Philosophical Perspectives On Metaphor:

Philosophical Perspectives on Metaphor Mark Johnson, 1981 Philosophical Perspectives on Metaphor was first published in 1981 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions We are says Mark Johnson in the midst of metaphormania The past few years have seen an explosion of interest in metaphor as a vehicle for exploring the relations between language and thought While a number of recent books have dealt with metaphor from the standpoints of several disciplines there is no collection that shows the best of the work that has been done in the field of philosophy Mark Johnson has brought together essays that define the central issues of the discussion in this field His introductory essay offers a critical survey of historically influential treatments of figurative language including those of Aristotle Hobbes Locke Kant and Nietzsche and sets forth the nature of various issues that have been of interest to philosophers Thus it provides a context in which to understand the motivations influences and significance of the collected essays An annotated bibliography serves as a catalog of all relevant literature Philosophical Perspectives on Metaphor provides an entry point into the philosophical exploration of metaphor for students philosophers linguists psychologists artists critics or anyone interested in language and its relation to understanding and experience **Philosophical perspectives on metaphor** Mark Johnson, 1992

Metaphor in Focus Francesca Ervas, Elisabetta Gola, 2014-09-18 This book is a philosophical guide on metaphor use Previous research concerning metaphors has focused on either the theoretical linguistic problems or the uses in specific research fields Although these domains share some common interests there has been little cross communication The aim of this volume is to bridge the gap between the theoretical and the empirical side of the research on metaphor use by analysing the role of metaphor over different domains of use Therefore while adopting a theoretical philosophical point of view the volume also presents the interdisciplinary connections between philosophy and other academic areas such as linguistics cognitive science discourse analysis communication studies didactics economics arts and political science Philosophical Perspectives on Metaphor, 1985 **Philosophical Perspectives on Metaphor** Mark Johnson, 1981 **Metaphor and**

Thought Andrew Ortony, 1993-11-26 Metaphor and Thought first published in 1979 reflects the surge of interest in and research into the nature and function of metaphor in language and thought In this revised and expanded second edition the editor has invited the contributors to update their original essays to reflect any changes in their thinking Reorganised to accommodate the shifts in central theoretical issues the volume also includes six new chapters that present important and influential fresh ideas about metaphor that have appeared in such fields as the philosophy of language and the philosophy of science linguistics cognitive and clinical psychology education and artificial intelligence **Metaphor and Ideology** Mary Therese DesCamp, 2007 This cognitive linguistic analysis of Liber Antiquitatum Biblicarum demonstrates how women are used to articulate Pseudo Philo's theology and ideology how mother is redefined to support female authority to interpret and

instruct and how textual and character authority is constructed conceptually **Metaphor and Art** Carl R.

Hausman,1989-04-28 The Contemporary Theory of Metaphor Ning Yu,1998-07-15 This comparative study of Chinese and English metaphor contributes to the search for metaphoric universals by placing the contemporary theory of metaphor in a broad cross linguistic and cross cultural perspective The author explores to what degree abstract reasoning is metaphorical and which conceptual metaphors are culture specific wide spread or universal in a cognitive and cultural context The empirical studies presented reinforce the view that metaphor is the main mechanism through which abstract concepts are comprehended and abstract reasoning is performed They also support from the perspective of Chinese the candidacy of some conceptual metaphors for metaphorical universals These include for instance the ANGER IS HEAT metaphor the HAPPY IS UP metaphor emotions the TIME AS SPACE metaphor and the Event Structure Metaphor It seems that these conceptual metaphors are grounded in some basic human experiences that may be universal to all human beings *Law and Society*

