Philosophical Study Of Religion:

Philosophy and the Study of Religions Kevin Schilbrack, 2013-12-12 Philosophy and the Study of Religions A Manifesto advocates a radical transformation of the discipline from its current narrow focus on questions of God to a fully global form of critical reflection on religions in all their variety and dimensions Opens the discipline of philosophy of religion to the religious diversity that characterizes the world today Builds bridges between philosophy of religion and the other interpretative and explanatory approaches in the field of religious studies Provides a manifesto for a global approach to the subject that is a practice centred rather than a belief centred activity Gives attention to reflexive critical studies of religion as socially constructed and historically located Religious Philosophy as Multidisciplinary Comparative Inquiry Wesley J. Wildman, 2010-11-05 What can philosophy contribute to the study of religion This book argues that the study of religion needs philosophy in the form of multidisciplinary comparative inquiry Contradicting the current tendency to regard philosophical reflection and the academic study of religion as independent endeavors best kept apart Wesley J Wildman brings them together offering a broader vision than that of traditional philosophy of religion and surmounting many of its difficulties His newer conception of religious philosophy is well suited to the modern multicultural secular university Through multidisciplinary comparative inquiry religious philosophy allows for a variety of approaches from historical and analytical work to evocative description and theoretical evaluation of truth claims and both secular and religious thinkers participate The tasks and varieties of religious philosophy as they arc across the world s religions and philosophies are discussed along with religious philosophy s modern and postmodern contexts Wildman s thoughtful and thought provoking book will be essential reading for all those concerned with the study of religion present and future *Why Philosophy Matters for the Study of Religion--and Vice Versa* Thomas A. Lewis, 2015-12-17 Work in philosophy of religion is still strongly marked by an excessive focus on Christianity and to a lesser extent Judaism almost to the exclusion of other religious traditions Moreover in many cases it has been confined to a narrow set of intellectual problems without embedding these in their larger social historical and practical contexts Why Philosophy Matters for the Study of Religion and Vice Versa addresses this situation through a series of interventions intended to work against the gap that exists between much scholarship in philosophy of religion and important recent developments that speak to religious studies as a whole This volume takes up what in recent years has often been seen as a fundamental reason for excluding religious ethics and philosophy of religion from religious studies their explicit normativity Against this presupposition Thomas A Lewis argues that normativity is pervasive not unique to ethics and philosophy of religion and therefore not a reason to exclude them from religious studies Lewis bridges more philosophical and historical subfields by arguing for the importance of history to the philosophy of religion He considers the future of religious ethics explaining that the field as whole should learn from the methodological developments associated with recent work in comparative religious ethics and comparative religious ethics should no longer be conceived as a distinct

subfield The concluding chapter engages broader post 9 11 arguments about the importance of studying religion arguing that prominent contemporary notions of religious literacy actually hinder our ability to grasp religion s significance and impact in the world today Philosophy and the Study of Religions Kevin Schilbrack,2014-03-03 Philosophy and the Study of Religions A Manifesto advocates a radical transformation of the discipline from its current narrow focus on questions of God to a fully global form of critical reflection on religions in all their variety and dimensions Opens the discipline of philosophy of religion to the religious diversity that characterizes the world today Builds bridges between philosophy of religion and the other interpretative and explanatory approaches in the field of religious studies Provides a manifesto for a global approach to the subject that is a practice centred rather than a belief centred activity Gives attention to reflexive critical studies of religion as socially constructed and historically located **The Meaning of God in Human Experience** William Ernest Hocking,1962 Approaches to the Study of Religion Peter Connolly,1999-01-01 It has been argued that religious studies is a polymethodic discipline and that the student of religion should be familiar with the approaches of the major disciplines concerned with understanding the nature of religion not least because the approach adopted has profound influence on the phenomena chose for investigation and the conclusions reached This book is the first textbook specifically designed for undergraduate students that provides the essential background on methods of the major relevant disciplines Presenting each of the significant approaches to religion in an informed manner the book brings together experienced researchers from feminism anthropology sociology phenomenology psychology philosophy and theology It presents a consistent approach throughout with each chapter dealing with the same themes the historical development of the approach the characteristics of the approach and the surrounding issues and debates Religion and Science Rezania Hamid,2022-05-04 Religion and Science terms briefly explained In this thesis I am concerned with natural sciences as well as Hindu and Islam as religion Religion and science are two major sources that have guided mankind from historical time Both of them have greatly influenced all aspects of human life In certain cases both religion and science have looked into those problems and clashes that need urgent attention There is a popular belief that religion and science are two basically opposite poles There are several definitions of religion which imply a relationship not merely between men and men but also between man and some moral power that attempts to find out the ways for human perfection Some definitions have pointed out that whenever and wherever man has a sense of dependence on external moral powers which are conceived as mysterious as and higher than man s own there is religion The feeling of awe and self abasement with which man is filled in the presence of such mysterious powers is essentially a religions emotion the root of worship and prayer The internal aspect of religion is the body of ideas convictions and emotions concerning man s relations with God while its external aspect is the system of prayers ceremonies and rites through which the religious feeling is manifested On the other hand science has a different method and different definition Many scientists believe that science is applied to solving modern problems of technological and humanistic nature

The question of whether religion is compatible with science has occupied a prominent place in the discussions of the nineteenth century and some thinkers have held the view that science and religion are incompatible In the midst of this controversy it
