Thannhuber, 2006-03-30 In today's competitive environments enterprises face diminishing market life spans increasing pressure on profit margins and increasingly complex customer requirements Thus in their operations modern organizations have to find a high level balance between dynamics complexity and precision in order to best utilize their markets Organization Theory and Industrial Engineering the disciplines on hand helping industry to cope with this challenge soon identified process optimizations as the key to possible solutions Many efforts have been undertaken to provide sound theoretical models to deal with complexity and dynamics and streamline business processes These efforts on the one hand helped companies to be more precise in carrying out their actions and even provided solutions to produce customized products at near mass production prices Mass Customization On the other hand it turned out to be one of the most difficult tasks to generalize and transfer experiences gained in one process reengineering project to another and put the theoretical models into practice Not without reason is it the extremely high failure rate of business process reengineering projects that today deters most enterprises from entering such adventures Right at the same time there emerged a new and highly promising scientific branch Knowledge Management that attracted many disciplines among others again Organization Theory and Industrial Engineering Knowledge was identified as a major production factor In industrialized countries value added is mainly raised by the intellectual abilities of a company's workforce **Philosophy And Philosophers** John

Third Series** Library of Congress. Copyright Office,1972 **Classical Modern Philosophy** Jeffrey Tlumak,2013-01-11 Classical Modern Philosophy introduces students to the key philosophers of the seventeenth and eighteenth centuries and explores their most important works Jeffrey Tlumak takes the reader on a chronological journey from Descartes to Kant tracing the themes that run through the period and their interrelations The main texts covered are Descartes Meditations on First Philosophy Spinoza s Ethics Locke s Essay Concerning Human Understanding Leibniz s Discourse on Metaphysics and Monadology Berkeley s A Treatise Concerning the Principles of Human Knowledge and Three Dialogues between Hylas and Philonous Hume s An Enquiry Concerning Human Understanding and Dialogues Concerning Natural Religion Kant s Critique of Pure Reason Classical Modern Philosophy is the ideal textbook to accompany a course in the history of modern philosophy but each chapter can also be studied alone as an introduction to the featured philosopher or work Jeffrey Tlumak outlines and assesses prominent interpretations of the texts and surveys the legacy of each great thinker **The Problem of the Criterion** Robert Amico,1995-03-28 Selected by CHOICE as an Outstanding Academic Book for 1995 **Ancient Philosophy** Christopher Shields,2011-11-30 In this re titled and substantially revised update of his Classical Philosophy 2003 Christopher Shields expands his coverage to include the Hellenistic era and now offers an introduction to more than 1 000 years of ancient philosophy From Thales and other Pre Socratics through Socrates Plato and Aristotle and on to Epicureanism Stoicism and Scepticism Ancient Philosophy traces the important connections between these periods and

individuals without losing sight of the novelties and dynamics unique to each. The coverage of Plato and Aristotle also has been expanded. It now includes for example updated coverage of Plato's allegories of the cave and the divided line and the metaphor of the sun as well as features of Plato's epistemology. Shields also adds new discussion on Aristotle's theory of virtue and his approach to the Socratic problem of akrasia or weakness of will. In terms of its structure, *Ancient Philosophy* is presented so that each philosophical position receives 1 a brief introduction, 2 a sympathetic review of its principal motivations and primary supporting arguments, and 3 a short assessment inviting readers to evaluate its plausibility. The result is a book that brings the ancient arguments to life, making the introduction truly contemporary. It will serve as both a first stop and a well-visited resource for any student of the subject. *Ancient Philosophy* offers a vivid picture of the ideas that flourished at philosophy's long birth and considers their relevance both to the historical development of the Western philosophical tradition and to philosophy today.

Moral Psychology Valerie Tiberius, 2014-05-30 This is the first philosophy textbook in moral psychology introducing students to a range of philosophical topics and debates such as: What is moral motivation? Do reasons for action always depend on desires? Is emotion or reason at the heart of moral judgment? Under what conditions are people morally responsible? Are there self-interested reasons for people to be moral? *Moral Psychology: A Contemporary Introduction* presents research by philosophers and psychologists on these topics and addresses the overarching question of how empirical research is or is not relevant to philosophical inquiry.

Cosmological Fine-Tuning Arguments Jason Waller, 2019-09-05 If the physical constants, initial conditions, or laws of nature in our universe had been even slightly different, then the evolution of life would have been impossible. This observation has led many philosophers and scientists to ask the natural next question: why is our universe so fine-tuned for life? The debates around this question are wide-ranging, multi-disciplinary, complicated, technical, and at times heated. This study is a comprehensive investigation of these debates and the many metaphysical and epistemological questions raised by cosmological fine-tuning. Waller's study reaches two significant and controversial conclusions. First, he concludes that the criticisms directed at the multiverse hypothesis by theists and at the theistic hypothesis by naturalists are largely unsuccessful. Neither of these options can plausibly be excluded. Choosing between them seems to turn on primitive and so hard to justify metaphysical intuitions. Second, in order to break the philosophical deadlock, Waller moves the debate from the level of universes to the level of possible worlds. Arguing that possible worlds are also fine-tuned in an important and interesting sense, Waller concludes that the only plausible explanation for the fine-tuning of the actual world is to posit the existence of some kind of God-like thing.

Keith Lehrer R. Bogdan, 1981 The aim of this series is to inform both professional philosophers and a larger readership of social and natural scientists, methodologists, mathematicians, students, teachers, publishers, etc. about what is going on, who's who, and who does what in contemporary philosophy and logic. *PROFILES* is designed to present the research activity and the results of already outstanding personalities and schools and of newly emerging ones in the various fields of philosophy and logic. There are

many Festschrift volumes dedicated to various philosophers There is the celebrated Library of Living Philosophers edited by P A Schilpp whose format influenced the present enterprise Still they can only cover very little of the contemporary philosophical scene Faced with a tremendous expansion of philosophical information and with an almost frightening division of labor and increasing specialization we need systematic and regular ways of keeping track of what happens in the profession PROFILES is intended to perform such a function Each volume is devoted to one or several philosophers whose views and results are presented and discussed The profiled philosopher s will summarize and review his their own work in the main fields of significant contribution This work will be discussed and evaluated by invited contributors Relevant historical and or biographical data an up to date bibliography with short abstracts of the most important works and whenever possible references to significant reviews and discussions will also be included
