Nation State And Global Order A Historical Introduction To Contemporary Politics:

The Nation-state and Global Order Walter C. Opello, Stephen J. Rosow, 1999 Rejecting models of linear development Opello and Rosow both in political science State U of New York Oswego fuse governing practices technological change political economy language and culture in an analysis of the formation of specific forms of the state from imperial Rome to the present state of states and future challenges Includes several basic maps of early political divisions and a glossary of terms from arquebus a primitive firearm to virtus the Roman political ideal of manliness based on great military deeds Paper edition unseen 19 95 Annotation copyrighted by Book News Inc Portland OR Rules for a Flat World Gillian Kereldena Hadfield, 2017 The ground is shifting beneath our feet Technology and globalization continue to uproot and reshape daily life and economics Global supply chains are growing more deeply embedded in every region of the world Digital platforms connect billions around the planet in ever more complex networks of data and exchange In 2005 Thomas Friedman reduced these phenomena to one phrase the title of his massively successful book *The World is Flat* The flat world is one of tremendous possibility but it also poses new challenges to stability and shared prosperity How will we come up with the new rules we need to make sure we continue to innovate and grow but also become a fairer safer and more inclusive global community Law and economics professor Gillian K Hadfield picks up where Friedman's book left off peeling back the technological layer to look at the rule systems that guide global integration our legal infrastructure and argues that our existing approaches to making rules are no longer working They are not only too slow costly and localized for increasingly complex advanced economies Our rules also fail to address looming challenges such as poverty instability and oppression for the four billion living in poor and developing countries largely outside of any formal legal framework Following a rich and sweeping overview of the long term evolution of social rules that made complex human societies and economic interdependence possible Hadfield makes the case for building a more agile market based and globally oriented legal infrastructure Combining an impressive grasp of contemporary economic globalization with an ambitious re envisioning of our global legal system *Rules for a Flat World* will transform our understanding of how to best achieve a more sustainable and vibrant global economy **Shifting Grounds** Burak Kadercan, 2023 In *Shifting Grounds* Burak Kadercan draws upon a wide variety of cases ranging from the Thirty Years War to ISIS to examine the relationship between territorial ideas and armed conflict He argues that states and societies have adhered to different forms of territoriality across time and space and territory as well as territorial control has meant different things in different time periods and regions Ranging broadly across different eras and world regions the book sheds light on the shifting nature of the relationship between territorial ideas and armed conflict not only in the context of the distant the past but also in present day global politics **Africa and International Relations in the 21st Century** S. Cornelissen, F. Cheru, T. Shaw, 2016-01-26 This book examines key emergent trends related to aspects of power sovereignty conflict peace development and changing social dynamics in the

African context It challenges conventional IR precepts of authority politics and society which have proven to be so inadequate in explaining African processes Rather this edited collection analyses the significance of many of the uncharted dimensions of Africa s international relations such as the respatialisation of African societies through migration and the impacts this process has had on state power the various ways in which both formal and informal authority and economies are practised and the dynamics and impacts of new transnational social movements on African politics Finally attention is paid to Africa s place in a shifting global order and the implications for African international relations of the emergence of new world powers and or alliances This edition includes a new preface by the editors which brings the findings of the book up to date and analyses the changes that are likely to impact upon global governance and human development in policy and practice in Africa and the wider world post 2015

Cruising in the Global Economy Christine B.N. Chin,2016-12-05 The business of cruise tourism in recent years has commanded news media attention especially on issues of environmental pollution passenger safety and worker rights yet consumer interest in cruise vacations has not been adversely affected by negative publicity and it continues to grow at an average of 8.9% per annum This unique mode of business focusing on the production and consumption of pleasure at sea and on land offers us an unprecedented opportunity to analyze the manner in which ongoing economic restructuring processes to bring about free markets in goods services and labour can and does involve both life on land and at sea This interdisciplinary analysis elicits an examination of states relationship to the maritime regulatory structure governing ship ownership management and operations cruise lines business strategies development of port communities to capture cruise related revenue changing leisure consumption patterns and meanings and the employment of foreign migrant workers as seafarers

