The Dynamics of Cities Dimitrios Dendrinos, 2002-09-26 Drawing on recorded evidence, this book argues that simple general and powerful macrodynamic processes guide the growth and decline of present day urban agglomerations as well as cities of the past.

Still Moving Daniel Judah Elazar, The aftermath of World War II was a period of massive Jewish migration. More than a million Jews came to settle in the new state of Israel; hundreds of thousands moved to North America, Australia, and France, while tens of thousands resettled themselves elsewhere in Europe and the world. Emigration was in turn paralleled by large scale movement among second generation Jews from the great urban centers to the suburbs. Until recently it has seemed as though the Jewish people had, in the words of the Bible, reached a situation of rest and landed inheritance. However, there is considerable evidence that Jews are still moving from the former Soviet Union to and from Israel and within nations where they have been long resident. Still Moving examines the causes and character of contemporary migration in Israel and throughout the Diaspora. The contributors to this volume adopt a cross cultural comparative approach. Part 1 establishes the context of the new migration globally, with specific concentration on its effects on the institutions of Israeli democracy. Part 2 surveys immigration to Israel in the 1990s, with particular emphasis on the wave of Russian emigres since the fall of the Soviet Union. Internal migration from rural to urban centers is also explored. Migration to the Diaspora is covered in part 3. The Jewish identity of Soviet Jews is compared to their American and Canadian counterparts. Economic performance and problems of multigenerational families among emigres are also treated, as are the controversies.

surrounding politically motivated emigration from Israel Part 4 focuses on the changing nature of the Diaspora and its relations with Israel Beyond its grounding in Jewish culture and history Still Moving frames questions that are central to understanding contemporary migration in general Does immigration accelerate or retard the abilities of host countries to restructure economically How does greater ethnic diversity affect the social and cultural life of cities What factors help immigrants integrate into the wider community Does immigration contribute to the creation of a marginalized underclass Still Moving will be essential reading for historians sociologists Jewish studies specialists and policy analysts **A**

Mediterranean Labor Markets in the First Age of Globalization Paul Caruana Galizia,2015-03-11 Scholars have studied the nineteenth century s unprecedented labor flows in global and specific country contexts but have lacked a comprehensive analysis of the world s old economic core the Mediterranean This work provides answers to important questions such as If the Mediterranean labor market really was integrated then why did globalization affect the Western and Eastern Mediterranean so differently Why did wage inequality rise in the East while it fell in the rest of the labor abundant periphery More broadly was low emigration from Iberia and the East to blame for the Mediterranean s failed integration with the fast expanding global economy This ground breaking research relates these questions to ongoing historical debates on the intensity of intra Mediterranean integration in goods and labor to current heated debates on North African emigration to Europe and to discussions on European economic integration more generally
