Freedom is the key issue for both Karol Wojtyla and Immanuel Kant that connects the Polish with the German philosopher. This analysis aims to show the importance of Kant's ethics in the work of Karol Wojtyla. Kant's paradigm shift in the anthropological thought was revolutionary. The categorical imperative obliges each person to act morally and thus elevates them. It is the foundation of human dignity not only for Kant but also for Wojtyla. Who is man? Is man free? Or is man materialistic? Man is determined and arrested in immanence. What should man do? Man is gifted with freedom. He is a person because he has the capacity to act. Wojtyla and Kant put special emphasis on a person's power of self-determination that reveals itself through the experience as a freely acting person. The realisation of the personal norm, the categorical imperative, was defined by both thinkers as a fulfilment of freedom. Freedom shall be fulfilled in the responsible act which reveals the person's power of love.

*The Human Person* Thomas L. Spalding, James M. Stedman, Christina L. Gagné, Matthew Kosteletzky, 2019-12-13. This book introduces the Aristotelian Thomistic view of the human person to a contemporary audience and reviews the ways in which this view could provide a philosophically sound foundation for modern psychology. The book presents the current state of psychology and offers critiques of the current philosophical foundations. In its presentation of the fundamental metaphysical commitments of the Aristotelian Thomistic view, it places the human being within the broader understanding of the world. Chapters discuss the Aristotelian Thomistic view of human and non-human cognition as well as the relationship between cognition and emotion. In addition, the book discusses the Aristotelian Thomistic conception of human growth and development, including how the virtue theory relates to current psychological approaches to normal human development, the development of character problems that lead to psychopathology, current conceptions of positive psychology and the place of the individual in the social world. The book ends with a summary of how Aristotelian Thomistic theory relates to science in general and psychology in particular. *The Human Person* will be of interest to psychologists and cognitive scientists working within a number of subfields including developmental psychology, social psychology, cognitive psychology and clinical psychology, and to philosophers working on the philosophy of psychology, philosophy of mind and the interaction between historical philosophy and contemporary science as well as linguists and computer scientists interested in psychology of language and artificial intelligence.
