*Religion in the History of the Medieval West* John Van Engen, 2023-05-31 These ten essays by John Van Engen situate religion in the history of medieval Western Europe as an unavoidable presence in everyday life as a conceptual framework for social and political life as a force integral to its historical dynamics Four of the essays are bibliographical and retrospective in nature reviewing the field broadly but also pointing toward a more dialectical approach to understanding the interaction of religion and society in the European middle ages Other studies deal with large topics usually subsumed under the abstract term Christianization They grapple with learned sources as well as those associated with popular religion and show what can be gained from an imaginative use of all that lawyers and theologians said about religion in their society The essays finally look for the quality and dynamic of change even inventiveness released by religious action and conviction in medieval European society **Humanities** ,1970

lively and erudite history of horse and man for readers of *The Invention of Nature* and *The Soul of an Octopus* Horses and humans share an ancient profoundly complex relationship Once our most indispensable companions horses were for millennia essential in helping build our cities farms and industries But during the twentieth century in an increasingly mechanized society they began to disappear from human history In this esoteric and rich tribute award winning historian Ulrich Raulff chronicles the dramatic story of this most spectacular creature thoroughly examining how they've been muses and brothers in arms neglected and sacrificed in war yet memorialized in paintings sculpture and novels and ultimately marginalized on racetracks and in pony clubs *Elegiac and Absorbing Farewell to the Horse* paints a stunning panorama of a world shaped by hooves and the imprint left on humankind A beautiful and thoughtful exploration *Farewell to the Horse* is a grown up but also lyrical and creative history book and I very much enjoyed it James Rebanks author of the New York Times bestseller *The Shepherd's Life* Environment and Society Paul Robbins, John G. social advantage In an incisive historical analysis Jack Goody examines when and why Europe and Anglo America started to outstrip all other continents in socio economic growth Drawing on non Western examples of economic and technical progress Goody challenges assumptions about long term European supremacy of a cultural kind as was a feature of many theories current in social science He argues that the divergence came with the Industrial Revolution and that the earlier bourgeois revolution of the sixteenth century was but one among many Eurasia wide expressions of developing mercantile and manufacturing activity This original book casts new light on the history of capitalism industrialization and modernity and will be essential reading for all those interested in the great debate about the economic rise of the West Environment Glenn Adelson, James Engell, Kevin P. Van Anglen, Brent Ranalli, 2008-01-01 This major anthology is the first to apply a fully interdisciplinary approach to environmental studies A comprehensive guide to environmental literacy the book demonstrates how the sciences social sciences and humanities all contribute to understanding our interrelationships with the natural world Though not specialized Environment is a book that even specialists can learn from Ten innovative case studies climate shock species endangerment nuclear power biotechnology sustainable development deforestation environmental security globalization wilderness and the urban environment are followed by readings from specific disciplines These can be integrated with the case studies to shape individual interests and teaching strategies The volume presents an imaginative array of texts from scientific papers to poetry legal decisions to historical accounts personal essays to economic analysis Taken together these selections provide a balanced authoritative and up to date treatment of key issues in environmental studies **Divinanimality** Stephen D. Moore, 2014-09-15 A turn to the animal is underway in the humanities most obviously in such fields as philosophy literary studies cultural studies and religious studies One important catalyst for this development has been the remarkable body of animal theory issuing from such thinkers as Jacques Derrida and Donna Haraway What might the resulting interdisciplinary field commonly termed animality studies mean for theology biblical studies and other cognate disciplines Is it possible to move from animal theory to creaturely theology This volume is the first full length attempt to grapple centrally with these questions It attempts to triangulate philosophical and theoretical reflections on animality and humanity with theological reflections on divinity If the animal human distinction is being rethought and retheorized as never before then the animal human divine distinctions need to be rethought retheorized and retheologized along with it This is the task that the multidisciplinary team of theologians biblical scholars philosophers and historians assembled in this volume collectively undertakes They do so frequently with recourse to Derrida's animal philosophy and also with recourse to an eclectic range of other relevant thinkers such as Haraway Giorgio Agamben Emmanuel Levinas Gloria Anzaldua Helene Cixous A N Whitehead and Lynn White Jr The result is a volume that will be essential reading for religious studies audiences interested in ecological issues animality studies and posthumanism as well as for animality studies audiences interested in how constructions of the divine have informed constructions of the nonhuman animal through history
