Beauchamp, 1993 A collection of original essays by leading moral philosophers written specifically for students with no prior background in ethics Focusing on the major ethical issues of the day the essays cover problems such as abortion euthanasia capital punishment famine war suicide the environment and animal rights Ethical Theory Russ Shafer-Landau, 2007-07-30 In presenting this reader on ethical theory Shafer Landau philosophy U of Wisconsin has made sure to cover the standard topics of the day consequentialism deontology contractarianism and virtue ethics but has also sought to include areas that are less common in sections on moral standing moral responsibility moral knowledge and works that question the very possibility of systematic ethics He also includes a section that discusses ethics and religion and another that examines prima facie duties and particularism Rather than include critics views following the various theoretical presentations he has instead decided to include more works of allied thinkers in order to provide readers with a more nuanced view of the particular view in question Selections from classic writers such as Aristotle Thomas Hobbes Immanuel Kant and Plato are accompanied by more contemporary writings Annotation 2007 Book News Inc Portland OR booknews.com Distributed by Syndetic Solutions LLC **The Case for Animal Rights** Tom Regan, 2004-09-17 Blending straightforward debate as well as moral concerns this scientific defence of animal rights has a new and fully considered preface in which the author responds to critics of his work **Matters of Life and Death** Tom Regan, 1980

Environmental Risk, Environmental Values, And Political Choices John Martin Gillroy, 2019-03-07 Public decisions on environmental risk have traditionally been weighed in terms of the principle of efficiency and its methodologies such as cost benefit analysis These original essays argue for moving beyond the market paradigm toward making policy that incorporates environmental values Morality and the Human Goods Alfonso Gomez-Lobo, 2002 A concise and accessible introduction to natural law ethics this book introduces readers to the mainstream tradition of Western moral philosophy Building on philosophers from Plato through Aquinas to John Finnis Alfonso G mez Lobo links morality to the protection of basic human goods life family friendship work and play the experience of beauty knowledge and integrity elements essential to a flourishing happy human life G mez Lobo begins with a discussion of Plato's Crito as an introduction to the practice of moral philosophy showing that it requires that its participants treat each other as equals and offer rational arguments to persuade each other He then puts forth a general principle for practical rationality one should pursue what is good and avoid what is bad The human goods form the basis for moral norms that provide a standard by which actions can be evaluated do they support or harm the human goods He argues that moral norms should be understood as a system of rules whose rationale is the protection and enhancement of human goods A moral norm that does not enjoin the preservation or enhancement of a specific good is unjustifiable Shifting to a case study approach G mez Lobo applies these principles to a discussion of abortion and euthanasia The book ends with a brief treatment of rival positions including utilitarianism and libertarianism

and of conscience as our ultimate moral guide Written as an introductory text for students of ethics and natural law *Morality and the Human Goods* makes arguments consistent with Catholic teaching but is not based on theological considerations The work falls squarely within the field of philosophical ethics and will be of interest to readers of any background

Consequentialism and Environmental Ethics Avram Hiller, Ramona Ilea, Leonard Kahn, 2013-12-04 This volume works to connect issues in environmental ethics with the best work in contemporary normative theory Environmental issues challenge contemporary ethical theorists to account for topics that traditional ethical theories do not address to any significant extent This book articulates and evaluates consequentialist responses to that challenge Contributors provide a thorough and well rounded analysis of the benefits and limitations of the consequentialist perspective in addressing environmental issues In particular the contributors use consequentialist theory to address central questions in environmental ethics such as questions about what kinds of things have value about decision making in light of the long term intergenerational nature of environmental issues and about the role that a state s being natural should play in ethical deliberation

Animal Ethics and Theology Daniel Miller, 2013-03-01 In this book Daniel K Miller articulates a new vision of human and animal relationships based on the foundational love ethic within Christianity Framed around Jesus parable of the Good Samaritan *Animal Ethics and Theology* thoughtfully examines the shortcomings of utilitarian and rights based approaches to animal ethics By considering the question of animals within the Christian concept of neighbourly love Miller provides an alternative narrative for understanding the complex relationships that humans have with other animals This book addresses significant theological questions such as Does being created in the image of God present a meaningful distinction between humans and other animals What does it mean for humans to have dominion Gen 1 28 over animals Is meat eating a moral problem for Christians In addition to drawing out the significance of Christian theology for field of animal ethics this book also engages environmental and feminist ethics Miller brings a theological perspective to such questions as Should care for animals be distinguished from care for the environment and what role should human emotions play in our ethical dealings with other animals As the title suggests this book provides fresh insight into the theological significance of human relationships with other animals
