers It does so from an interdisciplinary transmedial perspective which covers systematic media comparative and historical aspects and reveals various forms and functions of missing signifiers across arts and media The meaningful silences blanks lacunae pauses etc treated by the ten contributors are taken from language and literature film comics opera and instrumental music architecture and the visual arts Contributors are Nassim Balestrini Walter Bernhart Olga Fischer Saskia Jaszoltowski Henry Keazor Peter Revers Klaus Rieser Daniel Stein Anselm Wagner Werner Wolf
