Philosophy Of Science Today:

Philosophy of Science Today Peter Clark (Ph. D.), Dr. Katherine Hawley, 2003 Philosophy of Science Today offers a state of the art guide to this fast developing area An eminent international team of authors covers a wide range of topics at the intersection of philosophy and the sciences including causation realism methodology epistemology and the philosophical foundations of physics biology and psychology *Current Controversies in Philosophy of Science* Shamik Dasgupta, Ravit Dotan, Brad Weslake, 2020-10-27 Current Controversies in Philosophy of Science asks twelve philosophers to debate six questions that are driving contemporary work in this area of philosophy The questions are I Are Boltzmann Brains Bad II Does Mathematical Explanation Require Mathematical Truth III Does Quantum Mechanics Suggest Spacetime is Nonfundamental IV Is Evolution Fundamental When It Comes to Defining Biological Ontology V Is Chance Ontologically Fundamental VI Are Sexes Natural Kinds These debates explore the philosophical foundations of particular scientific disciplines while also examining more general issues in the philosophy of science The result is a book that is perfect for the advanced philosophy student building up their knowledge of the foundations of the field and engaging with its cutting edge questions Preliminary descriptions of each chapter annotated lists of further readings for each controversy and study questions for each chapter help provide clearer and richer snapshots of active controversies for all readers *Philosophy of Science Today* Joy B. Plein, 1967 **HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY -Volume III** Pablo Lorenzano, Hans-Jörg Rheinberger, Eduardo Ortiz and Carlos Delfino Galles, 2010-09-27 History and Philosophy of Science and Technology is a component of Encyclopedia of Physical Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on History and Philosophy of Science and Technology in four volumes covers several topics such as Introduction to the Philosophy of Science The Nature and Structure of Scientific Theories Natural Science A Short History of Molecular Biology The Structure of the Darwinian Argument In The Origin of Species History of Measurement Theory Episodes of XX Century Cosmology A Historical Approach Philosophy of Economics Social Sciences Historical And Philosophical Overview of Methods And Goals Introduction to Ethics of Science and Technology The Ethics of Science and Technology The Control of Nature and the Origins of The Dichotomy Between Fact And Value Science and Empires The Geo Epistemic Location of Knowledge Science and Religion Scientific Knowledge and Religious Knowledge Significant Epistemological Reference Points Thing Called Philosophy of Technology Transitions from Function Oriented To Effect Oriented Technologies Some Thought on the Nature of Modern Technology Technical Agency and Sources of Technological Pessimism These four volumes are aimed at a broad spectrum of audiences University and College Students Educators and Research Personnel **The Material Realization of Science** Hans Radder, 2012-05-03 This book develops a conception of science as a multi dimensional practice which includes experimental action and production conceptual theoretical interpretation and formal mathematical work On

this basis it addresses the topical issue of scientific realism and expounds a detailed referentially realist account of the natural sciences This account is shown to be compatible with the frequent occurrence of conceptual discontinuities in the historical development of the sciences Referential realism exploits several fruitful ideas of Jürgen Habermas especially his distinction between objectivity and truth it builds on a in depth analysis of scientific experiments including their material realization and it is developed through an extensive case study in the history and philosophy of quantum mechanics The new postscript explains how the book relates to several important issues in recent philosophy of science and science studies I highly recommend this book Radder is probably the first philosopher of science to make productive epistemological use of the notion of experimental system The postscript is most valuable since it connects his work not only to the topical debates in philosophy of science but also to history of science and science studies Hans Jörg Rheinberger Max Planck Institute for the History of Science Berlin About the first edition The debate on realism has recently become rather stale by repetition but Radder introduces original insights and has written a lively and well argued contribution to it The book is to be recommended also as a clear introduction to the complex of relevant issues Mary Hesse University of Cambridge Radder presents an ingenious approach to the issue of scientific realism and conceptual discontinuity I believe his idea that conceptual discontinuity presupposes other types of continuity is extremely important Mark Rowlands University of Alabama Tuscaloosa Hans Radder is professor of philosophy of science and technology at VU University Amsterdam He is the author of In and About the World and The World Observed The World Conceived He edited The Philosophy of Scientific Experimentation and The Commodification of Academic Research Science and the Modern University and is coeditor of Science Transformed Debating Claims of an Epochal Break

New Horizons in the Philosophy of Science David Lamb, 1992 This collection of ten papers celebrates the diversity and richness of post positivist philosophy of science The contributors believe that new perspectives can be developed and that philosophical criticism can make a useful contribution to the search for new and fruitful scientific paradigms

The Structure of Scientific Theories Frederick Suppe, 1977 A clear and comprehensive introduction to contemporary philosophy of science American Scientist The best account of scientific theory now available one that surely commends itself to every philosopher of science with the slightest interest in metaphysics Review of Mathematics It should certainly be of interest to those teaching

