Electrical Engineering - Volume I Kit Po Wong, 2009-11-30 Electricity is an integral part of life in modern society It is one form of energy and can be transported and converted into other forms Throughout the world electricity is used to light homes and streets cook meals power computers and run industrial plants Electricity is so integrated with our way of living that electricity consumption per person is used to measure the levels of economic development of countries Any disruptions to electricity supply or blackouts will lead to huge financial loss and threats to lives well being in the community Electrical engineering is the profession and study of generating transmitting controlling and using electrical energy It offers a wide range of exciting opportunities to those looking for a fulfilling challenging and professional career Electrical engineers are the designers of modern electrical machinery power systems transportation and communication systems They work in various sectors of the community as well including the building industry the manufacturing industry the construction industry consultancy services technology development education services as well as government In these volumes the essential aspects and fundamentals of electrical engineering are presented In depth knowledge of various areas of electrical engineering are disseminated by learned scholars in their fields It is hoped that readers will find all the writings comprehensive informative and interesting It is further hoped that these fundamentals will assist the readers to study advanced topics in electrical engineering If the readers are electrical engineers themselves it is hoped that the articles will broaden their horizon in electrical engineering and provide them with the necessary knowledge to further their profession as electrical engineers

Graphics Recognition. Recent Advances and Perspectives Josep Lladós, Young-Bin Kwon, 2004-09-23 1

This book contains refereed and improved papers presented at the 5th International Workshop on Graphics Recognition GREC 2003 GREC 2003 was held in the Computer Vision Center in Barcelona Spain during July 30 31 2003

The GREC workshop is the main activity of the IAPR TC10 the Technical 2 Committee on Graphics Recognition Edited volumes from the previous two shops in the series are available as Lecture Notes in Computer Science LNCS Volume 1072 GREC 1995 at Penn State University USA LNCS Volume 1389 GREC 1997 in Nancy France LNCS Volume 1941 GREC 1999 in Jaipur India and LNCS Volume 2390 GREC 2001 in Kingston Canada Graphics recognition is a particular field in the domain of document analysis that combines pattern recognition and image processing techniques for the analysis of any kind of graphical information in documents either from paper or electronic formats Topics of interest for the graphics recognition community are vectorization symbol recognition analysis of graphic documents with a grammatic notation like electrical diagrams architectural plans engineering drawings musical scores maps etc graphics based information retrieval performance evaluation in graphics recognition and systems for graphics recognition In addition to the classic objectives in recent years graphics recognition has faced up to new and promising perspectives some of them in conjunction with other scientific communities Examples of that are sketchy interfaces and on line graphics recognition in the framework of human computer interaction or query by graphic content for retrieval and browsing in large format graphic documents digital libraries and Web applications Thus the combination of classic challenges with new research interests gives the graphics recognition field an active scientific community with a promising future

Image Analysis And Recognition Mohamed Kamel, Aurélio Campilho, 2005-09-15 ICIAR 2005 the International Conference on Image Analysis and Recognition was the second ICIAR conference and was held in Toronto Canada ICIAR is organized annually and alternates between Europe and North America ICIAR 2004 was held in Porto Portugal The idea of organizing these conferences came as a result of discussion between researchers in Portugal and Canada to encourage collaboration and exchange mainly between these two countries but also with the open participation of other countries addressing recent advances in theory methodology and applications The response to the call for papers for ICIAR 2005 was encouraging From 295 full papers submitted 153 were finally accepted 80 oral presentations and 73 posters The review process was carried out by the Program Committee members and other reviewers all are experts in various image analysis and recognition areas Each paper was reviewed by at least two reviewers and also checked by the conference co chairs The high quality of the papers in these proceedings is attributed first to the authors and second to the quality of the reviews provided by the experts We would like to thank the authors for responding to our call and we wholeheartedly thank the reviewers for their excellent work and for their timely response It is this collective effort that resulted in the strong conference program and high quality proceedings in your hands