Straight Power Concepts in the Middle East Gregory Harms,2010-04-09 How did the US become a world power How did it become involved in the Middle East What is the history and nature of its special relationship with Israel Given the increase in tensions in the Middle East and the United States involvement in them news coverage is in abundance Yet the reportage and discussion of American foreign policy is often narrow in scope offering little background or context And yet the historical record sharply contrasts with reportage Guiding the reader through a panoramic sweep of world and American history we see how the US became a world power how the Middle East became modern and how Israel became an American strategic asset Disavowing the rhetoric commonly used by heads of state press secretaries news media and commentators we see how recent turmoil is closer to business as usual

The State Bearing Gifts Brian J. McVeigh,2006-01-01 Using Japanese higher education as a case study author Brian J McVeigh explores the varieties of exchange dramatics among the Education Ministry universities faculty and students With one eye on large scale processes and the other on everyday practices he elucidates trafficking between micro and macro levels and key concepts of value exchange and role performance by studying how political economy configures dramatization and deception at the everyday level Relying on extensive ethnographic participant observation and the notion of the gift

McVeigh challenges the commonly accepted idea of social contract for understanding state society relations Written to be read as both a political and philosophical commentary and anthropological investigation this work has theoretical implications for comparative studies of political systems particularly regarding the relation between self deception and the ideological manufacture of legitimacy **Legitimizing Science** Andreas Franzmann,Axel Jansen,Peter Münte,2015-12-10 Since the founding in 1660 of the Royal Society London scientists engaging in experimental research have sought to establish a base for exploratory work in communities and their political institutions This connection between science and the national state has only grown stronger during the past two centuries Here historians sociologists and jurists discuss the history of that relationship since 1800 asking such key questions as how have scientists conceived of the national setting for their transnational work in the past and how do they situate their work in the context of globalization Taken together the essays reveal that while nineteenth century scientists in many countries felt they had to fight for public recognition of their work the twentieth century witnessed the national endorsement and planning of science With essays ranging from an analysis of speeches by nineteenth century German university presidents to the state of science in the context of European integration this book will appeal to anyone interested in the public and political role of science and its institutions in the past present and future *War, Armed Force, and the People* Walter C. Opello Jr.,2016-10-18 Throughout history innovations in military technology have transformed warfare which in turn affected state formation This interplay between warfare military technology and state formation is the focus of this text Theoretically grounded in the bellicist approach to the study of war and state which posits that war is a normal part of human experience the book argues that the threat of war by powerful predatory neighbors has been until relatively recently the prime mover of state formation Using a historical approach it explains how advances in military technology have transformed war and how new modes of war in turn have transformed forms of politico military rule especially with regard to the relationship between the state armed force and the people

The Cosmopolitan State H Patrick Glenn,2013-05-16 For more than two centuries the idea of the nation state has been widespread The expression is now widely used and is even to be unavoidable The nation state implies that the population of a state should be homogenous in terms of language religion and ethnicity the nation and the state should coincide However history demonstrates that there never has been and there never will be a nation state Human diversity is manifest in states of all sizes locations and origins This wide ranging book argues that there should be no regret in the recognition of this empirical reality since the notion of a nation state has been the justification for some of the worst atrocities in human history Since the nation state is impossible all states are cosmopolitan in character They are cosmopolitan regardless of the language of their constitutions or official teaching and regardless of the extent to which they officially recognize their own diversity The most successful states are those which are most successful in their own forms of cosmopolitanism Cosmopolitan ways are infinitely varied however and must be sought in the intricate workings of individual states The cosmopolitan

character of states is necessarily reflected in their law. The main instruments of legal cosmopolitanism have been those of common laws constitutionalism and what is best described as institutional cosmopolitanism. The relative importance of these legal instruments has changed over time but all three have been constantly operative even in times of attempted national and territorial closure. All three remain present in the contemporary cosmopolitan state understood in terms of cosmopolitan citizens cosmopolitan sources and cosmopolitan thought. The cosmopolitan state is moreover the only appropriate conceptualization of the state in a time of globalization. This book outlines the subtlety of the law of cosmopolitan states law which has survived through periods of nationalism and which provides the working methods for the reconciliation of diverse populations. Combining law history political science political philosophy international relations and the new logics it demonstrates that the idea of the nation state has failed and should yield to an understanding of the state as necessarily cosmopolitan in character. This will be invaluable reading to all those interested in constitutional law international law and political theory.

