Mathematische Methoden in der historischen Linguistik Mikhail Viktorovich Arapov, Maisa Markovna Khert's, 1983

Sequence Comparison in Historical Linguistics Mattis List, 2014-07-21 The comparison of sound sequences words morphemes constitutes the core of many techniques and methods in historical linguistics With the help of these techniques corresponding sounds can be determined historically related words can be identified and the history of languages can be uncovered So far the application of traditional techniques for sequence comparison is very tedious and time consuming since scholars have to apply them manually without computational support In this study algorithms from bioinformatics are used to develop computational methods for sequence comparison in historical linguistics The new methods automatize several steps of the traditional comparative method and can thus help to ease the painstaking work of language comparison

Quantification in Linguistics and Text Analysis Emmerich Kelih, Ján Mačutek, Michaela Koščová, 2025-05-06 This volume contains the most important theoretical and methodological works of Gabriel Altmann 1931 2019 He is the founder of a specific school of quantitative linguistics which focuses on the statistical analysis and interrelationship of linguistic features and characteristics His approach concentrates on the construction of a general theory of linguistics The theory is based on the relevance of linguistic laws Zipf's Menzerath's and Piotrowski's and concepts of language as a self regulating system In contrast to approaches where quantitative methods are used as standard methodological tools Altmann favours a holistic and epistemological view of problems of quantification of linguistic and textual phenomena
