Shifting Sovereignties Moritz Mihatsch, Michael Mulligan, 2025-01-27 Shifting Sovereignties explores practical manifestations of sovereignty from antiquity to the Anthropocene Taking a global history perspective and centring Africa the Middle East and Asia it destabilises overly neat theoretical notions of the concept Shifting Sovereignties shows that in practice sovereignty is far from absolute perpetual indivisible or supreme rather it is fuzzy compromised fragmented and layered From these observations the authors derive a historical conceptualisation which makes change and contingency core aspects of the understanding of sovereignty Rather than understanding sovereignty as a characteristic of individual states Mihatsch and Mulligan propose the notion of sovereignty regimes frameworks of legitimation enforced through mutual recognition These regimes are created and managed by more or less institutionalised structures which embody what the authors call system sovereignty Sovereignty regimes and system sovereignty are like sovereignty itself continuously changing and contingent This process of change forms the core of the book Shifting Sovereignties thus contributes a practical historical perspective on a concept which is foundational in political science international relations and international law

Moving Ourselves, Moving Others Ad Foolen, Ulrike M. Lüdtke, Timothy P. Racine, Jordan Zlatev, 2012-04-12 The close relationship between motion bodily movement and emotion feelings is not an etymological coincidence While moving ourselves we move others in observing others move we are moved ourselves The fundamentally interpersonal nature of mind and language has recently received

due attention but the key role of emotion in this context has remained something of a blind spot. The present book rectifies this gap by gathering contributions from leading philosophers, psychologists and linguists working in the area. Framed by an introducing prologue and a summarizing epilogue written by Colwyn Trevarthen who brought the phenomenological notion of intersubjectivity to a wider audience some 30 years ago, the volume elaborates a dynamical active view of emotion along with an affect laden view of emotion and explores their significance for consciousness, intersubjectivity and language. As such it contributes to the emerging interdisciplinary field of mind science transcending hitherto dominant computationalist and cognitivist approaches. Now Open Access as part of the Knowledge Unlatched 2017 Backlist Collection. Collected Papers of Carl Wieman C. E. Wieman, 2008. Carl Wieman's contributions have had a major impact on defining the field of atomic physics as it exists today. His ground breaking research has included precision laser spectroscopy using lasers and atoms to provide important table top tests of theories of elementary particle physics, the development of techniques to cool and trap atoms using laser light, particularly in inventing much simpler, less expensive ways to do this, the understanding of how atoms interact with one another and light at ultracold temperatures and the creation of the first Bose-Einstein condensation in a dilute gas and the study of the properties of this condensate. In recent years he has also turned his attention to physics education and new methods and research in that area. This indispensable volume presents his collected papers with annotations from the author tracing his fascinating research path and providing valuable insight about the significance of the works.