International Governance and Law Hanneke Van Schooten, Jonathan Verschuuren, 2008-01-01. Around the world the role of national regulation is often hotly debated. This book takes as its starting point the fact that legislatures and regulators are criticized for overregulation and for producing poor quality regulation which ignores input from citizens and stifles private initiative. This situation has enhanced the role of non state law in forms such as self regulation and soft law. In this book international scholars in various fields of law as well as socio legal studies address the question to what extent non state law currently influences state regulation and what the consequences of non state law are likely to be for state regulation. Drawing lessons for the state legislature and state regulators this innovative book will be of great interest to academic researchers and post graduate students in the fields of law regulation legal sociology legal theory law and economics and environmental law. It will also be of interest to policy makers and regulators those working at ministries and government departments drafting legislation.

Governance of the Global and Extra-Terrestrial Commons Michael Roe, 2023-06-26. This book provides a unique analysis of the complex relationship between governance and the global commons. It has a specific reference to the dynamic and growing outer space economy and society and how experience in the maritime sector which exhibits many of the same issues and challenges as outer space can be useful in suggesting moves forward in policy making and design. This book fills a large gap in the literature of both governance and the development of outer space. Whilst the maritime sector has a long history of debate albeit little in terms of governance and policy making outer space has much less and what there has been commonly focused upon technical considerations. The importance of this book is that the failures of maritime governance need to be avoided in the outer space sector which exhibits many of the same issues particularly those related to the global commons. Innovative and exciting this book will be of interest to academics studying corporate governance business management and space capitalism.

Terrorism in Africa John Davis, 2012-07-10 The study *Terrorism in Africa The Evolving Front in the War on Terrorism* represents a research endeavor aimed at increasing scholarly discourse on the ever expanding threat of terrorism and terrorist related violence in the region It offers the most wide ranging analysis of the sub national and transnational terrorists groups that have made Africa the second most violent region in the world Additionally the study expands the coverage of the multiple dynamics that indicate why terrorist related violence continues to increase in the region and closes with regional solutions to the threat of terrorism This collection of essays offers a comprehensive analysis of the states terrorist groups and critical issues that have increased the specter of terrorism in Africa The study is divided into three themes 1 the diversity of the terrorist threat among states in the region 2 the regional dynamics and the local response to terrorism and 3 regional solutions to the threat of terrorism in Africa

Hazards, Risks, and Disasters in Society Andrew E. Collins, Jones Samantha, Bernard Manyena, Janaka Jayawickrama, 2014-11-21 *Hazards Risks and Disasters in Society* provides analyses of environmentally related catastrophes within society in historical political and economic contexts Personal and corporate culture mediates how people may become more vulnerable or resilient to hazard exposure Societies that strengthen themselves or are strengthened mitigate decline and resultant further exposure to what are largely human induced risks of environmental social and economic degradation This book outlines why it is important to explore in more depth the relationships between environmental hazards risk and disasters in society It presents challenges presented by mainstream and non mainstream approaches to the human side of disaster studies By hazard categories this book includes critical processes and outcomes that significantly disrupt human wellbeing over brief or long time frames Whilst hazards risks and disasters impact society individuals groups institutions and organisations offset the effects by becoming strong healthy resilient caring and creative Innovations can arise from social organisation in times of crisis This volume includes much of use to practitioners and policy makers needing to address both prevention and response activities Notably as people better engage prevalent hazards and risks they exercise a process that has become known as disaster risk reduction DRR In a context of climatic risks this is also indicative of climate change adaptation CCA Ultimately it

