The Ultimate Harry Potter and Philosophy William Irwin,Gregory Bassham,2010-08-13 A philosophical exploration of the entire seven book Harry Potter series Harry Potter has been heralded as one of the most

popular book series of all time and the philosophical nature of Harry Hermione and Ron's quest to rid the world of its ultimate evil is one of the many things that make this series special. The Ultimate Harry Potter and Philosophy covers all seven titles in J K Rowling's groundbreaking series and takes fans back to Godric's Hollow to discuss life after death to consider what moral reasoning drove Harry to choose death and to debate whether Sirius Black is a man or a dog. With publication timed to coincide with the release of the movie Harry Potter and the Deathly Hallows Part 1, this book will be the definitive guide for all fans looking to appreciate the series on a deeper level. Covers a range of intriguing topics such as the redemption of Severus Snape, the power of love and destiny in the wizarding world. Gives you a new perspective on Harry Potter characters, plot lines and themes. Makes a perfect companion to the Harry Potter books and movies. Packed with interesting ideas and insights. The Ultimate Harry Potter and Philosophy is an ideal companion for anyone interested in unraveling the subtext and exploring the greater issues at work in the story.

The Book of Mind Dr. Thomas Stark, Discover how ontological mathematics explains telepathy, homeopathy, out of body experiences, near death experiences, the placebo effect, déjà vu, jamais vu, reincarnation, demonic possession, enlightenment, the afterlife, the soul and God. When scientific materialism and empiricism is replaced with scientific idealism and rationalism, everything about science changes. Mind replaces matter as the basis of existence. Reason and logic, not the fallible human senses, become the means to discover ultimate reality. The Principle of Sufficient Reason and Occam's razor replace sensory experiments as the route to reliable knowledge. A universe of spacetime only is replaced by a universe of spacetime AND non-spacetime. Non-spacetime is an immaterial frequency singularity which serves as a Cosmic Mind. The Cosmos is a hologram inside the Cosmic Mind, just as a dreamworld is a hologram inside your individual mind. Are you ready to overcome the reducing valve of human consciousness and expand your mind to the maximum?

Technology Education for Teachers P. John Williams, 2013-02-11 This is a textbook for use in technology teacher training and also a reference book for technology teachers. It will provide a foundation for new teachers entering the area of technology and also the opportunity for practicing teachers to keep up to date with research-informed ideas about teaching technology. Technology in the curriculum has continually faced a range of challenges throughout its history in many countries. Often the basis of the challenges is the result of a lack of understanding about good technology practice. It is hoped that this book can encourage excellent practice in technology teaching and so increase the number of schools positively engaged with technology. The chapter authors are internationally respected and experienced educators who have been able to draw on both their teaching experience and their research in order to discuss a range of aspects of teaching technology. The book has been developed with an international audience in mind. While authors are naturally most familiar with their own country, efforts have been made to generalize from the principles of sound theory and research-based practice to maximize applicability to local contexts. John Williams is the Director of the Technology, Environmental Mathematics and Science Education Research Centre at the University of Waikato in New Zealand. He has

worked as a designer and builder and began his career as a secondary school Manual Arts teacher He has taught and studied in Australia and the USA and in a number of African and Indian Ocean countries He has published and presented widely and enjoys fishing The Stoic Art of Living Tom Morris, Thomas V. Morris, 2004 Tom Morris's exuberant seminars and presentations to business leaders have taken the commanding heights of corporate America by storm and his books on philosophy for businesspeople have sold millions Dr Morris shows how the ideas of Stoic Philosophy which emphasizes goals like gaining command of one's passions and achieving indifference to pain and distress are completely up to date in their relevance to the practical issues people confront in the 21st century Divided into three sections Dr Morris sympathetically relates the life and intellectual achievements of the three leading Stoics the slave Epictetus the lawyer Seneca and the Roman emperor Marcus Aurelius From the bottom of society to the upwardly mobile middle and all the way to the top these thinkers saw life deeply Paradigm Shift Martin Cohen, 2015-09-09 Why do giraffes have long necks It can't really be for reaching tasty leaves since their main food is ground level bushes tidy though that explanation would be And how does relativity theory cope with the fact that the observable universe defies prediction by being far too small and anything but homogeneous By inventing a vastly larger but invisible universe And what exactly should we make of the scientists who claim to be witnessing thought itself when the changes of blood flow in the brain that they observe are a thousand times slower than the neuronal activity it is supposed to reveal A little scepticism is in order Yet if philosophers of science from Thomas Kuhn to Paul Feyerabend have argued that science is a more haphazard process driven by political fashion and short term economic self interest today almost everyone seems to assume it is a vast jigsaw of interlocking facts pieced slowly but steadily together by expert practitioners In this witty but profound 21st century update on the issues Martin Cohen offers vital clues for understanding not only the way knowledge develops but also into the dangers of accepting too readily or too uncritically the claims of experts of all kinds even philosophical ones The claims are invariably presented as objective fact yet are rooted in human subjectivity