Reconsideration of Science and Technology III Liu Dachun, Yang Huili, Fan Shanshan, 2022-09-30 Drawing on debates from traditional and postmodern thoughts on science and technology the title builds a new theoretical framework to reconsider science and technology integrating the opposing viewpoints that either justify science or negate it As the third volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world this final volume seeks to restore the cultural implications of science Across the six chapters the authors probe the prospect of a pluralistic scientific culture including discussions of diversified value choices the tension between

reason and unreason other binary characteristics of scientific knowledge including objectivity and uniqueness universality and locality as well as the loss awakening and reconstruction of scientific culture The authors call for a transformation of scientific culture from a dominant culture to an affirmative one and envision a free and open world of science and technology The volume will appeal to scholars and students interested in the philosophy of science and technology the ideology of scientism and anti scientism modernism and postmodernism Marxist philosophy and topics related to scientific culture

Legal science, philosophy Jacques Havet, 2019-06-04 No detailed description available for Legal science philosophy A Fallibilist Social Methodology for Today's Institutional Problems John Wettersten, 2021-12-13 This book identifies and explains far ranging consequences for methodology as a consequence of the observation that all rationality is social and highlights the need for methodological reforms in publications and interactions among colleagues and research programs The idea that all rationality is social needs to be part and parcel of all social scientific theories which means that their content must be changed Sociology needs to study the impact of social rules economics must revise assumptions about how individual rationality impacts financial developments and cognitive psychology must include social dimensions In addition there is also a need for moral theories that explain how social standards of behavior can be improved in specific institutional contexts **A Philosopher's Apprentice** Joseph Agassi, 2008 Both a Popper biography and an autobiography Agassi's *A Philosopher's Apprentice* tells the riveting story of his intellectual formation in 1950s London a young brilliant philosopher struggling with an intellectual giant father mentor and rival all at the same time His subsequent rebellion and declaration of independence leads to a painful break never to be completely healed No other writer has Agassi's psychological insight into Popper and no other book captures like this one the intellectual excitement around the Popper circle in the 1950s and the struggles of the 1960s and 1970s personal academic political all important philosophically Agassi's *Popper* whether one agrees with it or not is an enormous contribution to scholarship This second revised edition includes also Popper's and Agassi's last correspondence and in a postscript it shows Agassi leafing through Popper's archives reaching a sort of reconciliation an appropriate ending to the drama *A must read* Malachi Hachon Duke University *Scientific Understanding* Henk W. de Regt, Sabina Leonelli, Kai Eigner, 2014-08-09 To most scientists and to those interested in the sciences understanding is the ultimate aim of scientific endeavor In spite of this understanding and how it is achieved has received little attention in recent philosophy of science *Scientific Understanding* seeks to reverse this trend by providing original and in depth accounts of the concept of understanding and its essential role in the scientific process To this end the chapters in this volume explore and develop three key topics understanding and explanation understanding and models and understanding in scientific practice Earlier philosophers such as Carl Hempel dismissed understanding as subjective and pragmatic They believed that the essence of science was to be found in scientific theories and explanations In *Scientific Understanding* the contributors maintain that we must also consider the relation between explanations and the scientists who construct and use them They

focus on understanding as the cognitive state that is a goal of explanation and on the understanding of theories and models as a means to this end The chapters in this book highlight the multifaceted nature of the process of scientific research The contributors examine current uses of theory models simulations and experiments to evaluate the degree to which these elements contribute to understanding Their analyses pay due attention to the roles of intelligibility tacit knowledge and feelings of understanding Furthermore they investigate how understanding is obtained within diverse scientific disciplines and examine how the acquisition of understanding depends on specific contexts the objects of study and the stated aims of research

From Science to Emancipation Roy Bhaskar, 2013-06-17 From Science to Emancipation Alienation and the Actuality of Enlightenment is the second of three books elaborating Roy Bhaskar's new philosophy of metaReality which appeared in rapid succession in 2002 With a new introduction from Mervyn Hartwig this book contains some of the original transcripts and the questions and answers they provoked from a variety of lecture and workshop tours Roy Bhaskar presented for Indian audiences before this book was first published Because of the spontaneous and informal nature of these talks and discussions this book continues to provide the most immediate and accessible introduction to Roy Bhaskar's philosophy as it charts his intellectual journey The talks recorded here have retained an immediate local but also deeply universal interest From Science to Emancipation provides an indispensable resource for all students of philosophy and the human sciences

Critical Communication Theory Sue Curry Jansen, 2002-11-19 Critical theorist feminist and censorship expert Sue Curry Jansen brings a fresh perspective to contemporary communication inquiry Jansen engages two key questions at the heart of a critical politics of communication What do we know And how do we know it The questions are not unique to our era she notes but our responses to them are our own Looking at issues of globalization science politics gender social inequality and other social formations that shape our world this insightful book advocates a new agenda not only for communication research but also for the writing and language that comes out of it
