Senate. Committee on Energy and Natural Resources,1981 Ideology and Form in Yan Lianke's Fiction Haiyan Xie,2023-02-10 Xie analyzes three novels by the international award winning Chinese writer Yan Lianke and investigates how his signature mythorealist form produces textual meanings that subvert the totalizing reality prescribed by literary realism The term mythorealism which Yan coined to describe his own writing style refers to a set of literary devices that incorporate both Chinese and Western literary elements while remaining primarily grounded in Chinese folk culture and literary tradition In his use of mythorealism carrying a burden of social critique that cannot allow itself to become political Yan transcends the temporality and provinciality of immediate social events and transforms his potential socio political commentaries into more diversified concerns for humanity existential issues and spiritual crisis Xie identifies three modes of mythorealist narrative exemplified in Yan s three novels the minjian folk mode in Dream of Ding Village the allusive mode in Ballad Hymn Ode and the enigmatic mode in The Four Books By positioning itself against an ambiguous articulation of social determinants of historical events that would perhaps be more straightforward in a purely realist text each mode of mythorealism moves its narrative from the overt politicality of the subject matter to the existential riddle of negotiating an alternative reality A groundbreaking study of one of contemporary China s most important authors that will be of great value to scholars and students of Chinese literature ORO ,1954 *Department Bulletin* United States. From May Fourth to June Fourth Ellen Widmer,Te-wei Wang,2009-06-30 What do the Chinese literature and film inspired by the Cultural Revolution 1966 1976 have in common with the Chinese literature and film of the May Fourth movement 1918 1930 This new book demonstrates that these two periods of the highest literary and cinematic creativity in twentieth century China share several aims to liberate these narrative arts from previous aesthetic orthodoxies to draw on foreign sources for inspiration and to free individuals from social conformity Although these consistencies seem readily apparent with a sharper focus the distinguished contributors to this volume reveal that in many ways discontinuity not continuity prevails Their analysis illuminates the powerful meeting place of language imagery and narrative with politics history and ideology in twentieth century China Drawing on a wide range of methodologies from formal analysis to feminist criticism from deconstruction to cultural critique the authors demonstrate that the scholarship of modern Chinese literature and film has become integral to contemporary critical discourse They respond to Eurocentric theories but their ultimate concern is

literature and film in China's unique historical context. The volume illustrates three general issues preoccupying this century's scholars: the conflict of the rural search for roots and the native soil movement versus the new strains of urban exoticism; the diacritics of voice, narrative mode, and intertextuality; and the reintroduction of issues surrounding gender and subjectivity.

Remediation and Health Risks of Heavy Metal Contaminated Soils Qi Liao, Mariusz Gusiatin, Weichun Yang, 2024-10-18 Soil is the essential foundation for human survival. However, soil pollution and environmental problems have become increasingly evident in recent years. In particular, heavy metal pollution at various sites poses a serious threat to human health and ecological safety, becoming a significant social issue worldwide. Greener and environmentally friendly remediation technologies, coupled with accurate evaluation of the potential risks, environmental impact, and human health of heavy metals in the soil, have become urgently required. This Research Topic aims to gather the latest advancements in scientific research and applicable studies on: i) the potential risk or impact of recently problematic heavy metals such as Sb, Ti, and cases of combined heavy metal pollution; ii) pollution formation, migration, and remediation of heavy metal in soil and groundwater; iii) novel methods to treat and reduce heavy metals in contaminated sites; iv) environmentally friendly remediation technology such as enhanced bioremediation and in situ remediation; and v) assessment or modeling of the environmental or human health impact of heavy metals.
