Philosophy Of Buddhism:

The Essentials of Buddhist Philosophy Junjiro Takakusu, Charles A. Moore, 2014-01-01 Buddhism had already spread far into other countries before it declined in India in the eleventh century A D Hinayana flourished in Ceylone Burma Siam and Cambodia Mystic Buddhism developed in Tibet Mahayana grew in China In Japan the whole of Buddhism became the living and active faith of the masses The present study relates to Japanese Buddhism as in Japan alone the whole of Buddhism is preserved The author presents Buddhist Philosophy in an ideological sequence and not in its historical sequence as Prof Stcherbatsky has done in his Buddhist logic But the ideological sequence as presented by the author is not the sequence in the development of ideas it is rather the systematization of the different schools of thought for the purpose of an easier approach Divided into fifteen chapters the book deals with different schools of Buddhist Philosophy The author has grouped these schools under two heads 1 the schools of negative rationalism i e the religion of Dialectic Investigation and 2 the schools of Introspective Intuitionism i e the Religion of Meditative Experience The author treats these schools in the most scientific and elaborate way

Verdu,1981-09-30 The riddles that world causation pose to the human mind lie at the bottom of all cosmological systems of thought In their origins all philosophical attitudes are conditioned by partiality and perspectivism The philosopher s attempted flight towards the seemingly remote kingdom of truth is often aborted by the binding twines of perspectival language Thus his insights lose themselves in conflicting contradictory manifestos Greek cosmology as it is formally set forth by the pre Socratics is a clear example of this weary pilgrimage of mind s embodied vision from angle to angle from perspective to perspective Not less is to be expected from the systems of Hinduism and mutatis mutandis also of Buddhist thought More confined from the very outset to the study of reality as a study of human existence of its awareness of embodiment of its spatio temporal bondage and of its ultimate ontological status Buddhism gave rise to truly astounding theories of life world causation The process of Buddhist thought as it refers to the nature of the human experience as in the world existence covers a vast range of doctrines from original theories of pluralism and phenomenalism with sectional multifarious and relativistic notions of causality through the unitary conceptions of monistic idealism up to the top of universal integrationism and dialectical totalism

The Philosophy of Buddhism Erich Frauwallner,2010 This translation first published in 1956 opens up a classic introduction to Buddhist thought to a broader English language readership The book covers the period of early canonical literature with examples of its philosophically relevant ideas followed by the principal philosophical concepts of systematic Sravakayana Buddhism In the main part of the book Frauwallner presents the first survey of the development of the philosophical systems of Mah ay ana Buddhism He was well aware of the limitations in presenting only the Buddhist

philosophy of the classical i.e. the systematic period and does not seem to have been ready to add the philosophically creative new post systematic tradition of Buddhist epistemology and logic a major subject of his research in subsequent years Frauwallner's way of translating was straight forward to remain as close as possible to the original text For technical terms in the source materials he maintained a single translation even when various meanings were suggested For clarity regarding such variations of meaning he relied on the context and his explanation The same approach was taken by the translator of the present book However he has inserted helpful additional headlines into the text and considerably enlarged the index All other additions by the translator are given within square brackets Philosophy of the Buddha Christopher W.