Approaches to Cyberspace Paul Schiff Berman,2017-11-28 During the past decade the rise of online communication has proven to be particularly fertile ground for academic exploration at the intersection of law and society Scholars have considered how best to apply existing law to new technological problems but they also have returned to first principles considering fundamental questions about what law is how it is formed and its relation to cultural and technological change This collection brings together many of these seminal works which variously seek to interrogate assumptions about the nature of communication knowledge invention information sovereignty identity and community From the use of metaphor in legal opinions about the internet to the challenges posed by globalization and deterritorialization to the potential utility of online governance models to debates about copyright free expression and privacy this collection offers an invaluable introduction to cutting edge ideas about law and society in an online era In addition the introductory essay both situates this work within the trajectory of law and society scholarship and summarizes the major fault lines in ongoing policy debates about the regulation of online activity Metaphors: Figures of the Mind Z. Radman,2013-03-09 This book deals with

various aspects of metaphors and yet it is not only or perhaps not even primarily about metaphor itself Rather it is concerned with the argument from metaphor In other words it is about what I think we can learn from metaphor and the possible consequences of this lesson for a more adequate understanding for instance of our mental processes the possibilities and limitations of our reasoning the strictures of propositionality the cognitive effect of fictional projections and so on In this sense it is not strictly speaking a contribution to metaphorology instead it is an attempt to define the place of metaphor in the world of overall human intellectual activity exemplary thematized here in the span that ranges from problems relating to the articulation of meanings up to general issues of creativity Most of the aspects discussed therefore are examined not so much for the sake of gaining some new knowledge about metaphor work conducted in the science of metaphor is presently so huge that an extra attempt to spell out another theory of metaphor may have an inhiatory effect the basic strategy of this book is to

view metaphor within the complex of language usage and language competence in human thought and action and finally to see in what philosophically relevant way it improves our knowledge of ourselves Certainly by adopting this basic strategy we also simultaneously increase our knowledge of metaphors of their functions and importance Metaphor ,1985-01-01 The aim of the present bibliography is to provide the student of metaphor with an up to date and comprehensive albeit not exhaustive overview of recent publications dealing with various aspects of metaphor in a variety of disciplines Where the emphasis is primarily on specific works about metaphor mainly in philosophy linguistics and psychology the list has been supplemented with references to studies where metaphor is explicitly recognized as an instrument of research or analysis e g in literature or in the elaboration of scientific and religious models or where its use is illustrated New Directions in Educational Evaluation Ernest R. House,2013-10-28 First published in 2004 Measuring the outcomes of educational practices is a modern phenomenon Valuing their worth is as old as philosophy itself It is the singular value of this collection of papers set in context and introduced by Ernest House that it holds in dynamic equilibrium both the measurement and the valuing sides of educational evaluation This book will appeal to the student who will find the theoretical analysis of educational evaluation in its several meanings suggested practices and also the specialist will also find much not least a critical and challenging appreciation of educational evaluation theory and practice as it faces the problems of the final decades of the twentieth century *New Directions In Educational Evaluation* Ernest R. House,2013-10-28 First published in 1986 Measuring the outcomes of educational practices is a modern phenomenon Valuing their worth is as old as philosophy itself It is the singular value of this collection of papers set in context and introduced by Ernest House that it holds in dynamic equilibrium both the measurement and the valuing sides of educational evaluation **Aspects of Metaphor in Physics** Hanna Pulaczewska,2011-05-03 With reference to copious case studies this book attempts to give a broad and comprehensive view of the multiplicity of forms taken by metaphor in physics A diachronic presentation of the views hitherto advanced on the role of metaphor in the natural sciences provides an introduction to the crucial issues By means of a broad definition of metaphor as a lexical semantic and conceptual phenomenon metaphor is identified at various levels of physics discourse in metatheory and methodology in the sociology of the origin and evolution of science in theory and conceptualization including physics models in education and finally in linguistic expression including terminology Whereas historians and theoreticians of science reduce the question of metaphor in physics to the question of the role of scientific models where one area of physics provides concepts and structures for another area the perspective adopted here is that of cognitive semantics The study inquires into the way in which concept formation and terminology in physics avails itself of the metaphoric bent immanent in everyday language conceptualizing abstract ideas in spatial terms inanimate things as intelligent measurable phenomena in terms of the visual Attention is also given to the way in which metaphoric processes make it possible to integrate new knowledge into old and sometimes obsolete structures rather than eliminating those structures altogether *Metaphors in*

the History of Psychology David E. Leary, 1994-07-29 Arguing that psychologists and their predecessors have invariably relied on metaphors in articulation the contributors to this volume offer a new key to understanding a critically important area of human knowledge by specifying the major metaphors

