Philosophy And Poetics Of Gaston Bachelard:

On Poetic Imagination and Reverie Gaston Bachelard, 1971 *The Poetics of Space* Gaston Bachelard, 2014-12-30 A beloved multidisciplinary treatise comes to Penguin Classics Since its initial publication in 1958 *The Poetics of Space* has been a muse to philosophers architects writers psychologists critics and readers alike The rare work of irresistibly inviting philosophy Bachelard's seminal work brims with quiet revelations and stirring mysterious imagery This lyrical journey takes as its premise the emergence of the poetic image and finds an ideal metaphor in the intimate spaces of our homes Guiding us through a stream of meditations on poetry art and the blooming of consciousness itself Bachelard examines the domestic places that shape and hold our dreams and memories Houses and rooms cellars and attics drawers chests and wardrobes nests and shells nooks and corners No space is too vast or too small to be filled by our thoughts and our reveries In Bachelard's enchanting spaces We are never real historians but always near poets and our emotion is perhaps nothing but an expression of a poetry that was lost This new edition features a foreword by Mark Z Danielewski whose bestselling novel *House of Leaves* drew inspiration from Bachelard's writings and an introduction by internationally renowned philosopher Richard Kearney who explains the book's enduring importance and its role within Bachelard's remarkable career For more than sixty five years Penguin has been the leading publisher of classic literature in the English speaking world With more than 1 500 titles Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors as well as up to date translations by award winning translators *On Poetic Imagination and Reverie* Gaston Bachelard, 1987 Passages from Bachelard's major works are introduced here in excerpts selected by Colette Gaudin a professor of French literature at Dartmouth College and an authority on Bachelard *The Psychoanalysis of Fire* Gaston Bachelard, 1987-01-30 Bachelard is neither a self confessed and tortured atheist like Sartre nor like Chardin a heretic combining a belief in God with a proficiency in modern science But within the French context he is almost as important as they are because he has a pseudo religious force without taking a stand on religion To define him as briefly as possible he is a philosopher with a professional training in the sciences who devoted most of the second phase of his career to promoting that aspect of human nature which often seems most inimical to science the poetic imagination J G Weightman *The New York Times Review of Books* **The Philosophy and Poetics of Gaston Bachelard** Mary McAllester Jones, 1989-10-12 The essays in this volume discuss the life and work of French philosopher Gaston Bachelard exploring the context of his thought the relationship between his work on science and on poetry and his approach to language Contents include 1 Bachelard in the Context of a Century of Philosophy of Science by Colin Smith 2 Gaston Bachelard Phenomenologist of Modern Science by Alfons Grieder 3 Gaston Bachelard and Ferdinand Gonseth Philosophers of Scientific Dialectics by Henri Lauener 4 Science and Poetry in the Ontology of Human Freedom Bachelard's Account of the Poetic and the Scientific

Imagination by Noel Parker 5 Bachelard and the Refusal of Metaphor by Jean Claude Margolin 6 The Place of Alchemy in Bachelard's Oneiric Criticism by John G Clark Unfixing the Subject Gaston Bachelard and Reading by Mary McAllester Co published with the Center for Advanced Research in Phenomenology *Fragments of a Poetics of Fire* Gaston Bachelard, 1990 *Gaston Bachelard, Revised and Updated* Roch C. Smith, 2016-06-03 Comprehensive overview of the entire spectrum of works by one of twentieth century France's most original thinkers Gaston Bachelard one of twentieth century France's most original thinkers is known by English language readers primarily as the author of *The Poetics of Space* and several other books on the imagination but he made significant contributions to the philosophy and history of science In this book Roch C Smith provides a comprehensive introduction to Bachelard's work demonstrating how his writings on the literary imagination can be better understood in the context of his exploration of how knowledge works in science After an overview of Bachelard's writings on the scientific mind as it was transformed by relativity quantum physics and modern chemistry Smith examines Bachelard's works on the imagination in light of particular intellectual values Bachelard derived from science His trajectory from science to a specifically literary imagination is traced by recognizing his concern with what science teaches about how we know and his increasing preoccupation with questions of being when dealing with poetic imagery Smith also explores the material and dynamic imagination associated with the four elements fire water air and earth and the phenomenology of creative imagination in Bachelard's *Poetics of Space* his *Poetics of Reverie* and in the fragments of *Poetics of Fire* *Fragments of a Poetics of Fire* Gaston Bachelard, 1990-01-01 The publication of FRAGMENTS OF A POETICS OF FIRE is a milestone in Bachelard studies that will influence the way we think about his themes method for a long time to come Dissatisfied with his earlier attempt to come to terms with the element of fire in *The Psychoanalysis of Fire* 1937 Bachelard returned to this theme in the book he was working on at the time of his death in 1962 Because of delays in eventually the abandonment of a projected edition of his complete works these FRAGMENTS OF A POETICS OF FIRE remained unpublished their very existence unknown to all but a handful of Bachelard's readers The author's daughter Suzanne Bachelard edited them for separate publication over a quarter century later in 1988 For the first time we have an insight into the way Bachelard constructed his remarkable books Miss Bachelard's introduction extensive notes are an indispensable guide to the workings of his mind as he shapes a meandering series of observations on the phoenix Prometheus Empedocles into a coherent engaging structure that respects the fluidity openness of a living image the powerful image of fire *The Flame of a Candle* Gaston Bachelard, 1988 **Lautréamont** Gaston Bachelard, James Hillman, 1986 *Water and Dreams* Gaston Bachelard, 1983 *Earth and Reveries of Will* Gaston Bachelard, 2002-01-01 *Air and Dreams* Gaston Bachelard, 1988 *Air and Dreams* An Essay on the Imagination of Movement by Gaston Bachelard Trans Edith and Frederick Farrell Bachelard uses his extensive knowledge of the poetry of Poe Blake Shelley and Nietzsche to amplify the images of the airy elements THE BACHELARD TRANSLATIONS are the inspiration of Joanne H Stroud Director of Publications for The

