Scholars' Guide to Humanities and Social Sciences in the Soviet Union and the Baltic States Tigran

Martirosyan, Silvia Maretti, S. Frederick Starr, 2019-11-21 In the years since the first edition of the Guide was published the research institutions of the academies of sciences of the USSR and the republics have undergone several sometimes radical reorganizations and reaffiliations This guide to academy institutions supplies names addresses and historical research and organizational profiles for each institution with summary information on staffing current projects special facilities and libraries The end of the Cold War has brought with it many changes of attitude and policy in the political arena however nowhere has change been so emotionally charged as in the area of politically based emigration Refugee policy is the driving force behind many of today s headlines influencing both foreign and domestic policy In Desperate Crossings authors Norman L and Naomi Flink Zucker chronicle and analyze the phenomenon of mass escape that began with the Haitians but exploded into the American consciousness in the spring of 1980 with the Mariel boatlift and the subsequent mass exodus from Central America and was most recently manifested in the Haitian and Cuban exoduses of 1994 In a compelling and carefully documented narrative they identify the troika of interests foreign policy domestic pressures and costs that have controlled and determined the American response to refugees since before the Second World War continuing until today Desperate Crossings concludes by proposing a comprehensive and politically palatable approach to future refugee flows both in our hemisphere and for the world community at large including Europe and Asia The authors suggest how by changing the course of its refugee policies and programs the United States can better respond to both the needs of refugees and the demands of its citizens

A Philosophy of Social

Progress (Classic Reprint) E. J. Urwick, 2017-11-23 Excerpt from A Philosophy of Social Progress I will make bold to state my heresies dogmatically Sociology is commonly described as the science of social life I do not believe that there is or can be any science of social life nor do I believe that sociology is or can be a science There is a little scientific knowledge of some few of the conditions under which we socii live of some few of the activities in which our social life is manifested What passes for sociology is a collection of generalizations of very varying value and it is inevitable that most social generalizations shall be at once more or less dignified guesses and more or less disguised ex pressions of the hopes and fears the prejudices and beliefs of their originators There may however be a philosophy of social life or rather of social change but this will be transcendental of course and will always be very closely analogous to a religious faith It will vary from age to age just as the forms of faith do that is to say the expression of its dominant conceptions will vary About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish

Social Adaptation Lucius Moody Bristol,1915 *China's Plan for Economic and Social Development* Jun Yin,Jia Xu,2022-10-11 This book reviews the basic process of China s fourteen five year plans with systematic theoretical overview and rich historical data and moves on to discuss the theoretical logic of plan based state governance The authors hold that the five year planning system with Chinese characteristics is a flexible planning system through adaptive macro planning and incentive target governance it mobilizes government market and social forces to work together to fulfill national objectives and is a representative mechanism of the state governance system and a symbol of modernized state governance capacity From an academic point of view it theoretically answers questions about what why and how concerning the five year plans From an interdisciplinary perspective it explores the theoretical logic and experience of plan based governance by combining Marxism western theories and the science of history Also it tries to represent historical facts based on a vast literature about the history of CPC and PRC reviews historical details of the previous thirteen five year plans and describes the great journey of the plan preparation and implementation under the CPC leadership This book has been published in Simplified Chinese Peking University Press and Traditional Chinese Hong Kong Open Page Press It has won the 2021 Annual Books of China Economics Education and Research Network the first prize of excellent Works of the First Young Marxism Prize 100 Red Classic Reading recommended reading books of Jiangsu National Reading Activity Leading Group celebrating the Centennial of the Founding of the Party and Jintai Good Books of People s Daily Library *The Rise and Fall of Liberal Protestantism in America*

David R. Carlin,2022-04-07 When I speak of liberal Protestants I have in mind those Protestants who feel free to depart from classical Protestantism the Protestantism of the Reformers in order as they see it to keep Christianity in step with the best of secular wisdom a secular wisdom that often includes attacks on Christianity Over the past 250 years there have been three great attacks on Christianity deism agnosticism and the sexual revolution And so beginning with Unitarianism more than 200 years ago liberal Protestantism has adjusted to these attacks by dropping more and more of traditional Christian doctrine until today the more advanced liberal Protestants are only barely distinguishable from atheists

Reconsideration of Science and Technology II Liu Dachun,Ai Zhiqiang,Yang Huili,2022-09-30 In reviewing and reconsidering the intellectual history of scientism and antiscientism the authors assess the process of reasoning and prejudices of these contrasting viewpoints while discussing the repercussions of scientific hegemony and its contemporary criticism As the second volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world this title focuses on ideological trends

centering around scientism and anti scientism since the 19th century The six chapters look into the emergence of scientism instrumental reason scientific optimism scientific pessimism scientific crisis and irrationalism and finally the deconstruction of scientism The authors provide insight into the connections and biases of these disparate views and critiques explore the influences of the hegemony of science and contemporary critique of science and evaluate the value of postmodernism and deconstructivism The volume will appeal to scholars and students interested in the philosophy of science and technology the ideology of scientism and anti scientism modernism and postmodernism Marxist philosophy and topics related to scientific culture

