Mass Spectra And GC Data Of Steroids Androgens And Estrogens:

Mass Spectra and GC Data of Steroids Hugh L. J. Makin, David James Hamilton Trafford, Joanna Nolan, 1998 This is the most comprehensive collection of mass spectral data for steroids available today It contains some 2 500 newly measured EI mass spectra of androgens and estrogens and their derivatives trimethylsilyl ethers O methyloximes and acetates Each spectrum is accompanied by the structure systematic and trivial names retention index molecular formula molar mass CAS number and sample source of the steroid with all data obtained using the same mass spectrometer under identical chromatographic and mass spectrometric conditions Steroids are of considerable therapeutic importance and the collection will thus be of particular interest to the pharmaceutical industry as well as an invaluable data source for chemists and biochemists involved in drug development drug screening and clinical toxicology endocrinologists natural products chemists and mass spectroscopists *Spectral Data for Steroids* Michael Frenkel, K N Marsh, 1994-06-15 *Spectral Data for Steroids* provides a comprehensive compilation of spectral data for 211 steroids The compounds are arranged on the basis of their molecular structures **Steroid Analysis** Hugh L. J. Makin, D.B. Gower, B. Kirk, 2013-06-29 reviews of the first edition this is an excellent comprehensive book and can be highly recommended to those who want an up to date reference on steroid analysis Analyst *Cumulated Index Medicus*, 1968 **A Handbook of Derivatives for Mass Spectrometry** Vladimir Zaikin, John M. Halket, 2009 Chemical derivatisation of functional groups has proved popular since the beginning of organic mass spectrometry as a means to enhance the stability and volatility of the analytes as well as facilitating structure elucidation This book provides comprehensive information on the wide range of derivatisation methods Each chapter looks at a particular area of derivatisation and includes extensive references to the literature for further research where necessary There are nearly 1800 references which as well as full bibliographic information include chapter paper titles where appropriate and Digital Object Identifiers DOIs to allow easy retrieval of the online version of the referenced publication The emergence of atmospheric pressure ionisation and other soft ionisation techniques has not diminished the interest in such chemical techniques as witnessed by the many chemical tags used in quantitative proteomics Chapter 9 The last two chapters a substantial part of the book deal with derivatisation for use with soft ionisation of both small and large molecules Chapters Silylation Acylation Alkylation Arylation Cyclic derivatives Monofunctional compounds Polyfunctional compounds On line derivatisation degradation Soft ionisation small molecules Soft ionisation large molecules **Gas Chromatography of Steroids in Biological Fluids** Mortimer B. Lipsett, 2012-12-06 During the past decade we have witnessed a revolution in analytical methods The development of vapor phase chromatography for the separation and analysis of classes of substances ranging from metals and gases to a wide variety of organic materials has been one of the most exciting of these new techniques Gas liquid chromatography for the measurement of steroids is particularly significant for endocrinologists and reports during the past several years have demonstrated its usefulness Because of the growing interest in this method a

committee of the Endocrinology Study Section composed of Drs R M Dodson Seymour Lieberman Hilton A Salhanick and Ralph E Peterson felt that the time was propitious to hold this Workshop and it is on their behalf that I welcome you We hope to obtain enough data during these sessions so that those attending this conference and those who may read the proceedings will be able to make an informed judgement about the usefulness of gas liquid chromatography for the analysis of steroids in biological fluids Thus I hope that there will be adequate documentation of the reliability of the methods as well as a comparison of the advantages and disadvantages of this analytical method with other classical methods If we can do this this Workshop will provide a significant base of practical considerations about gas chromatographic analytic techniques I would like to thank Drs T F Gallagher H Wilson H Salhanick and L Engel for agreeing to serve as Chairmen of the sessions