Dallas Institute of Humanities and Culture who in 1981 contracted with Jose Corti to publish in English the untranslated works of Bachelard on the imagination Gaston Bachelard is acclaimed as one of the most significant modern French thinkers From 1929 to 1962 he authored twenty three books addressing his dual concerns the philosophy of science and the analysis of the imagination of matter The influence of his thought can be felt in all disciplines of the humanities art architecture literature language poetics philosophy and depth psychology His teaching career included posts at the College de Bar sur Aube the University of Dijon and from 1940 to 1962 the chair of history and philosophy of science at the Sorbonne One of the amphitheaters of the Sorbonne is called L Amphi Gaston Bachelard an honor Bachelard shared with Descartes and Richelieu He received the Grand Prix National Lettres in 1961 one of only three philosophers ever to have achieved this honor The influence of his thought can be felt in all disciplines of the humanities art architecture literature poetics psychology philosophy and language

The New Scientific Spirit Gaston Bachelard,1984 In this book Bachelard draws upon both his scientific training and his interest in the nonrational which ultimately drew him toward the study of poetics to explore the deeper meanings of the new physics In Bachelard s view the unpredictable behaviour of subatomic particles belies the seemingly neat ordered and mechanistic universe that the practical and empirical scientists of the nineteenth century thought they saw

Gaston Bachelard Zbigniew Kotowicz,2016 Gaston Bachelard 1884 1962 was a seminal figure in contemporary French philosophy Together with Michel Foucault Georges Canguilhem and Jean Cavaill s he shaped the French epistemological school of philosophy of science In France Bachelard is a towering presence in the English speaking world he is little known Now Zbigniew Kotowicz gives us the first English language in depth presentation of the entire spectrum of Bachelard s work epistemology poetic imagination and temporality And he explores an old philosophical tradition that Bachelard s thought opens up atomism a doctrine that has been almost forgotten and is much misunderstood

Gaston Bachelard, Subversive Humanist Mary McAllester Jones,Gaston Bachelard,1991 In an elegant translation Mary McAllester Jones brings to English speaking readers the writings of a singular French philosopher of science whose rich intellectual legacy is too little known Gaston Bachelard who died in 1962 left us twelve works on the philosophy of science nine on the poetic imagination and two on time and consciousness written in an image laden style that rejected traditional academic discourse in favor of a subversive allusive highly metaphorical way of thinking and writing Gaston Bachelard Subversive Humanist gives us a generous introduction to Bachelard s brilliant and idiosyncratic writings about the relation of science poetry and human consciousness The extracts are framed in succinct critical essays that explicate the development of his ideas and clarify his relation to the contemporary French intellectual revolution more commonly associated with Michel Foucault and Jacques Derrida The matrix of Bachelard s thought is twentieth century science the new scientific mind that he dates from 1905 and Einstein s special theory of relativity Like the discovery of America five hundred years before the discoveries of mathematics and physics today have undermined our familiar epistemologies Modern science

has forced us to revise our conception of the rational subject and of the relation between reason and reality subject and object A psychic revolution has accompanied this revolution in reason If we try to grasp the dialectics of matter and energy in physics or the dualism of waves and particles we shall learn to maintain difference and handle complexity we are shaken out of the reductive identity ridden habits of ordinary life and thought As a writer of science Bachelard deliberately aimed to rid us of the preconceptions that blind us to the facts to science as it is now The same wariness with regard to theory is present in his approach to poetry For Bachelard mathematical equation and poetic image alike break with everyday experience Reading poetic images brings us the experience of openness of newness says Bachelard The reader is called upon to continue the writer s images he is aware of being in a state of open imagination There is little place for abstract critical theory in Bachelard s view of Poetry Gaston Bachelard Subversive Humanist will interest literary scholars philosophers and intellectual historians

The Poetics of Reverie Gaston Bachelard,1971-06-01 In this his last significant work an admired French philosopher provides extraordinary meditations on the relations between the imagining consciousness and the world positing the notion of reverie as its most dynamic point of reference In his earlier book The Poetics of Space Bachelard considered several kinds of praiseworthy space conducive to the flow of poetic imagery In Poetics of Reverie he considers the absolute origins of that imagery language sexuality childhood the Cartesian ego and the universe Approaching the psychology of wonder from the phenomenological viewpoint Bachelard demonstrates the aurientative potential of all that awareness Thus he distinguishes what is merely a phenomenon of relaxation from the kind of reverie which poetry puts on the right track the track of expanding consciousness
