The Awakening of Faith and New Confucian Philosophy, 2021-10-25 This innovative volume demonstrates how and to what ends the writings of Xiong Shili Ma Yifu Tang Junyi and Mou Zongsan adopted and repurposed conceptual models derived from the Buddhist text Treatise on Awakening Mah y na Faith It shows which of the philosophical positions defended by these New Confucian philosophers were developed and sustained through engagement with the critical challenges advanced by scholars who attacked the Treatise It also examines the extent to which twentieth century New Confucians were aware of their intellectual debt to the Treatise and explains how they reconciled this awareness with their Confucian identity

The Medieval Heritage in Early Modern Metaphysics and Modal Theory, 1400-1700 R.L. Friedman, L.O. Nielsen, 2013-04-17 On the most basic level the articles brought together in the present volume aim to contribute to the charting of the often subtle links between the medieval and early modern periods in the fields of metaphysics philosophical theology and modal theory In selecting this line of inquiry the volume is consciously intended to offer support for the stance that in the higher or speculative sciences no sharp divide exists between the later Middle Ages on the one hand and the Renaissance and early modern period on the other In adopting such an approach one emphasizing historical continuity instead of discontinuity the volume can be seen as challenging at least two related sets of convictions concerning the intellectual life of the period 1400 1700 First prominent Renaissance and early modern thinkers portrayed their own intellectual projects and accomplishments as radical breaks with the scholasticism characteristic of the Middle Ages and also dominant in their own time the volume to no small extent takes as its point of departure a reluctance or at least a hesitation to accept these bold claims Second a large part of nineteenth and twentieth century historiography has taken the Renaissance and early modern claims of fundamental innovation at face value in emphasizing the continuity that exists between the thought of the medieval and of the early modern periods the volume is part of an attempt to offer a more balanced view of the intellectual production of the later period

Dictionary of Modern American Philosophers John R. Shook, 2005-01-01 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in

the development of psychology pedagogy sociology anthropology education theology politicalscience and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought
