Rudolf Steiner's biography presented from an educational point of view and also unfolds the different aspects of Steiner's educational thought in Waldorf Education. His point of view is unique in that it relates education to a wide horizon of different contexts such as social, pedagogical, evolutionary and spiritual aspects. His ideas are philosophical, ethical, epistemological, ontological. However, above all, they are based on spiritual understanding of the human being and the world. In many ways, they stand in stark contrast to the views that inform present mainstream educational thought and practice. Nevertheless, there are points where Steiner's ideas can find a resonance in more recent educational thought. Steiner was in many ways ahead of his time, and his educational ideas are still relevant to many present-day educational issues and problems.

*The Christ Impulse* Rudolf Steiner, 2014. Christ will reappear but in a higher reality than the physical one, in a reality which we will only see if we have first acquired a sense and understanding of spiritual life. Inscribe in your hearts what anthroposophy should be: a preparation for the great epoch of humanity which lies ahead of us. Rudolf Steiner's teachings of Christ and, in particular, what he refers to as the Christ impulse are unique. Christ, he says, is an objective universal force existing independently of Christian churches and confessions and working for the whole of humanity. The impulse that Christ brought to earth acts for the advancement of all people irrespective of religion, creed or race. Speaking in Berlin whilst still a representative of the largely eastern-oriented Theosophical Society, Rudolf Steiner presents multifaceted perspectives on the Christ impulse based on his independent spiritual research from the vast cycles of time preceding Christ's incarnation and the preparation for his coming to the actual physical embodiment of Christ in Palestine in Jesus of Nazareth some two thousand years ago. Steiner also describes how Christ will influence the future development of the earth and humanity. In his opening lecture, Rudolf Steiner discusses the nature of the Bodhisattvas and their role in relation to Christ and human evolution. The Bodhisattvas are the great teachers of humanity incarnating in human form during their passage through the various cycles of cultural development and are intimately involved in preparing the work of the Christ impulse. In other lectures, Steiner addresses subjects as diverse as the Sermon on the Mount in relation to the development of the faculty of conscience and the current duality of male and female microcosm and its correspondence in the cosmos macrocosm. The latter phenomenon is related to initiation within the Germanic and Egyptian mysteries which reach their higher unity in Christian initiation. Among the myriad other themes that emerge here are the introduction of the I or self in human development and its essential connection to Christ, the preparation of the Christ impulse through the Jahveh religion and the law of Moses, the meaning of the Ten Commandments and the new clairvoyance in relation to the appearance of Christ in the etheric.

**Rudolf Steiner** Roy Wilkinson, 2020-12-16. In many ways, Rudolf Steiner is the forgotten genius of recent times. A powerful thinker who developed an intricate spiritual philosophy based on his ability to research and perceive spiritual dimensions, Steiner is perhaps best known today for his legacy to education, medicine and agriculture. But behind these practical manifestations of his ideas lies a profound teaching which he called a science of the spirit or anthroposophy. In these

wonderfully succinct summaries of Steiner's thought Roy Wilkinson introduces us to aspects of this spiritual philosophy The twelve chapters are on the following themes Rudolf Steiner herald of a new age reincarnation and karma the spiritual nature of the human being the development of human consciousness evolution of the world and humanity relationships between the living and the dead forces of evil the modern path of initiation life between death and rebirth the spiritual hierarchies the philosophical approach to the spirit the mission of Christ     *Rudolf Steiner, Life and Work Volume 2 (1890-1900)* Peter Selg, 2015-08-01 The first chapter of this volume looks at Rudolf Steiner's years in Weimar beginning with his work at the Goethe Archives editing Goethe's scientific works It was in this capacity that Steiner was able to comprehend the great spiritual depth of Goethe's life and work which became the foundation for his own lifework This chapter also looks at his social circles and the writing and publication of his works Truth and Knowledge CW 3 and The Philosophy of Freedom CW 4 It also highlights his encounter with the work of Friedrich Nietzsche his visits to the Nietzsche Archives in Naumburg and the writing of his book Friedrich Nietzsche Fighter for Freedom CW 5 Rudolf Steiner's time in Weimar comes to a close with the creation of his second book on Goethe Goethe's World View CW 6 a fruit of his work at the Archives The second chapter focuses on Rudolf Steiner's time in Berlin where he worked as editor of a cultural periodical Magazin für Literatur and accepted a position as lecturer at the Workers School There he was able to grow into his capacity as a teacher and where although he encountered many ideological challenges his insight into historical development found wide appreciation among students The third chapter covers the turn of the century and Rudolf Steiner's inner transition to speaking and writing more openly of his esoteric observations on the evolution of consciousness the I and the training of cognition His decisive 1899 essay Individualism in Philosophy marked this impulse followed by invitations to lecture freely before the Theosophical Society where Rudolf Steiner presented the esoteric nature of Goethe's fairy tale and the content of what later became his own books Mystics after Modernism CW 7 and Christianity as Mystical Fact and the Mysteries of Antiquity CW 8     *Integral Economics* Ronnie Lessem, Alexander Schieffer, 2016-05-23 Why on earth is economics perceived to come in only one or at best two different cultural if not a moral guises There are real and many alternatives to the economic mainstream The trouble is of course that they are hidden from us In Integral Economics Ronnie Lessem and Alexander Schieffer pave the way for a sustainable approach to economics building on the richness of diverse economic approaches from all over the globe By introducing the most evolved economic perspectives and bringing them into creative dialogue they argue that neither individual enterprises nor wider society will be transformed for the better without a new economic perspective Here they introduce a comprehensive framework based on the same Four Worlds model that is applied to enterprise and research in their earlier works Given the richness of even mainstream economic theory reviewed in this book let alone the variety of alternative approaches introduced it is frustrating that policymakers and business practitioners are impoverished by a lack of apparent economic choice between a seemingly failing capitalism and an already failed communism The villains of the piece

