Contemporary Perspectives in Philosophy and Methodology of Science Wenceslao J. González, 2006 Nowadays philosophy and methodology of science appear as a combination of novelty and continuity This blend is clear both in the general approaches to science those thought of as any science and in the specific perspectives on

every science either formal or empirical There are new topics for philosophical reflection such as key issues in philosophy of medicine and central problems raised by neuroscience Thus new contents have brought attention to aspects that previously went almost unnoticed In addition there are new angles for philosophical study such as the repercussion of society on scientific activity in aims processes and results But the background of the main philosophical and methodological trends of the twentieth century is in many ways still in place

Free Will, Causality and the Self Atle Ottesen Søvik, 2016-09-12 A major goal for compatibilists is to avoid the luck problem and to include all the facts from neuroscience and natural science in general which purportedly show that the brain works in a law governed and causal way like any other part of nature Libertarians for their part want to avoid the manipulation argument and demonstrate that very common and deep seated convictions about freedom and responsibility are true it can really be fundamentally up to us as agents to determine that the future should be either A or B This book presents a theory of free will which integrates the main motivations of compatibilists and libertarians while at the same time avoiding their problems The so called event causal libertarianism is the libertarian account closest to compatibilism as it claims there is indeterminism in the mind of an agent The charge of compatibilists however is that this position is impaired by the problem of luck This book is unique in arguing that free will in a strong sense of the term does not require indeterminism in the brain only indeterminism somewhere in the world which there plausibly is

Philosophy and Neuroscience Steven S. Gouveia, 2022-04-11 This book explores the methodological strategies for linking philosophy and neuroscience concerning the study of the conscious brain The author focuses on four distinct methods for relating these two academic disciplines isolationist reductionist neurophenomenological and non reductionist After analyzing the pros and cons of these approaches Steven S Gouveia applies them to the concept of Qualia and Information to understand how the metaphilosophical assumptions of each approach influence the definitions of those specific concepts Gouveia argues for an approach that conceives the interdisciplinarity of both philosophy and neuroscience in a particular and sound methodology offering empirical examples of the explanatory power of this methodology over the others Additionally he shows how the metaphilosophical assumptions of each methodology usually taken by researchers implicitly and unconsciously influence their own approach to the methodological problem

Handbook of Philosophy of Management Cristina Neesham, Markus Reihlen, Dennis Schoeneborn, 2022-12-01 The Handbook of Philosophy of Management addresses the philosophical foundations of management in theory and practice It covers established branches of philosophy such as

aesthetics epistemology moral philosophy political and social philosophy philosophy of education philosophy of practice and philosophy of science The Handbook's broad scope maps out the field and provides a forum where philosophy can be meaningfully applied to the study of management in all its forms The original peer reviewed research published here sheds new light on the complexities of management theory and practice beyond what hitherto has been possible with the sole application of the social sciences As philosophy provides a meta framework for moving beyond paradigm fragmentation within management research and education this allows researchers and practitioners to find harmony and discord in the perspectives revealed by a philosophical lens
