

BRIGHT FUTURES HANDOUT ► PARENT

9 MONTH VISIT

Here are some suggestions from Bright Futures experts that may be of value to your family.

✓ HOW YOUR FAMILY IS DOING

- If you feel unsafe in your home or have been hurt by someone, let us know. Hotlines and community agencies can also provide confidential help.
- Keep in touch with friends and family.
- Invite friends over or join a parent group.
- Take time for yourself and with your partner.

✓ YOUR CHANGING AND DEVELOPING BABY

- Keep daily routines for your baby.
- Let your baby explore inside and outside the home. Be with her to keep her safe and feeling secure.
- Be realistic about her abilities at this age.
- Recognize that your baby is eager to interact with other people but will also be anxious when separated from you. Crying when you leave is normal. Stay calm.
- Support your baby's learning by giving her baby dolls, toys that roll, blocks, and containers to play with.
- Help your baby when she needs it.
- Talk, sing, and read daily.
- Don't allow your baby to watch TV or use computers, tablets, or smartphones.
- Consider making a family media plan. It helps you make rules for media use and balance screen time with other activities, including exercise.

✓ DISCIPLINE

- Tell your baby in a nice way what to do ("Time to eat"), rather than what not to do.
- Be consistent.
- Use distraction at this age. Sometimes you can change what your baby is doing by offering something else such as a favorite toy.
- Do things the way you want your baby to do them—you are your baby's role model.
- Use "No!" only when your baby is going to get hurt or hurt others.

✓ FEEDING YOUR BABY

- Be patient with your baby as he learns to eat without help.
- Know that messy eating is normal.
- Emphasize healthy foods for your baby. Give him 3 meals and 2 to 3 snacks each day.
- Start giving more table foods. No foods need to be withheld except for raw honey and large chunks that can cause choking.
- Vary the thickness and lumpiness of your baby's food.
- Don't give your baby soft drinks, tea, coffee, and flavored drinks.
- Avoid feeding your baby too much. Let him decide when he is full and wants to stop eating.
- Keep trying new foods. Babies may say no to a food 10 to 15 times before they try it.
- Help your baby learn to use a cup.
- Continue to breastfeed as long as you can and your baby wishes. Talk with us if you have concerns about weaning.
- Continue to offer breast milk or iron-fortified formula until 1 year of age. Don't switch to cow's milk until then.

attempt to do this monumental task by freeing up more land to grow food crops so had in a Speech given many millions of people eight years to move from their homes to make use of their land And now with the clock running down those years this story tells of five people having all chosen to move to one small area of an already overcrowded Capitol City London now needing to live their lives in a vastly different society from the one they had previously known so had needed to quickly come to terms and adapt to these changes Having been either involved with romance mystery depression murder vengeance hatred and violence they would all have surprising tales to tell

Artificial Intelligence for a Better Future

Bernd Carsten Stahl, 2021-03-17 This open access book proposes a novel approach to Artificial Intelligence AI ethics AI offers many advantages better and faster medical diagnoses improved business processes and efficiency and the automation of boring work But undesirable and ethically problematic consequences are possible too biases and discrimination breaches of privacy and security and societal distortions such as unemployment economic exploitation and weakened democratic processes There is even a prospect ultimately of super intelligent machines replacing humans The key question then is how can we benefit from AI while addressing its ethical problems This book presents an innovative answer to the question by presenting a different perspective on AI and its ethical consequences Instead of looking at individual AI techniques applications or ethical issues we can understand AI as a system of ecosystems consisting of numerous interdependent technologies applications and stakeholders Developing this idea the book explores how AI ecosystems can be shaped to foster human flourishing Drawing on rich empirical insights and detailed conceptual analysis it suggests practical measures to ensure that AI is used to make the world a better place

Palliative Care for Chronic Cancer Patients in the Community

Michael Silberman, 2020-10-29 The new global cancer data suggests that the global burden has risen to 18.1 million new cases per year and 9.6 million cancer deaths per year A number of factors appear to be driving this increase in particular a growing and aging global population and an increase of exposure to cancer risk factors linked to social and economic development For rapidly growing economies the data suggests a shift from poverty or infection related cancers to those associated with lifestyles more typical in industrialized countries There is still large geographical diversity in cancer occurrence and variations in the magnitude and profile of the disease between and within world regions There are specific types of cancer that dominate globally lung female breast and colorectal cancer and the regional variations in common cancer types signal the extent to which societal economic and lifestyle changes interplay to differentially impact on the profile of this most complex group of diseases Unfortunately despite advances in cancer care a significant proportion of patients at home experience sub optimal outcomes Barriers to successful treatment outcomes include but are not limited to access to oncologists in the primary health centers non adherence lack of experienced oncology and palliative care nurses in the community inadequate monitoring and the lack of training of family and pediatric physicians Telemedicine approaches including telephone triage education telemonitoring teleconsultation and status tracking through mobile applications have

shown promise in further improving outcomes in particular for chronic cancer patients following their hospitalization Lessons can be learned from existing hospices in North America the United Kingdom Australia Centers of Excellence in African Uganda and modern community services in India Kerala An important goal of this book is to describe and encourage professionals to develop new community programs in palliative care which include training and empowering physicians and nurses in the community on the principles of palliative care The Middle East Cancer Consortium MECC together with the American Society of Clinical Oncology ASCO and the American Oncology Nursing Society ONS have conducted multiple courses ranging from basic palliative care to more specialized training in palliative care for multiple nationalities in Europe Asia and Africa Our experience clearly indicates that to promote such activities one needs strong leadership and confirmed political will to support the endeavor The new book will emphasize the importance of having a core of multiple stakeholders including community leaders government NGOs and media to be actively involved in advocating for the cause and generating public awareness This text will provide the reader with a comprehensive understanding of the outside of the hospital treatment of cancer patients by medical paramedical and volunteer personnel In doing so this text will encourage the creation of new palliative care services improving upon the existing ones and stimulate further research in this field Part 1 of the text will begin with an overview of the current state of affairs of services provided to cancer patients while being cared for by primary health centers It will also review the current literature regarding medical and psychological based therapy options in the community for cancer patients at different stages of their disease Part 2 will address the unique role of the community nurse within the framework of the multidisciplinary team treating the patient in the attempt to provide optimal evaluation and care in very challenging situations such as with terminal patients Part 3 will provide insightful models of this new discipline and serve as a valuable resource for physicians nurses social workers and others involved in the care of cancer patients The book will take a multidisciplinary approach integrating clinical and environmental data for practical management to enhance the efficacy of treatment while relieving suffering Part 4 will also discuss the application of modern technological approaches to track symptoms quality of life diet mobility duration of sleep and medication use including pain killers in chronic cancer patients in the community Part 5 of the book will also be devoted to modes of developing a collaborative program between governmental and non governmental organization sectors This includes volunteer workers in close collaboration with medical professionals for providing emotional and spiritual support nursing care nutritional support and empowering family caregivers Such a model makes palliative care in the community a people s movement thus transferring part of the responsibility and ownership to the community
