Staging Indigenous Heritage Yunci Cai,2020-08-12 Staging Indigenous Heritage examines the cultural politics of four Indigenous cultural villages in Malaysia Demonstrating that such villages are often beset with the politics of brokerage and representation the book shows that this reinforces a culture of dependency on the brokers By critically examining the relationship between Indigenous tourism and development through the establishment of Indigenous cultural villages the book addresses the complexities of adopting the culture for development paradigm as a developmental strategy Demonstrating that the opportunities for self representation and self determination can become entwined with the politics of brokerage and the contradictory dualism of culture it becomes clear that this can both facilitate and compromise their intended outcomes Challenging the simplistic conceptualisation of Indigenous communities as harmonious and unified wholes the book shows how Indigenous cultures are actively forged struggled over and negotiated in contemporary Malaysia Confronting the largely positive rhetoric in current discourses on the benefits of community based cultural projects Staging Indigenous Heritage should be essential reading for academics and students in the fields of museum studies cultural heritage studies Indigenous studies development studies tourism anthropology and geography The book should also be of interest to museum and heritage professionals around the world

Male and Female in Developing South-East Asia Karim

Wazir Wazir,2021-03-10 This provocative book seeks to redress inaccuracies in Western perceptions of gender relations in

Southeast Asia by bringing to the fore the area's ethnic and cultural variance and showing how women and men explain the informal and psychological dimensions of relationships as vital in holding family neighbourhood and kinship ties together. Although there are differences between male and female perceptions of sex roles in society, women perceive their situation as disadvantaged rather than less significant. Male and female interpretations of power and status tend to converge usually towards the understanding that the contributions of men and women are equally important in the formation of family and society.

Us, Relatives Nurit Bird-David, 2017-02-14 Anthropologists have long looked to forager-cultivator cultures for insights into human lifeways. But they have often not been attentive enough to local horizons of concern and to the enormous disparity in population size between these groups and other societies. *Us Relatives* explores how scalar blindness skews our understanding of these cultures and the debates they inspire. Drawing on her long-term research with a community of South Asian foragers, Nurit Bird-David provides a scale-sensitive ethnography of these people as she encountered them in the late 1970s and reflects on the intellectual journey that led her to new understandings of their lifeways and horizons. She elaborates on indigenous modes of being many that have been eclipsed by scale-blind anthropology, which generally uses its large-scale conceptual language of persons, relations, and ethnic groups for even tiny communities. Through the idea of pluripresence, Bird-David reveals a mode of plural life that encompasses a diversity of humans and nonhumans through notions of kinship and shared life. She argues that this mode of belonging subverts the modern ontological touchstone of imagined communities rooted not in sameness among dispersed strangers but in intimacy among relatives of infinite diversity.

Inside Cultures William Balée, 2021-08-17 This concise contemporary option for instructors of cultural anthropology breaks away from the traditional structure of introductory textbooks. Emphasizing the interaction between humans and their environment, the tension between human universals and cultural variation, and the impacts of colonialism on traditional cultures, *Inside Cultures* shows students how cultural anthropology can help us understand the complex globalized world around us. This third edition contains brand-new material on many subjects, including anthropological approaches to anti-racism, social movements in the Global North, and during 2020 includes findings in anthropological research regarding the COVID-19 pandemic and its relation to other recent global events and conditions. It updates the organization and presentation of cultural universals and cultural variations, presents updated and enhanced discussions of anthropological studies of humankind and the environment, with expanded analysis of industrial agriculture in the age of globalization, includes more illustrations and updates to existing illustrations, sidebars, and guideposts throughout. The volume is written in clear, supple prose that delights readers while informing on content of one of the important courses in a liberal arts education, one that effectively bridges humanities and the sciences.

Gackenbach,S. LaBarge,2012-12-06 A conscious mind in a sleeping brain the title of this book provides a vivid image of the phenomenon of lucid dreaming in which dreamers are consciously aware that they are dreaming while they seem to be soundly asleep Lucid dreamers could be said to be awake to their inner worlds while they are asleep to the external world Of the many questions that this singular phenomenon may raise two are foremost What is consciousness And what is sleep Although we cannot provide complete answers to either question here we can at least explain the sense in which we are using the two terms We say lucid dreamers are conscious because their subjective reports and behavior indicate that they are explicitly aware of the fact that they are asleep and dreaming in other words they are reflectively conscious of themselves We say lucid dreamers are asleep primarily because they are not in sensory contact with the external world and also because research shows physiological signs of what is conventionally considered REM sleep The evidence presented in this book preliminary as it is still ought to make it clear that lucid dreaming is an experiential and physiological reality Whether we should consider it a paradoxical form of sleep or a paradoxical form of waking or something else entirely it seems too early to tell *The to Z of Malaysia* Ooi Keat
