Salinger to the Zagat Guide Helen Vendler to Isaac Bashevis Singer And a marriage proposal to Rosanne Cash Forcefully reported brilliantly opinionated and elegantly phrased *The Secret Parts of Fortune* will endure as a vital record of American culture from 1970 to the present *T. P.'s Weekly* Thomas Power O'Connor, Holbrook Jackson, 1912 [Conversations About Illness](#) Wayne A. Beach, 2012-12-06 The grandmother granddaughter conversation examined in this book makes explicit what the detailed study of interaction reveals about two social problems bulimia and grandparent caregiving For the first time systematic attention is given to interactional activities through which family members display ordinary yet contradictory concerns about health and illness a grandmother s who is also a registered nurse attempts to initiate confront and remedy her granddaughter s lack of responsibility in admitting bulimic problems and committing to professional medical assistance a granddaughter s methods for avoiding ownership of the alleged bulimic problems by discounting the legitimacy of her grandmother s expressed concerns Through analysis of a single audio recorded and transcribed conversation Wayne Beach reveals the altogether pervasive and often troubled talk surrounding family medical predicaments From a careful review of extant theories that seek to explain eating disorders and grandparent caregiving it becomes clear that an overreliance on self report data has promoted underspecified understandings of social contexts conceptualizations void of real time practices and interactional consequences mirroring how families manage their daily affairs and understandings regarding health and illness In contrast this volume draws attention to family members embodied interactional activities Here it is seen for example how methods for expressing concern and caring by individuals may nevertheless eventuate in interactional troubles and problems between family members The analysis reveals that while displays of basic concerns for others health and well being are routine occurrences between family members in home environments and of course across friendship and various support networks even the delicate and well intended management of such occasions guarantees neither agreement on the nature of the alleged problems nor consequently a commitment to seek professional help as a means of remedying a medical condition In such cases the very existence of an illness is itself a matter of some contention to be interactionally worked out And it is perhaps both predictable and symptomatic that those explicitly denying or as with the granddaughter indirectly failing to admit that problematic health behaviors exist also somehow let it be made known that far too much attention is being given to possibilities and consequences of illness in the first instance Implications of this investigation extend well beyond bulimia and grandparent caregiving to a vast array of casual and institutional involvements between family members friends and bureaucratic representatives such as those involved in long term caregiving dealing with cancer and Alzheimer s disease or conducting psychiatric interviews and HIV AIDS counseling sessions Findings regarding the interactionally organized nature of talk about bulimia as well as the problematic nature of caregiving will be of value to researchers focusing on language and social interaction health practitioners and families alike This volume includes the full transcript of the conversation in the case study A copy of the audio recording is available for classroom adoption and or personal purchase by
