The Philosophical Radicals and Other Essays Andrew Seth Pringle-Pattison, 1907 Radical Affections Miriam Nichols, 2010 In 1950 the poet Charles Olson published his influential essay Projective Verse in which he proposed a poetry of open field composition to replace traditional closed poetic forms with improvised forms that would reflect exactly the content of the poem The poets and poetry that have followed in the wake of the projectivist movement the Black Mountain group the New York School the San Francisco Renaissance and the Language poets have since been studied at length But more often than not they have been studied through the lens of continental theory with the effect that these high **Toward a Postmodern Ethic of Radical Freedom** Darrell J. Wesley, 2023-09-08 Toward a Postmodern Ethic of Radical Freedom is one of the first if not the first to bring Cornel West and Michel Foucault together in a meaningful dialogue to formulate a postmodern ethic of radical freedom This dialogue begins with the practical posture of West more specifically his notions of truth and reality and work then goes back to his more theoretical work to explore the same notions As a project in constructive ethics this book examines Cornel West's epistemology notion of truth and metaphysics notions of reality as foundational components for a postmodern ethic of radical freedom These foundational components are then brought into a discursive conversation with aspects of Michel Foucault's archaeology and genealogy with a method called reconstruction This reconstruction results in two important trajectories radical ontology and radical epistemology which become the pillars for a postmodern ethic of radical freedom The last chapter of the book weaves together all components with the womanist work of Monica Coleman and Patricia Hill Collins as examples of this ethic of radical freedom Practically speaking this postmodern ethic of radical freedom serves as a platform to ensure transcendence so that all people regardless of race gender or sexuality can enjoy a flourishing and fulfilled life **Encyclopedia of the Essay** Tracy Chevalier, 2012-10-12 This groundbreaking new source of international scope defines the essay as nonfictional prose texts of between one and 50 pages in length The more than 500 entries by 275 contributors include entries on nationalities various categories of essays such as generic such as sermons aphorisms individual major works notable writers and periodicals that created a market for essays and particularly famous or significant essays The preface details the historical development of the essay and the alphabetically arranged entries usually include biographical sketch nationality era selected writings list additional readings and anthologies **Critical Theories, Radical Pedagogies, and Social Education**, 2010-01-01 A refreshing collection of essays that offers a range of critical and radical voices which are generally marginalized in the critical social studies mainstream This collection is a good read with valuable insights that can impact teaching practice Canadian Social Studies Canada's National Social Studies Journal Volume 45 Issue 1 Award American Educational Studies Association AERA Critics Choice Book Award 2011 This edited collection begins with the assertion that there are emergent and provocative theories and practices that should be part of the discourse on social studies education in the 21st century Anarchist eco activist anti

capitalist and other radical perspectives such as disability studies and critical race theory are explored as viable alternatives in responding to current neo conservative and neo liberal educational policies shaping social studies curriculum and teaching. Despite the interdisciplinary nature of the field and a historical commitment to investigating fundamental social issues such as democracy, human rights, and social justice, social studies theory and practice tends to be steeped in a reproductive framework celebrating and sustaining the status quo, encouraging passive acceptance of current social realities and historical constructions rather than a critical examination of alternatives. These tendencies have been reinforced by education policies such as No Child Left Behind which have narrowly defined ways of knowing as rooted in empirical science and apolitical forms of comprehension. This book comes at a pivotal moment for radical teaching and for critical pedagogy, bringing the radical debate occurring in social sciences and in activist circles where global protests have demonstrated the success that radical actions can have in resisting rigid state hierarchies and oppressive regimes worldwide to social studies education.

The Routledge Companion to Environmental Ethics Benjamin Hale, Andrew Light, Lydia Lawhon, 2022-07-29. Written for a wide range of readers in environmental science, philosophy, and policy-oriented programs, *The Routledge Companion to Environmental Ethics* is a landmark comprehensive reference work in this interdisciplinary field. Not merely a review of theoretical approaches to the ethics of the environment, the Companion focuses on specific environmental problems and other concrete issues. Its 65 chapters, all appearing in print here for the first time, have been organized into the following eleven parts: I Animals, II Land, III Water, IV Climate, V Energy and Extraction, VI Cities, VII Agriculture, VIII Environmental Transformation, IX Policy Frameworks and Response Measures, X Regulatory Tools, XI Advocacy and Activism. The volume not only explains the nuances of important core philosophical positions but also cuts new pathways for the integration of important ethical and policy issues into environmental philosophy. It will be of immense help to undergraduate students and other readers coming up to the field for the first time but also serve as a valuable resource for more advanced students as well as researchers who need a trusted resource that also offers fresh policy-centered approaches. **The Encyclopedia**

The Body, the Dance and the Text Brynn Wein Shiovitz, 2019-02-07. This collection of new essays explores the many ways in which writing relates to corporeality and how the two work together to create, resist, or mark the body of the Other. Contributors draw on varied backgrounds to examine different movement practices. They focus on movement as a meaning-making process, including the choreographic act of writing. The challenges

faced by marginalized bodies are discussed along with the ability of a body to question contest and re write historical narratives

Dalferth,2016-07-01 Ingolf U Dalferth develops a radical theology that unfolds the orienting strength of faith for human life from the event of God s presence to every present In a concise and clear manner Dalferth outlines the theological and philosophical approaches to hermeneutics in the modern era in order to promote a convincing and defensible theology for the twenty first century critically carrying on Martin Heidegger and Rudolf Bultmann without forgetting Karl Barth The result of his reconstruction is a radical theology that neither glorifies premodern theology in an antimodern attitude nor seeks a mystical deepening of the secular but argues for a radical change in theological perspective of the possible In doing so theology unfolds limit concepts

that restrict the claims of science and philosophy critically and develops ideas of orientation that illumine the ways in which human life is understood and lived in radically new ways in faith From here Dalferth unfolds the reality of revelation and the Christian sense of an unconditional hope that fundamentally transcends all beliefs based on mundane realities and orients the world on something beyond its own temporal horizon its loving Creator **Strange and Gaudy Fruit** Jeff

Nicoll,2023-05-09 The history of Christianity includes many doctrines adopted and actions taken to meet immediate problems but which had unintended consequences they are bad fruit Matt 7 15 20 The oldest is antisemitism which arose from the competition of the early church with early Judaism It was built into the New Testament and was developed by the church fathers Having learned to dehumanize it was easy to apply the same techniques to other groups the church became complicit with enslavement misogyny and other forms of oppression One response to the bad fruit is to reject religion in the manner of Christopher Hitchens However the dogmas are part of our culture even if in secular form If the roots of marginalization are not understood they cannot be eliminated This work uses a range of critics and defenders of traditional Western Christianity to identify poisonous fruits and detoxify them The critical voices do not create a consensus Nevertheless a core can be perceived what Erasmus called the few truths Grounded in the religious tradition they can be shared with secular people as a basis for an ethical merciful and respectful society Although the history of Christianity is bloody there are ways to go forward
