"Migration Theory. Talking across Disciplines", de Caroline Brettell y James Hollifield (editores). María Eugenia Anguiano Téllez, 2001 **Migration Theory** Caroline B. Brettell, James F. Hollifield, 2014-08-25 During the last decade the issue of migration has increased in global prominence and has caused controversy among host countries around the world To remedy the tendency of scholars to speak only to and from their own disciplinary perspective this book brings together in a single volume essays dealing with central concepts and key theoretical issues in the study of international migration across the social sciences Editors Caroline B Brettell and James F Hollifield have guided a thorough revision of this seminal text with valuable insights from such fields as anthropology demography economics geography history law political science and sociology Each essay focuses on key concepts questions and theoretical frameworks on the topic of international migration in a particular discipline but the volume as a whole teaches readers about similarities and differences across the boundaries between one academic field and the next How for example do political scientists wrestle with the question of citizenship as compared with sociologists and how different is this from the questions that anthropologists explore when they deal with ethnicity and identity Are economic theories about ethnic enclaves similar to those of sociologists What theories do historians the essentializers and demographers the modelers draw upon in their attempts to explain empirical phenomena in the study of immigration What are the units of analysis in each of the disciplines and do these shape different questions and diverse models and theories Scholars and students in migration studies will find this book a powerful theoretical guide and a text

that brings them up to speed quickly on the important issues and the debates All of the social science disciplines will find that this book offers a one stop synthesis of contemporary thought on migration **Migration** Michael Samers, Michael Collyer, 2016-12-08 While the subject of migration has received enormous attention in academic journals and books across the social sciences introductory texts on the matter are few and far between Even fewer books have explored migration through a critical and explicit engagement with spatial concepts Now in its second edition Migration remains the only text in more than a decade that emphasizes how geographical or spatial concepts can be used critically to understand migration The multi disciplinary text draws on insights from human geography political science social anthropology sociology and to a lesser extent economics All of the chapters focus on key terms theories concepts and issues concerning migration and immigration The book argues that in the context of migration two opposing spatial positions have emerged in the wake of the critique of methodological nationalism On one hand is the significance of transnationalism and on the other the importance of sub national or local processes Both require more nuance and integration while many of the concepts and theories which have thus far neglected space or have not been treated spatially need to be re written with space in mind Pedagogically the text combines a carefully defined structure accessible language boxes that explore case studies of migrant related experiences in particular places annotated suggestions for further reading useful websites and relevant films and summary questions for student learning at the end of each chapter Migration provides a critical multi disciplinary advanced and theoretically informed introduction to migration and immigration Revised and updated with new material new maps and illustrations and an accompanying website <https://migration2ndedition.wordpress.com> it continues to be aimed at advanced undergraduates and Masters level graduate students undertaking courses on migration and immigration Migration, Risk and Uncertainty Allan M. Williams, Vladimír Baláž, 2014-08-07 Migration is one of the driving forces of economic and social change in the modern world It is both informed by risk and a generator of risk whether for individuals households communities or societies Although the relationship between migration and risk is widely acknowledged it has long been neglected in academic research with a few exceptions such as household diversification strategies Instead risk is assumed to be implicit in economic or social models rather than being explicitly theorised or analysed This book represents the first major review of these key relationships It draws on a wide range of theories from economics psychology sociology anthropology and geography and an equally broad range of empirical material to provide a highly original overview African Migrations Abdoulaye Kane, Todd H. Leedy, 2013-02-18 Engaging case studies add to understanding the social processes of voluntary and forced displacement within the continent and across the seas Choice Spurred by major changes in the world economy and in local ecology the contemporary migration of Africans both within the continent and to various destinations in Europe and North America has seriously affected thousands of lives and livelihoods The contributors to this volume reflecting a variety of disciplinary perspectives examine the causes and consequences of this new migration The

essays cover topics such as rural urban migration into African cities transnational migration and the experience of immigrants abroad as well as the issues surrounding migrant identity and how Africans re create community and strive to maintain ethnic gender national and religious ties to their former homes

Globalisation and Migration Ronaldo Munck, 2013-09-13 This book critically examines the new issues and new politics regarding migration in the era of globalisation from a majority world perspective It examines the current shifts in the global political economy and the effects it has for example in relation to rural displacement When and how does this lead to national and or transnational migration We need to examine the ways in which migration is cut across and impacts on the generation of racism and xenophobia in the west The issue of remittances by migrants to the developing nations needs careful study as does the controversial issue of brain drain versus brain gain through migration The growing importance of trafficking for forced labour has now been taken up by various international bodies but is it the new normality or simply an unfortunate side effect of globalisation to be overcome through legislation Migration is becoming increasingly gendered in its composition and flows but also in the receiving countries where men and women do very different jobs We can predict the increasing racialization and gendering of migration but how will the state and society respond to these shifts This book was published as a special issue of Third World Quarterly

Rights, Deportation, and Detention in the Age of Immigration Control Tom K. Wong, 2015-05-13 Immigration is among the most prominent enduring and contentious features of our globalized world Yet there is little systematic cross national research on why countries do what they do when it comes to their immigration policies Rights Deportation and Detention in the Age of Immigration Control addresses this gap by examining what are arguably the most contested and dynamic immigration policies immigration control across 25 immigrant receiving countries including the U S and most of the European Union The book addresses head on three of the most salient aspects of immigration control the denial of rights to non citizens their physical removal and exclusion from the polity through deportation and their deprivation of liberty and freedom of movement in immigration detention In addition to answering the question of why states do what they do the book describes contemporary trends in what Tom K Wong refers to as the machinery of immigration control analyzes the determinants of these trends using a combination of quantitative analysis and fieldwork and explores whether efforts to deter unwanted immigration are actually working

Beyond Christendom Jehu Hanciles, 2008 Hanciles does yeoman work in part one synthesizing studies on the impact of globalization revealing that its outcomes will likely not be determined by the Euro American heartlands that sparked this movement Instead in parts two he shows that migration in general is having an enormous effect on shaping a new world order and in part three Mobile Faith he advances the case for the migration of Christians as carrying within it the seeds of renewal for the whole church and also the potential to reshape church state and religion and culture relations globally
