Malenes Fate:

Mercyful Fate's Don't Break the Oath Henrik Marstal, 2021-12-30 Upon its release Don't Break the Oath charted fifth on the official British heavy metal album list and was supported by a two month long sold out American tour in early 1985 The band's controversial stage appearance with burning crosses a microphone stand formed as a cross made of two human leg bones as well as other blasphemous rituals attracted the attention of the then newly formed PRMC Parental Resource Music Center committee ironically reassuring the band its position on the charts But though the album was hugely popular in the anglophone metal scene it was conceived in peripheral Denmark This book discusses the relationship between center and periphery It juxtaposes the Anglophone reticence of heavy metal with the rather marginalized location of Copenhagen and examines Mercyful Fate's relation to the Nordic region more generally It also takes a close look at the methods involved in the production of King Diamond's vocals and emphasizes the role of the vocalist as just as an important part of the overall soundscape as the instrumental contributions

Genetic Mosaics and Cell Differentiation W. J. Gehring, 2013-06-29 The relationship of cell lineage and differentiation is one of the most intriguing problems in developmental biology In most higher organisms the analysis of the cell lineage has to rely on indirect methods Only in the most suitable systems like the nematodes can the pattern of cell division be determined by direct observation under the microscope In cases where this is not possible the fate of the cells has to be examined by using cell markers Most suitable for this purpose are genetic markers provided that they do not interfere with the developmental pathway to be studied However suitable genetic markers and techniques for generating genetic mosaics are available in a few organisms only Therefore this volume is largely concerned with *Drosophila* and the mouse which have been studied most extensively In 1929 STURTEVANT introduced the analysis of gynandromorphs into developmental genetics However this important contribution remained largely unnoticed until the late sixties when the potential of this technique for determining embryonic fate maps and the number of primordial cells was exploited and the methodology extended to the mapping of mutational foci Mitotic recombination was demonstrated by STER

Heart of Maleness Raphaël Liogier, 2020-01-28 In this timely self-reflective essay a groundbreaking sociologist and philosopher examines the underlying causes of gender inequality and how we can fight against it Following the shocking infuriating accounts shared as part of the MeToo movement Raphaël Liogier felt compelled to apply his academic expertise to shed light on the roots of gender inequality and its many manifestations including catcalling workplace harassment and rape as well as the glass ceiling and the gender pay gap In the brazenness of Donald Trump who brags about groping women in the hypocrisy of outspoken progressives whose private behavior belies their so-called feminist ideals and even occasionally in the good intentions of men such as Liogier who strive to be allies we can see the influence of a deep-seated fantasy of male dominance With candor and clarity Liogier demonstrates that the archetypal Prince Charming and a monstrous predator such as Harvey Weinstein are two sides of the same coin products of a worldview that not only places a man's desires above a woman's but also doubts whether women are fundamentally capable of knowing what they want Recent years have witnessed significant progress toward gender equality from the ousting of prominent men accused of sexual misconduct to the unprecedented popularity of the 2019 Women's World Cup *Heart of Maleness* maps out the crucial work still to be done first and foremost addressing the core male fantasy about women's bodies and minds

[The Recursive Frontier](#) Michael Docherty, 2024-05-01 The Recursive Frontier is an innovative spatial history of both the literature of Los Angeles and the city itself in the mid twentieth century Setting canonical texts alongside underexamined works and sources such as census bulletins and regional planning documents Michael Docherty identifies the American frontier as the defining dynamic of Los Angeles fiction from the 1930s to the 1950s Contrary to the received wisdom that Depression era narratives mourn the frontier's demise Docherty argues that the frontier lives on as a cruel set of rules for survival in urban modernity governing how texts figure race space mobility and masculinity Moving from dancehalls to offices to oil fields and beyond the book provides a richer more diverse picture of LA's literary production during this period as well as a vivid account of LA's cultural and social development as it transformed into the multiethnic megalopolis we know today
