of education can contribute to political and social discourse or whether it is destined to remain the marginal gadfly of mainstream ideology The philosophy of education stands in danger of becoming a neglected field at precisely the moment we need to be able to reflect upon the increasingly apparent costs of the technocratic attitude to education While many of the educational policy discussions of recent years seem far reaching and radical critical debate surrounding these initiatives remain largely at a populist level New Perspectives in Philosophy of Education provides contemporary responses to philosophical issues that bear upon educational studies policies and practices contributing to the debate on the role of philosophy of education in an increasingly fractured intellectual milieu **American Educational History Journal J.** Wesley Null, 2008-07-01 The American Educational History Journal is a peer reviewed national research journal devoted to the examination of educational topics using perspectives from a variety of disciplines The editors of AEHJ encourage communication between scholars from numerous disciplines nationalities institutions and backgrounds Authors come from a variety of disciplines including political science curriculum history philosophy teacher education and educational leadership Acceptance for publication in AEHJ requires that each author present a well articulated argument that deals substantively with questions of educational history **Historical Foundations of Education** Theodore Michael Christou, 2023-03-23 This volume considers history as a foundational discipline in education It shows how history is a means for exploring what it means to be human by considering those stories sources forces and contexts that shape the way we construct narratives History is more than content no matter what we might recall from our experiences in schools The volume shows how studying history is one means of uncovering why institutions beliefs policies and practices are as they are Educational structures are like all things mutable History empowers the individual to be an actor in this process of change and to act judiciously About the Educational Foundations series Education as an academic field taught at universities around the world emerged from a range of older foundational disciplines The Educational Foundations series comprises six volumes each covering one of the foundational disciplines of philosophy history sociology policy studies economics and law This is the first reference work to provide an authoritative and up to date account of all six disciplines showing how each field's ideas methods theories and approaches can contribute to research and practice in education today The six volumes cover the same set of key topics within education which also form the chapter titles Mapping the Field Purposes of Education Curriculum Schools and Education Systems Learning and Human Development Teaching and Teacher Education Assessment and Evaluation This structure allows readers to study the volumes in isolation by discipline or laterally by topic and facilitates a comparative thematic reading of chapters across the volumes Throughout the series attention is paid to how the disciplines comprising the educational foundations speak to social justice concerns such as gender and racial equality [Philosophers on Education](#) Amélie Rorty, 1998 Philosophers on Education offers us the most comprehensive available history of philosopher's views and impacts on the directions of education As Amélie Rorty explains in describing a history of education we are

essentially describing and gaining the clearest understanding of the issues that presently concern and divide us The essays in this stellar collection are written by some of the finest contemporary philosophers Those interested in history of philosophy epistemology moral psychology and education and political theory will find *Philosophers on Education* to be both an engaging and fascinating read