represents the quest for development of sustainable environmental and societal futures Throughout the book cases studies are derived from the world of hazards risks and disasters in society Includes sections on prevention of and response to hazards risks and disasters Provides case studies of prominent societal challenges of hazards risks and disasters Innovative approaches to dealing with disaster drawing from multiple disciplines and sectors Conflict Zone Literatures Debamitra Kar,2024-07-12 This book examines the metanarratives promoted by the state that determine the ideological framework and how these respond under extraneous circumstances like conflicts The volume shows how individuals in such geo politically aggrieved zones re organise re structure and re interpret their memory and identity and negotiate with violence in the literary space Focusing on Kashmir and Northern Ireland in the decades of 1980s and 1990s and post 9 11 America the author maps the changing contours of the state and its powers in the late capitalist phase It investigates complex themes such as the changing nature of governance and warfare citizenship and resistance inclusivity and xenophobia and statecraft as a linguistic discourse in the post global scenario Interdisciplinary in approach the volume will be of great interest to scholars and researchers of literature and aesthetics peace and conflict studies politics and international relations

Political Marketing Darren G. Lilleker,Jennifer Lees-Marshment,2005-08-06 Political marketing has become a global phenomenon as parties try to copy the market oriented approach employed by Tony Blair to win power for New Labour in 1997 It raises fresh perspectives on the more established political marketing practices in the UK and US such as how to incorporate political leadership within the market oriented framework and the democratic implications when faced with the actual business of governing This book also highlights how the market oriented party approach has spread around the world including Europe and the new democracies of Brazil and Peru The collection also introduces the debate on whether such practices enhance or undermine democracy raising important questions on the future of political marketing The Prison as Metaphor Michael P. Marks,2004 Whether wittingly or unwittingly scholars of international relations have peppered the field with a wide range of metaphors that serve as vehicles for theorizing about world affairs Yet as pervasive as metaphors are in international relations theory theorists efforts to employ metaphorical imagery to suggest new ways of thinking have been haphazard and sporadic In this book Michael P Marks suggests a new metaphor with which to conceptualize international relations the modern prison Many of the same questions that are asked about the so called anarchy of the international system are also frequently asked of life among prison inmates Marks finds that lessons from inmate relations can be applied to the study of international affairs This comparison between the prison and international relations reveals how the construction of human interaction in both realms is infinitely complex **Between Sacred and Secular Knowledge** Yanbi Hong,2021-11-10 This book examines how different social forces including state ideology and policies religious culture and ethnic identities and economic market forces affect Muslim parents perceptions and attitudes toward public and religious education Combining ethnographic fieldwork and a cognitive rationality framework this book investigates ethnic minorities

educational attainment and its shaping mechanisms Instead of attributing the undereducation of ethnic minorities solely to structural factors such as economic constraints cultural conflicts and state policies this study focuses on the critical role of perceptions and expectations through which many structural factors function The fieldwork in a predominantly Muslim village in northwest China reveals that public education and religious education are complementary in the daily pursuit of well being And the study further argues that the practical oriented logic of rural Muslims sheds light on the research of inequality in educational attainment The book will be of interest to scholars and postgraduate students studying ethnic minority education in China Those who are researching on Islam and Muslims identity especially in a multiethnic society may also find this research insightful and helpful

The BRICS and Beyond Li Xing, 2016-03-16 The world is in an era of great transformations Globalization transnational capitalism September 11 the 2008 global financial crises and the emergence of the second world in general and the BRICS in particular are characterized by a diffusion of power away from the traditional North Western powers and towards the global South Such great transformations have reshaped the terrain and parameters of social economic and political relations both at the national and the global levels and have exerted pressure on the exiting international order in terms of both opportunities and constraints This new era also urges the need for re conceptualizing the changing world order especially with regard to one of the core conceptual categories and analytical apparatus in the studies of IR and IPE hegemony The world will witness a new era of interdependent hegemony in which both the existing First World and the emerging Second World are intertwined in a constant process of shaping and reshaping the international order in the nexus of national interest regional orientation common economic and political agenda political alliance and potential conflicts This collection juxtaposes from different perspectives and approaches the discussion on the political economy of the emerging world order with a focus on the rising powers
