Philosophies And Cultures:

A Philosophical Defense of Culture Shuchen Xiang, 2021-06-01 In *A Philosophical Defense of Culture* Shuchen Xiang draws on the Confucian philosophy of culture and Ernst Cassirer's philosophy of symbolic forms to argue for the importance of culture as a philosophic paradigm. A defining ideal of Confucian Chinese civilization, culture (wen) spans everything from natural patterns and the individual units that make up Chinese writing to literature and other refining vocations of the human being. Wen is thus the soul of Confucian Chinese philosophy. Similarly, as a philosopher who bridged the classical age of German humanism and postwar modernity, Cassirer implored his and future generations to think of humankind in terms of their culture and to think of the human being as a symbolic animal. The philosophies of culture of these two traditions, very much compatible, are of urgent relevance to our contemporary epoch. Xiang describes the similarity of their projects by way of their conception of the human being, her relationship to nature, the relationship of human culture to nature, the importance of cultural pluralism and the role of the arts in human life, as well as the metaphysical frameworks that gave rise to such conceptions. Combining textual exegesis in classical Chinese texts and an exposition of Cassirer's most important insights against the backdrop of post-Kantian philosophy, this book is philosophy written in a cosmopolitan mode, arguing for the contemporary philosophical relevance of culture by drawing on and bringing together two different but strikingly similar streams in our world tradition. *Intercultural Philosophy* Ram Adhar Mall, 2000-01-12

The meeting of different cultures, philosophies, and religions today calls for an intensive and qualified discourse on the part of all concerned. *Intercultural Philosophy* seeks to develop such a discourse through a new orientation of thought that will allow for a discussion of all philosophical problems from an intercultural perspective. In this important new work, Ram Adhar Mall approaches the study of philosophy from a cross-cultural point of view, allowing for fundamental similarities and illuminating differences between cultures. In doing so, he develops a new concept of intercultural philosophy and applies it to various philosophical disciplines.

Jewish Philosophy and Western Culture Victor J. Seidler, 2007-11-28 This is one of the first textbooks to try to set the entire discipline of Jewish philosophy in its proper cultural and historical contexts. In so doing, it introduces the vibrant Jewish philosophical tradition to students while also making a significant contribution to inter-religious dialogue. Victor J. Seidler argues that the dominant Platonic tradition in the West has led to a form of cultural ethics which asserts false superiority in its relationships with others. He offers a critical reappraisal of the philosophical underpinnings of this Western Christian culture which for so long has viewed Judaism with hostility. Examining the work of seminal Jewish thinkers such as Philo, Buber, Mendelsohn, Herman Cohen, Leo Baeck, Levinas, Rosenzweig, and others, the author argues for a code of ethics which prioritises particular and personal moral responsibility rather than the impersonal and universal emphases of the Greek tradition. His provocative and original overview of Jewish philosophy uncovers a vital and neglected tradition of thought which works against the likelihood of a Holocaust recurring. *Intercultural Philosophy* Ram Adhar Mall, 2000-01-12

Meaning Andrew Goatly, 2022-09-30 The book takes as its point of departure the notion that similarity and contiguity are fundamental to meaning It shows how they manifest in oral literate print and internet cultures in language acquisition pragmatics dialogism classification the semantics of grammar literature and most centrally metaphor and metonymy The book situates these reflections on similarity and contiguity in the interplay of language cognition culture and ideology and within broader debates around such issues as capitalism biodiversity and human control over nature Positing that while similarity focused systems can be reductive and have therefore been contested in social science philosophy and poetry and

contiguity based ones might disregard useful statistical and scientific evidence Andrew Goatly argues for the need for humans to entertain diverse metaphors models and languages as ways of understanding and acting on our world The volume also considers the cognitive connections between the similarity contiguity duality and the noun verb distinction This innovative volume will appeal to scholars involved in wider debates on meaning within the fields of cognitive semantics pragmatics metaphor and metonymy theory critical discourse analysis and the philosophy of language Equally the motivated and intelligent general reader interested in language philosophy culture and ecology should find the later chapters of the book fascinating and the earlier technical chapters accessible

In Praise of Philosophy Alain Badiou, 2025-04-08 What kind of philosophy do we need for the 21st century To answer to this question Alain Badiou imagines a dialogue between Toceras an earnest and engaging professor and various interlocutors from different countries and philosophical cultures John After from Britain Amantha from Greece B adj Akil from Senegal Xi La Pong from China and several others Their conversation takes readers on a playful journey through the history of philosophy framed by the five great questions that have preoccupied Alain Badiou democracy freedom universality language and being At the same time philosophy is presented not as a system or doctrine but as movement and dialogue The philosopher is not a solitary figure he is inseparable from his pupils his disciples and his adversaries It is only at the end of the journey that he arrives at the written stable forms of his work So we are dealing more with a play than a treatise more with dialogues than monologues more with a course than a book The obvious model is Plato s Socrates who in founding philosophy as a discipline ensured that it could be established anywhere in the world In praise yes of philosophy as the public creation of a thought that inventing itself and transporting itself anywhere speaking to anyone about anything invents the theatricalization of being

Smid,2010-07-02 What is comparative philosophy This question is ultimately a methodological one according to this much needed book The cultivation of area studies in diverse traditions has opened up opportunities for cross cultural understanding that have rarely existed before and comparative philosophy is a rapidly emerging area of inquiry Yet surprisingly little has been written on comparative methodology in philosophy Of course there is much at stake in how we compare things how comparison is done determines what comparison is Author Robert W Smid provides a critical review of four of the most influential comparative methodologies within the American pragmatist and process philosophical traditions those of William Ernest Hocking F S C Northrop Robert Cummings Neville and David L Hall in collaboration with Roger T Ames Discussing the history of each methodology s development and critically assessing its strengths and weaknesses Smid demonstrates that it is possible to compare methods as well as traditions and encourages those interested to join the contemporary conversation **The Modern Legal Philosophy Series...** ,1912
