Matrix Analysis Of Interregional Population Growth And Distribution:

Matrix Analysis of Interregional Population Growth and Distribution Andrei Rogers,1968 *Matrix Analysis of Interregional Population Growth and Distribution* , **Regional Demographic Development** John Hobcraft,Philip Rees,2017-09-05 Originally published in 1979 This volume brings together the work of distinguished demographers geographers statisticians and policy makers who look in detail at various mechanisms by which regional population structures develop The introduction deals with a synthesis of the area covered in the book and this is followed by the four major sections of population history fertility migration and population projections The book provides the reader with a comprehensive and unique picture of regional populations and demographic development viewed from a variety of temporal and methodological perspectives and will be of considerable value to all those connected with population studies and regional studies *Social Issues in Regional Policy and Planning* Antoni Kuklinski,2011-06-01 No detailed description available for *Social Issues in Regional Policy and Planning* **Unlocking Regional Innovation and Entrepreneurship** Irène Bernhard,Urban Gråsjö,Charlie Karlsson,2021-06-25 Illuminating and timely this book explores several theoretical and empirical issues related to the potential for increasing capacities for innovation knowledge and entrepreneurship It highlights the current academic and political consensus that calls for policy interventions targeted towards more balanced inclusive and regionally cohesive growth **Advanced Techniques of Population Analysis** S.S. Halli,K.V. Rao,2013-06-29 Although I feel honored to write a foreword for this important book it is a task that I approach with some trepidation The topics covered in the book summarize the current state of the art in technical demography However my knowledge and expertise with respect to technical demography are limited to the most fundamental and intermediate level methods hence critical commentary on the contents of this volume is beyond my scope in this fore word Since I have some understanding of the logic and substantive aspects of the methods rather than the complicated mathematics used in describing them my comments will necessarily be restricted to the book s general organization and content To date most texts published on technical demography have been limited to traditional demographic methods sources and limitations of data life table construction and applications standardization techniques various methods for preparing population estimates and forecasts etc However population specialists have in recent years been developing and successfully applying a variety of sophisticated techniques not covered in the more standard introductory texts In addition many traditional methods that are unique to the demographic discipline have been improved and extended **Land Use-Transport Interaction Models** Rubén Cordera,Ángel Ibeas,Luigi dell'Olio,Borja Alonso,2017-11-15 Transport and the spatial location of population and activities have been important themes of study in engineering social sciences and urban and regional planning for many decades However an integrated approach to the modelling of transport and land use has been rarely made and common practice has been to model both phenomena independently This book presents an introduction to the modelling of land use and transport

interaction LUTI with a theoretical basis and a presentation of the broad state of the art It also sets out the steps for building an operational LUTI model to provide a concrete application The authors bring extensive experience in this cross disciplinary field primarily for an academic audience and for professionals seeking a thorough introduction *The Dynamics of Cities* Dimitrios Dendrinos,2002-09-26 Dimitrios Dendrinos an expert in the application of non linear dynamics and chaos theory to the subject of urban and regional dynamics focuses here on fundamental issues in population growth and decline He approaches the topic of urban growth and decline within a global system perspective viewing the rise and fall of cities industries and nations as the result of global interdependencies which lead to unstable dynamics and widespread dualisms Professor Dendrinos provides valuable insights into the evolution of human settlements and considers the possible futures open to the giant cities of the world **People on the Move** Leszek Kosiński,R.M. Prothero,2023-08-18 Originally published in 1975 this volume examines conceptual and theoretical aspects of the study of internal migration both in chapters dealing specifically with theory and data and in case studies The book discusses the question of who migrates and why and what are the patterns of flow and direction of movement The consequences of migration are analysed Migration is one of the most difficult components of population change to conceptualize and measure and this book considers a wide range of aspects of migration and the problems connected with it Spatial Diffusion Andrew David Cliff,1981-04-23 An exploration of the geography by which measles has repeatedly passed through a series of communities in Iceland during the 20th century Demonstrates the general principles which underlie person to person spatial diffusion processes
