

## Introduction:

Legal Education hasn't undergone any fundamental change during the last 150 years. Except for the duration of the courses, and addition of some fundamental subjects, there has been minimal innovation in legal education scenario during all these years. Legal Education in India has remained mostly concentrated on developing legal professionals in a national context. Legal Education has more or less remained a theoretical study, with only minimal content of practical exposure. Experiential learning was given a back bench in actual practice, and many practical courses remain in paper rather than in content. National law school experiment in India which has to an extent revived the interest in legal education has remained elitist and out of reach for children from middle and lower income group.

Since the past few years the roles of lawyers have drastically changed in the society. In the changed scenario, the additional roles envisaged are that of policy planner, business advisor, negotiator among interest groups, expert in articulation and communication of ideas, mediator, lobbyist, law reformer, etc. These roles demand specialised knowledge and skills not ordinarily available in the existing profession. These roles have moved away from being localised and started moving beyond national boundaries. As a result a new genre of globalised legal professionals has evolved who while having a firm understanding of local legal scenario, was able to extend its principles to a global context.

## Current State of Indian Legal Education:

While a lot is currently being discussed about the state of legal education in India, with reports from National Knowledge Commission, Law Commission of India, Legal Education Committee of the Bar Council of India, University Grants Committee Special Committee on Legal Education, Expert Committee Appointed by Supreme Court and some state governments [5] it is necessary to draw a sketch of the existing legal education frame work in India.

Currently, law is being looked upon as a national subject. The content of law courses prescribed by the regulators is focused on the national laws rather than on the essential principles. As a result the vision of law students get often confined to national boundaries. On the other hand, the globalisation has made the distinction between various systems of law meaningless, and new avenues in international law, like international criminal law and International Space Law, has cut across national borders.

## The Origin of the Task Force

In 1987, at a conference "celebrat[ing] twenty years of effort and achievement since the Ford Foundation . . . set in motion the clinical education movement,"<sup>6</sup> Justice Rosalie Wahl of the Minnesota Supreme Court, the Chair of the ABA Section of Legal Education and Admissions to the Bar, asked those in attendance to "recommit themselves 'to certain basic principles,' including that of teaching students how to learn systematically from experience and simultaneously to educate them in a broader range of legal analysis and skills than have traditionally been taught."<sup>7</sup> She asked, "[h]ave we really tried to determine . . . what skills, what attitudes, what character traits, what qualities of mind are required of lawyers?"<sup>8</sup> In early 1989, Justice Wahl created the Task Force to answer these questions.<sup>9</sup> After collecting data, holding public hearings, and conducting extensive deliberations over a period of almost three years, the Task Force issued the Report in July 1992.

Robert MacCrate was an American lawyer who served as Counsel to New York Governor Nelson D. Rockefeller. He served as president of both the New York State

*Civil Justice, Privatization, and Democracy* Trevor C.W. Farrow, 2014-01-01 Privatization is occurring throughout the public justice system including courts tribunals and state sanctioned private dispute resolution regimes Driven by a widespread ethos of efficiency based civil justice reform privatization claims to decrease costs increase speed and improve access to the tools of justice But it may also lead to procedural unfairness power imbalances and the breakdown of our systems of democratic governance

Civil Justice Privatization and Democracy demonstrates the urgent need to publicize politicize debate and ultimately temper these moves towards privatized justice Written by Trevor C W Farrow a former litigation lawyer and current Chair of the Canadian Forum on Civil Justice Civil Justice Privatization and Democracy does more than just bear witness to the privatization initiatives that define how we think about and resolve almost all non criminal disputes It articulates the costs and benefits of these privatizing initiatives particularly their potential negative impacts on the way we regulate ourselves in modern democracies and it makes recommendations for future civil justice practice and reform Reforming Legal Education David M. Moss, Debra Moss Curtis, 2012-11-01 In today s volatile law school environment curriculum reform has emerged as a significant focus It is commonly understood that law schools effectively teach certain analytical skills but are less successful in other areas and often scramble to adapt to evolving aims This book demonstrates how law schools are successfully reforming their curriculum and lays the framework to show how all schools of law can engage in a continuous reform model that proactively shapes our profession It is expected that faculty and professional staff engaged in legal education will utilize this book as a primary resource to guide their respective reform efforts Each contributed chapter presents a case study of a data driven curriculum reform effort The initial chapters set the conceptual context for the book while the final chapter offers summative recommendations for considering legal education reform as derived from the earlier case study chapters This book adds significantly to the literature in legal education as we gain first hand insight into evidence based reform for the legal education community **Reaffirming Legal Ethics** Kieran Tranter, Francesca Bartlett, Lillian Corbin, Michael Robertson, Reid Mortensen, 2010-07-02 It has been over thirty years since the founding crises that birthed legal ethics as both a field of study and a discrete field of law In that time thinking about the ethical dimension of legal practice has taken several turns from justifications of zealous advocacy to questions of process and connections to specifically legal values to more recently consideration of legal conduct as part of a wider field of virtue Parallel to this dynamism of thought there has also been significant changes in how legal professions especially within those that possess a common law heritage have been regulated and the values and conceptions of legitimate conduct that has informed this regulation This volume represents an opportunity for a comprehensive review of legal ethics as an international movement Contributors include many of the key participants to the legal ethics field from the United States United Kingdom Canada Australia New Zealand and South Africa including David Luban and Deborah Rhode as well as many of the recognised emerging thinkers The theme of the book is taking stock of the last thirty years of legal ethics practice and scholarship and also a forum for new ideas and new thinking regarding the conduct of lawyers and the moral and social responsibility of the legal profession The contributions also consider the topic of dynamism Over the last decade significant developments in both the expectations of professional conduct and the regulation of the profession has been experienced in all jurisdictions which has seen traditional and once sacred conceptions of lawyering challenged and re evaluated The contributors also look at the

theme of affirmation Within an increasingly complex environment of change and dynamism this volume reaffirms that there is value within the field of legal ethics That is the project of reflecting on the unique ethical and conduct requirements of lawyering can not be submerged into a broader field of applied philosophy management or regulatory studies While this volume does not deny the opportunities that exist for interdisciplinary engagement with philosophy social science or politics it affirms legal ethics as a legitimate and highly relevant field of inquiry
