

# BELIEF SYSTEMS

## DEFINITION

Belief systems are structured sets of principles or tenets held to be true by individuals or larger groups, encompassing aspects such as morality, life purpose, or empirical reality. They profoundly influence human behavior, shaping individual code of conduct, societal actions, values, and perceptions.

## TYPES

**Religious** - These are belief systems that explain the origins of the universe, the existence of gods, and can set out moral codes.

**Political** - These are belief systems that explain how societies should be managed and governed, and are often based on ideas about power and resource distribution..

approaches in the field of religious studies Provides a manifesto for a global approach to the subject that is a practice centred rather than a belief centred activity Gives attention to reflexive critical studies of religion as socially constructed and historically located

**Rationality, Religious Belief, and Moral Commitment** Robert Audi, William J. Wainwright, 1986

This book is unified by three broad concerns the rationality of belief in God the relation between religion and morality and the explication of the concept of God The essays are however marked by diversity Some focus on historical figures such as Aquinas and Locke others bring recent epistemological and metaphysical developments to bear on problems of religious belief Some of the papers explore neglected issues central to religious practice such as the question of how total devotion to God can permit other deep commitments others apply philosophical distinctions from within a religious tradition for example in setting out a Christian approach to the problem of evil

*Philosophy of Religion* Brian Davies, 1998 This is a textbook and reference work by some of the world's leading philosophers of religion. Philosophy of religion is concerned with such questions as: Does God exist? Can God's existence be proved? What is God like? Is there life after death? Can philosophy throw light on the diversity of religious beliefs? And what can science tell us about religious matters.

*Reason to Believe* Richard Purtill, 2009-09-03 Is religious belief reasonable? Of course, the so-called New Atheists such as Richard Dawkins and Sam Harris energetically say No. Many others, including some believers, insist that faith is utterly beyond reasoned argument. Faith, they declare, is believing something that reason tells you can't be so. In this way, they think, they shield belief from rational criticism. But philosopher Richard Purtill will have none of that approach to religion. In this newly updated classic work, Purtill carefully applies the power of the mind to understanding whether there is a rational basis for certain religious beliefs. His focus is on widely held Christian beliefs, although much of what he says applies also to other religious traditions. Purtill assesses the common objections to religious belief: the claims that religious tenets are nonsensical, wishful thinking, the result of gullibility, immoral, or refuted by modern discoveries. Then he considers the arguments in favor of Christian belief by studying the nature of faith, the universe, morality, happiness, and the world with God in it. He also scrutinizes certain beliefs involving claims of Christian revelation, the credentials of revelation, the idea of God, Jesus as God's Son, organized religion, and the last things: death, judgment, heaven, and hell. The two appendices tackle the Christian doctrine of the Atonement and the influence of certain Christian writers on the revival of Christian belief in the 20th century. An updated For Further Reading section is included. *Reason to Believe* is not a work of revealed theology or religious devotion; it is a highly readable book on the philosophy of religion aimed at the reader who wants to think seriously about religion but who doesn't know all the philosophers' and theologians' jargon and who may or may not be a committed believer.

**Feminist Philosophy of Religion** Pamela Sue Anderson, Beverley Clack, 2004 *Feminist Philosophy of Religion: Critical Readings* brings together key new writings in this growing field.

**Reason and Religion** Herman Philipse, 2022-04-28 Combines philosophical investigations concerning the truth of religious convictions with empirical research on the origins and functions of religious beliefs. This book focuses on two core questions: 1. How probable is it that any particular god exists? 2. How should we account for the occurrence of religious beliefs in human societies?

*Reason and Religious Belief: an Introduction to the Philosophy of Religion* :, 2015 *Reason and Religious Belief* now in its fifth edition explores perennial questions in the philosophy of religion. Drawing from the best in both classical and contemporary discussions, the authors examine religious experience, faith, and reason, the divine attributes, arguments for and against the existence of God, divine action in various forms of theism, Reformed epistemology, religious language, religious diversity, and religion and science.

*Reading Philosophy of Religion* Graham Oppy, Michael Scott, 2010-04-26 *Reading Philosophy of Religion* combines a diverse selection of classical and contemporary texts in philosophy of religion with insightful commentaries. Offers a unique presentation through a combination of text and interactive commentary. Provides a

mix of classic and contemporary texts including some not anthologized elsewhere Includes writings from thinkers such as Aquinas Boethius Hume Plantinga and Putnam Divided into sections which examine religious language the existence of God reason argument and belief divine properties and religious pluralism
