monde que nous apprenons connaître au travers de notre système perceptif depuis notre enfance ce monde nous devient tellement familier que nous en oublions de nous interroger sur sa nature et sa réalité Nous acceptons certainement l'existence des atomes composés d'un noyau entouré d'un nuage électronique et pourtant nous les modélisons par des objets mathématiques nous sommes persuadés que tout ce que nous voyons obéit des lois des règles immuables règles déterminées par l'existence propre de chacun des objets qui composent notre monde sans nous interroger sur la réalité de ces lois et le lien de nature

entre ces objets Nous percevons l'espace nous ne savons presque rien de lui nous ne savons pas s'il est de dimension infinie mais nous pensons pouvoir affirmer sa réalité Certains objets physiques ne sont ils donc pas ce qu'ils paraissent être Sont ils réels Sont ils distincts les uns des autres Quels sont les illusions et les réalités de notre univers et des êtres vivants qui l'habitent

Pouvons nous étudier ce monde mentalement par le mental ou devrions nous le considérer comme un tout unique et indissociable

La matrice de l'âme : Le siège des antennes psychiques. Tome IX. La Société Archaique à l'œuvre dans la Civilisation horizontale. -Le déclin de la métaphysique par l'auto-ignorance de l'homme. Sekou Sanogo,2014-09-30T00:00:00Z

Dieu est il mort Non Dans l'évangile de saint Matthieu le Christ a donné une prière qui répond parfaitement aux besoins de l'Humanité Pour bien comprendre la signification de cette prière il est nécessaire de connaître la constitution actuelle des êtres humains C'est en cela qu'il faut rappeler que l'homme est un Esprit triple doté d'un Ego impersonnel et intra cosmique au moyen duquel il apprend gouverner un corps triple son Identité divine Alors il devient naturel de comprendre que cela que l'on a raffiné de diverses manières dans le concept de Dieu n'est rien d'autre que la Vie elle-même une myriade de formes Vie tu es pour l'être la santé l'activité la force tu es pour moi l'aliment nourricier l'afflux divin le guide souverain tu es pour l'esprit l'étincelle divine qui le rend conscient de sa sublimité tu es le courant qui le relie Dieu et qui lui transmet Ses ordres et Ses messages Vie tu es aussi l'Esprit absolu qui descend dans toute manifestation perceptible nos sens Vie tu es l'eau le feu l'air la lumière tu es tout ce qui existe tout ce qui devient tout ce qui meurt tu es le Souffle de Dieu Son soupir et Son sourire n'importe il y a Comment se fait il que l'amour humain reste si impuissant larvé et lov malgré le rayonnement réfléchissant de l'Amour

Traité de la matière

Libero Zuppiroli,2015-07-02 La matière accompagne l'homme dans toutes ses activités Il sait l'extraire la transformer ou en faire la synthèse mais aussi l'imaginer la révéler même au travers de pratiques comme l'alchimie ou les nanosciences Il en a fait des matériaux utilisables dans toutes ses constructions réelles ou qui portent son monde virtuel comme le silicium ultra pur des puces qu'il fabrique l'échelle du nanomètre les cristaux liquides des écrans le cuivre des connexions électriques ou les matières plastiques des boîtiers et emballages Ce traité est le guide de dévoiler les secrets de la matière dans ses relations avec l'homme et de interroger de manière critique ses utilisations La première partie destine un large public de curieux interroge la créativité en sciences de la matière Comment contrôler les propriétés exceptionnelles de chaque type de matériau quelle échelle opérer celle macroscopique de notre quotidien celle microscopique des atomes ou encore aux échelles intermédiaires de la microstructure Ce texte s'accompagne des contributions d'artistes s'exprimant par des mandales de Gisèle Rime l'exploration du chaos de Catherine Bolle ou les 120 photographies originales de Christiane Grimm La seconde partie plus spécialisée rappelle que la cohésion des matériaux relève de la mécanique quantique et que leurs propriétés sont liées entre autres la théorie statistique des milieux ou la théorie des dislocations Un excellent ouvrage d'une grande clarté qui se présente aussi comme un livre d'art par la qualité des images du papier et de l'impression Pour La Science Original attrayant inspiré et sortant résolument des sentiers battus

La Croix

Lumières Alain Blanchard,Pierre

Léna,1990-01-01T00:00:00+01:00 Ce manuel propose une vision moderne de cette discipline traditionnelle qu'est l'optique pour en renouveler l'enseignement en soulignant l'importance des technologies de la lumière dans le monde contemporain et la vision fibres optiques lasers holographie etc Destin principalement aux étudiants de premier cycle et des classes préparatoires il constituera également une référence précieuse en licence et dans les écoles d'ingénieurs Les auteurs étudient la démarche du physicien lors des approches successives du phénomène de lumière modélisée par la mécanique ondulatoire du photon et voquent la synthèse finale de l'électrodynamique quantique Des applications technologiques variées sont présentées à l'appui des propriétés de la lumière Cet ouvrage abondamment illustré et proposant de nombreux exercices et expériences apporte la preuve de la passionnante modernité de l'étude de la lumière

Une autre vision de ce qui est Patrice Delon,2022-08-12T00:00:00Z Étudier la physique ou toute autre science ce n'est pas apprendre à aligner des pages de calculs mathématiques sans faire d'erreurs C'est d'abord être en permanence à l'écoute de notre monde de la nature dans laquelle nous sommes plongés c'est aussi interagir avec elle afin d'être capable d'en composer l'aide d'images mentales une représentation la plus compréhensible et acceptable par notre logique causale résultant des expériences vécues par notre système perceptif et de l'apprentissage que nous avons reçu des autres C'est également être capable d'imaginer des modèles de représentation d'abord par le seul pouvoir de notre pensée et seulement dans un second temps dans la proposition d'un cadre mathématique Ainsi une représentation du monde correspondra aux caractéristiques sociétales d'une époque donnée nous n'avons pas la même approche qu'au siècle dernier et sommes très éloignés de la pensée de l'Antiquité sur ce point Nos successeurs auront probablement un sourire en nous lisant c'est dans l'ordre des choses