The Politics and Rhetoric of Scientific Method J. Schuster,R.R. Yeo,1986-04-30 The institutionalization of History and Philosophy of Science as a distinct field of scholarly endeavour began comparatively early though not always under that name in the Australasian region An initial lecturing appointment was made at the University of Melbourne immediately after the Second World War in 1946 and other appointments followed as the subject underwent an expansion during the 1950s and 1960s similar to that which took place in other parts of the world Today there are major Departments at the University of Melbourne the University of New South Wales and the University of Wollongong and smaller groups active in many other parts of Australia and in New Zealand Australasian Studies in History and Philosophy of Science aims to provide a distinctive publication outlet for Australian and New Zealand scholars working in the general area of history philosophy and social studies of science Each volume comprises a group of essays on a connected theme edited by an Australian or a New Zealander with special expertise in that particular area Papers address general issues however rather than local ones parochial topics are avoided Further more though in each volume a majority of the contributors is from Australia or New Zealand contributions from elsewhere are by no means ruled out Quite the reverse in fact they are actively encouraged wherever appropriate to the balance of the volume in question

Complexity Perspectives in Innovation and Social Change David Lane,Denise Pumain,Sander Ernst van der Leeuw,Geoffrey West,2009-02-13 Innovation is nowadays a question of life and death for many of the economies of the western world Yet due to our generally reductionist scientific paradigm invention and innovation are rarely studied scientifically Most work prefers to study its context and its consequences As a result we are as a society lacking the scientific tools to understand improve or otherwise impact on the processes of invention and innovation This book delves deeply into that topic taking the position that the complex systems approach with its emphasis on emergence is better suited than our traditional approach to the phenomenon In a collection of very coherent papers which are the result of an EU funded four year international research team's effort it addresses various aspects of the topic from different disciplinary angles One of the main emphases is the need in the social sciences to move away from neo darwinist population thinking to organization thinking if we want to understand social evolution Another main emphasis is on developing a generative approach to

invention and innovation looking in detail at the contexts within which invention and innovation occur and how these contexts impact on the chances for success or failure Throughout the book is infused with interesting new insights but also presents several well elaborated case studies that connect the ideas with a substantive body of real world information

Ori-Oke Spirituality and Social Change in Africa Nathanael Yaovi, U. Nwosu, 2018-09-17 The dynamic nature of Christianity has necessitated its movement from the cathedral to the mountain top This has occasioned a proliferation of Prayer Mountains throughout Africa In Yorubaland of southwestern Nigeria Prayer Mountain is known as Ori Oke Like many communities in Africa the Yoruba are confronted with fundamental challenges in life for which people do not rest until they find solutions Within the praxis of Nigerian Christian lexicon Ori Oke is synonymous with the enactment of a sacred space on a mountain top characterised by various prayer regimes rituals exorcism and religious practices aimed at eliciting the help of the divine to alleviate the existential challenges of devotees This book explores the resacralisation of space on the mountains highlighting how humans and the divine interact in Yorubaland It brings into conversation 35 empirically rich scholarly essays on the role of Ori Oke to those seeking divine intervention in their lives Today Ori Oke have become centres of pilgrimage as a result of the lived experiences of devotees creating unique religious value quite distinct from the aesthetic value of these mountain tops The spirituality of Ori Oke is anchored on the absolute belief in God and the infusion of traditional African worldview sensibilities in religious rites and worship Ori Oke spirituality employs resources of Christian tradition introduced by the formal agents of Christianity synthesised with traditional culture to develop a life based on the precepts of an African Christianity The book is an intellectual discourse on Ori Oke spirituality reflecting its contemporary relevance in a context of religious innovation and competition

APAIS 1994: Australian public affairs information service , Darwinian Social Evolution and Social Change William

Kerr, 2021-07-29 This book introduces the value of a Darwinian social evolutionary approach to understanding social change The chapters discuss several different perspectives on social evolutionary theory and go on to link these with comparative

and historical sociological theory and two case studies Kerr brings together social change theory and theories on nationalism whilst also providing concrete examples of the theories at work The book offers a vision of rapprochement between these different areas of theory and study and to where this could lead future studies of comparative history and sociology As such it should be useful to scholars and students of nationalism and social change sociologists political scientist and historians
