Small Cetacean Conservation: Current Challenges and Opportunities Randall William Davis, Jeremy Kiszka, Rob Harcourt, Mark Meekan, Lars Bejder, Diego Horacio Rodriguez, Karen A. Stockin, 2022-09-23 **Syllabus**, 1995 Heart Rate Variability Analysis with the R package RHRV Constantino Antonio García Martínez, Abraham Otero Quintana, Xosé A. Vila, María José Lado Touriño, Leandro Rodríguez-Liñares, Jesús María Rodríguez Presedo, Arturo José Méndez Penín, 2024-09-26 This book introduces readers to the fundamental concepts of Heart Rate Variability HRV and its most important analysis algorithms using a hands on approach based on the open source RHRV software HRV refers to the variation over time of the intervals between consecutive heartbeats Despite its apparent simplicity HRV is one of the most important markers of autonomic nervous system activity and it has been recognized as a useful predictor of several pathologies The book discusses all the basic HRV topics including the physiological contributions to HRV clinical applications HRV data acquisition HRV data manipulation and HRV analysis using time domain frequency domain time frequency nonlinear and fractal techniques Detailed examples based on real data sets are provided throughout the book to illustrate the algorithms and discuss the physiological implications of the results Offering a comprehensive guide to analyzing beat information with RHRV the book is intended for masters and Ph D students in various disciplines such as biomedical engineering human and veterinary medicine biology and pharmacy as well as researchers conducting heart rate variability analyses on both human and animal data The second edition of the book has been updated to RHRV version 5 0 This version introduces a functionality to perform heart rate variability analysis on entire populations This functionality automates and streamlines both the calculation of HRV indices in the time frequency and nonlinear domains as well as the subsequent statistical analysis

Reinventing Discovery Michael Nielsen, 2012 A pioneer of quantum computing describes how the Internet and powerful new online tools are democratising and accelerating scientific discovery Applied Interval Analysis Luc Jaulin, Michel Kieffer, Olivier Didrit, Eric Walter, 2012-12-06 At the core of many engineering problems is the solution of sets of equations and inequalities and the optimization of cost functions Unfortunately except in special cases such as when a set of equations is linear in its unknowns or when a convex cost function has to be minimized under convex constraints the results obtained by conventional numerical methods are only local and cannot be guaranteed This means for example that the actual global minimum of a cost function may not be reached or that some global minimizers of this cost function may escape detection By contrast interval analysis makes it possible to obtain guaranteed approximations of the set of all the actual solutions of the problem being considered This together with the lack of books presenting interval techniques in such a way that they could become part of any engineering numerical tool kit motivated the writing of this book The adventure started in 1991 with the preparation by Luc Jaulin of his PhD thesis under Eric Walter's supervision It continued with their joint supervision of Olivier Didrit's and Michel Kieffer's PhD theses More than two years ago when we presented our book project

to Springer we naively thought that redaction would be a simple matter given what had already been achieved

Marine Ecosystem Assessment for the Southern Ocean: Meeting the Challenge for Conserving Earth Ecosystems in the Long Term Monica M. C. Muelbert, 2024-12-24 National and international agencies need assessments of change in ecosystems and their drivers in order to sustain natural systems to maintain the delivery of services and to meet the challenge for conserving Earth ecosystems in the long term In marine systems change may arise directly from human activities e g fisheries indirectly from local or global activities cascading effects through food webs from fisheries or changing environments from climate change and or ocean acidification or from naturally varying processes A particular challenge for managers is to identify how dangerous future climate change will be for ecosystems and their services and whether mitigation or adaptation may be needed in advance in order to achieve the conservation requirements For regions of international attention particularly those that have the attention of many management or policy oriented bodies a standardized process is needed to harmonize the scientific information on the status and trends in ecosystems used by the different bodies That process also needs to ensure the information is available in a timely manner For example assessments of change in habitats species and or food webs in the Southern Ocean are currently compiled separately for at least ten different international organizations or processes A Marine Ecosystem Assessment for the Southern Ocean MEASO aims to harmonize that information for policy makers This assessment began with an international conference in April 2018 <http://www.measo2018.aq> where it was agreed to undertake the first MEASO over 2018 2019 with the view to provide the outcomes to relevant bodies such as the Scientific Committee for the Conservation of Antarctic Marine Living Resources soon after
