

### **Statement of Educational Philosophy**

My educational philosophy stems from my own passion for life long learning that values learning for its own sake. This belief is at the heart of my educational practice and drives my own desire for continued professional development. My role as an educational leader is to facilitate a global awareness in students, enabling them to see the possible changes that they can enact in their own lives and the lives of others. I believe an authentic educational experience, in which each student's talents are fostered, will prepare students for the challenges that they will face when they leave our care. The basis of this authentic education is the primary goal of facilitating each student's self efficacy, thus helping individuals to develop a clear understanding of their unique attributes and individual potential.

At the core of an authentic and differentiated education there needs to be awareness that education is a reflection of our society as a whole; hence, the education system should constantly reevaluate its role and impact on society. Therefore, I constantly seek new methods and ideas to facilitate student learning. To meet this demand I regularly re-evaluate my professional standards and practices to meet the challenges my students will face not only on their educational journeys, but also in society as a whole.

Today's educators must constantly evolve to raise to the challenges of changing demographics, technology advances, and a growing post-secondary demand for balanced, insightful individuals. My unique personal and professional experiences and love of learning places me in a position to help St. Michaels University meet the educational challenges of the 21<sup>st</sup> century.
