takes the reader through the ideas of the most important post modern thinkers giving a clear summary of the essential points of their ideas and how they relate to current and future psychotherapy theory and practice **Philosophy's Role in Counseling and Psychotherapy** Peter Raabe,2013-11-26 In **Philosophy's Role in Counseling and Psychotherapy** Peter Raabe argues that philosophy is an effective method in treating mental illness Calling for a paradigm shift away from the standard belief that the brain and mind are identical Raabe argues that so called mental illnesses such as depression and schizophrenia are not the actual causes of psychological misery Instead they are just labels for symptoms For example the word depression is merely a label attached to a collection of symptoms such as sadness hopelessness and low self esteem Raabe posits that distressing or painful life events can cause symptoms that are often clinically labeled as the mental illness of depression The suffering brought on by painful life events can often be alleviated with helpful discussions and without resorting to medications Because philosophy is the foremost form of discussion it means that the suffering that is labeled mental illness can be treated and even cured with philosophy Raabe ultimately concludes that philosophy is beneficial in three ways it can prevent the onset of a so called mental illness in the person who studies it it can be used to help individuals suffering from the distress that is labeled mental illness and it will enhance the competence of the counselor or therapist who practices it **The SAGE Handbook of Counselling and Psychotherapy** Terry Hanley,Laura Anne Winter,2023-02-02

Freud's Converts Vicki Clifford,2020-06-16 This work is an exploration of the relationship which psychotherapy has with religion Sigmund Freud and Carl Rogers were chosen for this exposition because they were each seduced by the high status given to science Freud and Rogers both founders of psychotherapies left a legacy which is not that of scientists whom they claimed they were Freud and Rogers each had a problematic relationship with religion This has had a lasting effect on the work and attitudes of their

respective followers In order to explore effectively this relationship the work begins with a critical examination of the historical context in which both Freud and Rogers worked and how in their determination to be scientists both missed the importance of the religious The work continues with an exploration of the effects of this legacy on the work of contemporary psychotherapists The context in which their followers work relies on a relationship with the founder which goes beyond that of science and in addition each practitioner is influenced by socio economic circumstances which are peculiar to them The resistance from psychotherapists to embrace religion has been complex although as it will be illustrated today there are some who are acknowledging the importance of the spiritual That psychotherapy functions as a religious movement has been excluded by practitioners in their determination to reflect the wishes of their founder which was that their work should be regarded as science Psychotherapists have traditionally been considered the custodians of the real and that their clients are the ones suffering from delusions With respect to their attitudes to religion not least the spiritual the positions seem to be reversed