in relation to this lack of choice are not so much the financial community and governments though they do have much to answer but the schools of economics and the business schools that have created the very social ethos the philosophical principles and the mathematical models that influence events Integral Economics is partly addressed to academics and students in those very schools who have either realized the error of their ways or less dramatically are curious to explore whether our businesses and communities could be run in a different way It will be welcomed by informed senior practitioners eager to understand the current rethink of economic theory and practice and to discover how to position themselves their organizations and their society within a new framework *Integral Economics* Dr Alexander Schieffer, Professor Ronnie Lessem, 2012-08-28 Why on earth is economics perceived to come in only one or at best two different a cultural if not a moral guises There are real and many alternatives to the economic mainstream The trouble is of course that they are hidden from us In *Integral Economics* Ronnie Lessem and Alexander Schieffer pave the way for a sustainable approach to economics building on the richness of diverse economic approaches from all over the globe By introducing the most evolved economic perspectives and bringing them into creative dialogue they argue that neither individual enterprises nor wider society will be transformed for the better without a new economic perspective Here they introduce a comprehensive framework based on the same Four Worlds model that is applied to enterprise and research in their earlier works Given the richness of even mainstream economic theory reviewed in this book let alone the variety of alternative approaches introduced it is frustrating that policymakers and business practitioners are impoverished by a lack of apparent economic choice between a seemingly failing capitalism and an already failed communism The villains of the piece in relation to this lack of choice are not so much the financial community and governments though they do have much to answer but the schools of economics and the business schools that have created the very social ethos the philosophical principles and the mathematical models that influence events Integral Economics is partly addressed to academics and students in those very schools who have either realized the error of their ways or less dramatically are curious to explore whether our businesses and communities could be run in a different way It will be welcomed by informed senior practitioners eager to understand the current rethink of economic theory and practice and to discover how to position themselves their organizations and their society within a new framework *Integral Polity* Ronnie Lessem, Ibrahim Abouleish, Louis Herman, 2016-05-23 Releasing the genius of an individual an enterprise and a society is a central pre occupation of the contemporary business environment A fascinating approach to how we can begin to tackle this challenge is presented by the authors of *Integral Polity* Integral spirituality integral philosophy and the integral age at an overall or holistic level of consciousness has therefore become a strong enough idea to form the genesis of a movement over the course of the last half century Taking as a starting point the ground breaking work of the Trans4m Centre for Integral Development this book applies such an integral notion to the realms of business economics and enterprise To be successful an integral approach must recognise the nuances of its environment an

integral approach in India is different from that in Indonesia or Iceland and they may in fact complement rather than conflict. Therefore this book also provides a fascinating alignment of such integrality with and between different southern and eastern, northern and western worlds. Using case studies ranging across the globe, this review of a newly integral theory and practice provides a new lease of life to what may increasingly be perceived as the self-seeking, insulated and occasionally violent and corrupt realm of the political.

**Integral Renewal** Ronnie Lessem, Alexander Schieffer, 2016-03-09

In 2010, Ronnie Lessem and Alexander Schieffer published their seminal work on *Integral Research and Innovation*, whereby they identified the four Rs: relational and renewal, reason and realization, based research paths that altogether encompass the major qualitative research methods and methodologies. Within each path, they identified a trajectory from origination to transformation via foundation and emancipation. However, these paths underlying the research process, conventionally termed method, were disconnected from the integral economic and enterprise content, conventionally termed literature, with which they were concerned. In this book, *Integral Renewal*, they seek to remedy such in two major respects. As transformative masters and PhD programs are focused on the Global South, where the vast majority of the world's population is based, as well as those developmental agencies focused on such the great majority of the people with whom the authors deal, select the relational research path and the path of renewal over and above the paths of reason and realization. The focus of this book will be on these two paths of integral research, now interconnected with integral enterprise and economics. Uniquely, the authors pursue research and innovation in a systematic way. In that respect, while their prior *Integral Research* book still provides the research foundation for the four southern and eastern, northern and western paths, this book will focus on the former two: relational, southern and renewal, eastern, from the combined perspectives of research process and economic and enterprise content.
