Modern in the Middle Susan Benjamin, Michelangelo Sabatino, 2020-09-01 The first survey of the classic twentieth century houses that defined American Midwestern modernism Famed as the birthplace of that icon of twentieth century architecture the skyscraper Chicago also cultivated a more humble but no less consequential form of modernism the private residence Modern in the Middle Chicago Houses 1929-75 explores the substantial yet overlooked role that Chicago and its suburbs played in the development of the modern single family house in the twentieth century In a city often associated with the outsized reputations of Frank Lloyd Wright and Ludwig Mies van der Rohe the examples discussed in this generously illustrated book expand and enrich the story of the region's built environment Authors Susan Benjamin and Michelangelo Sabatino survey dozens of influential houses by architects whose contributions are ripe for reappraisal such as Paul Schweikher Harry Weese Keck Keck and William Pereira From the bold early example of the Battledock House by Henry

Dubin 1930 to John Vinci and Lawrence Kenny's gem the Freeark House 1975 the generation spanning residences discussed here reveal how these architects contended with climate and natural setting while negotiating the dominant influences of Wright and Mies They also reveal how residential clients typically middle class professionals progressive in their thinking helped to trailblaze modern architecture in America Though reflecting different approaches to site space structure and materials the examples in *Modern in the Middle* reveal an abundance of astonishing houses that have never been collected into one study until now

Eero Saarinen Eero Saarinen, 2006-01-01 From the swooping concrete vaults of the TWA Terminal at JFK Airport to the 630 foot tall Gateway Arch in St Louis the iconic designs of Eero Saarinen 1910-1961 captured the aspirations and values of mid 20th century America Potent expressions of national power these and other Saarinen designed structures including the GM Technical Center Dulles International Airport and John Deere headquarters helped create the international image of the United States in the decades following World War II Eero Saarinen *Shaping the Future* offers a new and wide ranging look at the entire scope of Saarinen's career This is the first book on Saarinen to incorporate significant research and materials from the newly available archives of his office and includes the most complete portfolio of Saarinen's projects to date a chronological survey of more than 100 built and unbuilt works previously unpublished photographs plans and working drawings Lavishly illustrated this major study shows how Saarinen gave his structures an expressive dimension and helped introduce modern architecture to the mainstream of American practice In his search for a richer and more varied modern architecture Saarinen became one of the most prolific and controversial practitioners of his time Exhibition schedule Helsinki Kunsthalle Finland October 6-December 6 2006 Centre International pour la Ville l'Architecture et le Paysage CIVA Brussels Spring 2007 National Building Museum Washington D C Winter Spring 2008 Additional venues to be determined

Ceilings and Dreams Paul Emmons, Federica Goffi, Jodi La Coe, 2019-07-08 Where is the space for dreaming in the twenty first century Lofty thoughts like dreams are born and live overhead just as they have been represented in Renaissance paintings and modern cartoons Ceilings are often repositories of stories events and otherwise invisible oneiric narratives Yet environments that inspire innovative thinking are dwindling as our world confronts enormous challenges and almost all of our thinking debating and decision making takes place under endless ceiling grids Quantitative research establishes that spaces with taller ceilings elicit broader more creative thoughts Today ceilings are usually squat conduits of technology they have become the blind spot of modern architecture The twenty essays in this book look across cultures places and ceilings over time to discover their potential to uplift the human spirit Not just one building element among many the ceiling is a key to unlock the architectural imagination *Ceilings and Dreams* aims to correct this blind spot and encourages architects and designers researchers and students to look up through writings organized into three expansive categories reveries suspensions and inversions The contributors contemplate the architecture of levity and the potential of the ceiling once again as a place for dreaming

Portico , 1998 **Classic Modern** Deborah Dietsch, 2000

There is no hotter style today than the cooler than cool work of modern designers and architects from the 1940s and 50s. Endlessly inventive and eminently livable mid century modernism has an optimism and confidence born of postwar abundance and a spirited elegance that appeals powerfully fifty years later. In CLASSIC MODERN design expert Deborah Dietsch introduces readers to the basic tenets of modern design and explains how the simple yet inspired forms typical of this style were so readily disseminated into mainstream American culture. Filled throughout with enticing examples of mid century pieces from such timeless designers as Charles and Ray Eames, Eero Saarinen, Arne Jacobsen and George Nelson, this beautiful book recaptures the excitement of the period's brilliant designs. **Architecture and Nature** Sarah Bonnemaison, Christine Macy, 2003-09-02 Narrated, painted and filmed American landscapes have been central to the construction of a national identity. This book explores how such rhetorical landscapes have also been designed into the built environment of architecture. Minnesota Treasures Denis Gardner, 2004 Extended essays and four color photos highlight 75 buildings and sites on Minnesota's National Register of Historic Places from the grand and polished to the simple and unadorned. **Design & Applied Arts Index**, 2000 **AIA Guide to the Minneapolis Lake District** Larry Millett, 2009 Thoroughly researched and meticulously written, this guidebook features more than 250 architectural wonders of wide ranging styles in one of the loveliest neighborhoods in the Twin Cities. **Architecture**, 2005 Glamour San Francisco Museum of Modern Art, Phil Patton, Virginia Postrel, San Francisco Museum of Art, Valerie Steele, 2004-01-01 This catalogue revises our understanding of glamour in the fields of fashion, industrial design and architecture. Tracing glamour's trajectory from Hollywood's golden age to its present day connotations of affluence, this illustrated volume presents an array of postwar couture, jewelry, automobile, furniture and built and unbuilt architecture, all of which share an affinity for richly decorative patterning, complex layering and sumptuous materials. Frank Lloyd Wright in New York Jane King Hession, Debra Pickrel, 2007 Frank Lloyd Wright in New York: The Plaza Years 1954-1959 examines the momentous five year period when one of the world's greatest architects and one of the world's greatest cities coexisted. Authors Jane Hession and Debra Prickel bring each of these unequalled characters to life, exploring the fascinating contradiction between Wright's often voiced disdain of New York and his pride and pleasure of living in one of the city's greatest landmarks, the Plaza Hotel. From his suite on Taliesin III as it became known, Wright supervised construction of the Guggenheim, sparred with the New York press and received many famous visitors such as Marilyn Monroe and Arthur Miller. Home Michael Carroll, a renowned astronomical and paleo artist for more than twenty years, has done work for NASA and the Jet Propulsion Laboratory. His art has appeared in many magazines including Time, National Geographic, Sky, and another is resting at the bottom of the Atlantic aboard Russia's ill-fated Mars 96 spacecraft. **AIA Guide to the Twin Cities** Larry Millett, 2007 Get ready to discover the great architectural mecca that is Minneapolis and St. Paul.
