Ranching, Mining, and the Human Impact of Natural Resource Development Raymond L. Gold, 2016-05-15 In *Ranching Mining and the Human Impact of Natural Resource Development* Raymond L Gold observes and reports on people whose lives have been significantly affected by the industrialization of rural communities in the American West Such community change research is rarely done so this classic study is invaluable for its real world groundings applicable to a variety of social science theories The study evolved out of ethnographic research on Western communities done over a full decade This was the first work of its kind to examine and account for the rise of local citizens groups on the sense of being a community Its account of this process covers both ordinarily slow and extraordinarily rapid areas of change in the American West In this regard it is a contribution to basic social theory showing clearly the interrelation between small community and large society elements of the structure and functioning of community life No other book brings together the story of social effects of natural resource development projects in the American West This book shows how to implement a social policy concerning resource development and public agencies It is intended for people interested in the environment American society rural and urban affairs social impact assessment and urban structures generally It is also aimed at industrial and community planners and natural resource development firms

Ranching, Mining, and the Human Impact of Natural Resources Development Raymond L. Gold, This book is intended for people interested in the environment American society rural and urban affairs social impact assessment and urban structures generally It is also aimed at industrial and community planners and natural resource development firms and formulated to implement a social policy concerning resource development and public agencies *Ranching Mining and the Human Impact of Natural Resources Development* reports and observes people whose lives have been importantly affected by industrialization of rural communities in the American West Such community change research is rarely done but is invaluable for its real world groundings for a variety of social science theories This study evolved out of ethnographic research of Western communities done over a full decade Initially performed to meet requirements for social impact analysis these studies have a much larger concern namely identifying those areas of social change that contribute to the standing of small communities and how they persist in the face of seemingly overwhelming odds of the highly advanced urban complex Professor Gold has written the first work which examines and accounts for the rise of local citizens groups to a sense of being a community Its account of this process covers both ordinarily slow and extraordinarily rapid areas of change in Western societies It places the Gemeinschaft in proper perspective as the foundation upon which all other aspects of community social structure are built In this regard it is a contribution to basic social theory showing clearly the interrelation between small community and large society elements of the structure and functioning of community life The work is subtly textured combining structural cultural and symbolic perspectives in its account of the experience of the community of Sagebrush Gold s monograph is one of a kind No other

book brings together the story of social effects of natural resource development projects in the American West Ranching, Mining, and the Human Impact of Natural Resource Development Raymond L. Geier,1991 *Forest Ecosystem Management* ,1993 *Community And The Northwestern Logger* Matthew S. Carroll,2019-04-09 It has often been said that natural resource and environmental problems cannot be solved without solving human problems In this book Matthew Carroll examines the economic and social circumstances of northwestern U S loggers in the face of shifts in environmental politics dramatic reductions in timber harvest levels on federal lands and changing technology and market forces among other factors that are rapidly transforming their industry their livelihoods and their communities Drawing upon sociological fieldwork in logging communities that he conducted at various times over a period of nearly a decade and using the spotted owl old growth controversy as a case study Carroll provides a rich and detailed picture of life among northwestern loggers He lays out the human dimensions and dilemmas of the timber crisis Expanding it from the oversimplified owl versus logger confrontation he puts these issues in a historical and policy context and suggests parallels to other controversies such as public grazing and federal or state river protection Carrol s work revives the concept of occupational community and shows ways it can be used to understand the dynamics of rural occupations linked to resource extraction