Making Migration Law Eve Lester, 2018-03-22 The emergence of international human rights law and the end of the White Australia immigration policy were events of great historical moment Yet they were not harbingers of a new dawn in migration law This book argues that this is because migration law in Australia is best understood as part of a longer jurisprudential tradition in which certain political economic interests have shaped the relationship between the foreigner and the sovereign Eve Lester explores how this relationship has been wrought by a political economic desire to regulate race and labour a desire that has produced the claim that there exists an absolute sovereign right to exclude or condition the entry and stay of foreigners Lester calls this putative right a discourse of absolute sovereignty She argues that absolute sovereignty talk continues to be a driver of migration lawmaking shaping the foreigner sovereign relation and making thinkable some of the world's harshest asylum policies

Metaphor, Metonymy, and Experientialist Philosophy Verena Haser, 2011-12-22 The present book provides a detailed criticism of experientialist semantics focusing both on philosophical issues connected with experientialism and on cognitive approaches to metaphor and metonymy Particular emphasis is placed on the works of George Lakoff and Mark Johnson but other cognitivists are also taken into consideration Verena Haser proposes a new approach to the distinction between metaphor and metonymy which contrasts with familiar cognitivist models but also builds on some insights gained in cognitivist research She also offers an account of metaphorical transfer which dispenses with the notion of conceptual metaphors in the sense of Lakoff and Johnson She argues that conceptual metaphors are not a useful construct for explaining metaphorical transfer and that the clustering of metaphorical expressions is better accounted for in terms of family resemblances between metaphorical expressions Another major goal of this work is a reassessment of the relationship between experientialism and traditional Western philosophy often subsumed under the vague term objectivism This book contrasts with most other critical approaches to experientialism by providing close readings of key passages from the works of Lakoff and Johnson which enables the author to pinpoint theory internal inconsistencies and other shortcomings not noted in previous publications This book will be relevant to students and scholars interested in semantics and cognitive linguistics and also in psychology and philosophy of language

The Enigma of Metaphor Stefana Garello, 2024-03-30 This book deals with the complicated realm of metaphor an enigma deeply embedded in language and cognition There has been much discussion of metaphor in the past but it was characterized by a certain fragmentation and lacked interdisciplinarity In this field of study the dominance of Cognitive Linguistics epitomized by the Conceptual Metaphor Theory of George Lakoff and Mark Johnson has caused the marginalization of alternative perspectives To fill this gap this book embarks on an interdisciplinary journey inviting different theoretical frameworks to engage in a fruitful dialog It navigates the labyrinth of theories and illuminates the nuanced facets

of metaphor At the center of this exploration are three central questions whether metaphor belongs to the realm of style or thought the intricate interplays between literal and metaphorical meanings and the integration of propositional and non propositional elements in the construction of metaphorical meaning Through a careful blend of historical analysis and contemporary hypotheses the book unravels the complexities of metaphor considering its evolution across the centuries and the myriad interpretations it evokes By bringing together work from different fields it ultimately shows that a definition of metaphor is theory dependent and that metaphor is not a natural kind but a complex and multifaceted philosophical concept whose study requires a multi dimensional approach that transcends narrow theoretical boundaries In this way the book explores these considerations most important philosophical consequences and offers new insights into this fundamental aspect of human language

The Metaphoric Process Gemma Corradi Fiumara, 2005-08-16 Metaphor is much more than just a linguistic phenomena argues Gemma Corradi Fiumara it is in fact the key process by which we construct and develop our ability to understand the world and the people we share it with Rationality as understood by philosophers has led to a disembodied view of ourselves in which interaction between life and language has been downplayed By looking at the metaphoric process in an interpersonal rather than a formal way its importance in allowing us access to new worlds of experience is revealed The metaphoric potential in us all exposes us to the world and initiates our involvement in it
