Atomism in Philosophy Ugo Zilioli, 2020-11-12 The nature of matter and the idea of indivisible parts has fascinated philosophers, historians, scientists, and physicists from antiquity to the present day. This collection covers the richness of its history, starting with how the Ancient Greeks came to assume the existence of atoms and concluding with contemporary metaphysical debates about structure, time, and reality. Focusing on important moments in the history of human thought when the debate about atomism was particularly flourishing and transformative for the scientific and philosophical spirit of the time, this collection covers the discovery of atomism in ancient philosophy, Ancient non-Western, Arabic, and late Medieval thought, The Renaissance when along with the re-discovery of ancient thought atomism became once again an important doctrine to be fully debated, Logical atomism in early analytic philosophy with Russell and Wittgenstein, Atomism in Liberalism and Marxism, Atomism and the philosophy of time, Atomism in contemporary metaphysics, Atomism and the sciences. Featuring 28 chapters by leading and younger scholars, this valuable collection reveals the development of one of philosophy's central doctrines across 2,500 years and within a broad range of philosophical traditions

The Philosophy of Susanne Langer Adrienne Dengerink Chaplin, 2019-10-17 This book is a comprehensive study of one of the most insightful and fertile but also most neglected philosophers of the twentieth century, Susanne Langer. Failure to recognise Langer's seminal philosophical sources has led to frequent misinterpretations and misunderstandings of her unique philosophical thought. Beginning with an overview of Langer's life and education, this study provides a much-needed explanation of how Langer's thinking was shaped by four seminal sources: her mentors Henry Sheffer and Alfred North Whitehead and the European philosophers Ernst Cassirer and Ludwig Wittgenstein. Langer's ability to unite seemingly disparate fields such as logic, art, and embodied cognition around the notion of symbolic form places aesthetics not at the margins of philosophy but at its very centre. By locating Langer's work in the broader context of major developments in twentieth-century European and American philosophy, Dengerink Chaplin shows how she was often ahead of her time. Shedding new light on Langer as an American philosopher whose innovative thought crosses the customary boundaries between analytic and continental philosophy, this book confirms why she continues to have relevance today

The Visual and Verbal Sketch in British Romanticism Richard C. Sha, 2016-11-11 With their broken lines and hasty brushwork, sketches acquired enormous ideological and aesthetic power during the Romantic period in England. Whether publicly displayed or serving as the basis of a written genre, these rough drawings played a central role in the cultural ferment of the age by persuading audiences that less is more. *The Visual and Verbal Sketch in British Romanticism* investigates the varied implications of sketching in late eighteenth and early nineteenth-century culture. Calling on a wide range of literary and visual genres, Richard C. Sha examines the shifting economic and aesthetic value of the sketch in sources ranging from auction catalogs and sketching manuals to novels that employed scenes of sketching and courtship. He

especially shows how sketching became a double edged accomplishment for women when used to define proper femininity Sha s work offers fresh readings of Austen Gilpin Wordsworth and Byron as well as less familiar writers and provides sophisticated interpretations of visual sketches As the first full length work about sketching during the Romantic era this volume is a rich interdisciplinary study of both representation and gender

Art Disarming Philosophy Steven Shakespeare, Niamh Malone,, Gary Anderson, 2021-09-23 Non philosophy poses a challenge to philosophical thought inspired by the work of Fran ois Laruelle It questions the idea that philosophy or other disciplines can tell us what it means to think This edited collection brings together an internationally known and interdisciplinary group of scholars including a major new essay by Laruelle himself Together they use non philosophy to cross the boundaries between philosophy and performance Philosophers have been busy for centuries looking for the foundations of truth value and reality They try to say what it all means and how it all fits together Areas of life like science and art have to wait for the philosopher to show up to tell them what they are really about Theory dictates meaning performance just puts it into effect Non philosophy is different It says that reality is not an object out there that we can think and understand The Real is the place we stand it is where we think from Crucially non philosophy understands philosophy itself to be performative It enacts modes of thinking that do not dominate the material of thought and do not capture the Real in concepts Philosophy is mutated by its performances and performances themselves think are modes of theory What happens when we bring philosophy art and performance together without hierarchy How can they get inside and change one another The thinkers in this collection answer these pressing questions
