Stepień, 2020-11-01 Can literature reveal reality Is philosophical truth a literary artifice How does the way we think affect what we can know Buddhism has been grappling with these questions for centuries and this book attempts to answer them by exploring the relationship between literature and philosophy across the classical and contemporary Buddhist worlds of India Tibet China Japan Korea and North America Written by leading scholars the book examines literary texts composed over two millennia ranging in form from lyric verse narrative poetry panegyric hymn and koan to novel hagiography secret autobiography autofiction treatise and sutra all in sustained conversation with topics in metaphysics ethics aesthetics and the philosophies of mind language literature and religion Interdisciplinary and cross cultural this book deliberately works across and against the boundaries separating three mainstays of humanistic pursuit literature philosophy and religion by focusing on the multiple relationships at play between content and form in works drawn from a truly diverse range of philosophical schools literary

Divined Explanations. The Theological and Philosophical Context for the Development of the Sciences (1600-2000) ,2024-12-02 Critical junctures in the historical development of science owe their origins to ideas concepts and theories that became definitive in the minds of leading scientists who lived in a more or less religious culture Scientists are never solitary but always internal to a network of scientific relationships and friendships They have a well attested genius nurtured not only by their scientific training but also by ideas and stimuli received from the cultural and social contexts in which they lived In particular metaphysical and theological aspirations guided the genesis of many scientific ideas This book offers twelve examples of the development of scientific ideas that were shaped by religious factors and which changed the course of science itself The interwoven nature of science philosophy theology and culture is pervasive in these cases thus

demonstrating that throughout the modern era natural philosophy enjoyed a deep coherence with theology That entanglement lingers in the minds of scientists into the contemporary period and it continues to nourish scientific creativity in subtle and profound ways New explanations of the world have emerged through illuminative revolutionary and one might say divined ways
