content and the affective side of thought as opposed to one another Our Uncertain World Leslie Sawin, 2023-12-20 We live in times of uncertainty and anxiety In these times how can we best navigate our unknowns Our Uncertain World answers that question through a Jungian prism Carl Jung's theory has helped many people through difficult times Jungian perspectives facilitate such challenging navigation by not simplifying complexity but rather by finding the meaningful through lines that guide the individual toward individuation even in the darkest of times Using Jung's unique multi-dimensional approach this book offers insights and provides answers to questions about life in a state of three-dimensional flux Our Uncertain World was born from the premise that we are in a period of ongoing change The interlocking crises of COVID national polarization environmental disaster and international war can undermine or even destroy the symbols rituals and mental structures that give meaning and coherence to our lives These crises are explored in depth In the book's three sections Living with Personal Uncertainty over the Long Term Social Turmoil A Moment of Social change for Our Community and Our Nation and Challenges Facing Our World Grappling with the Environment The Pandemic and War The authors of this book accompany the reader through the current challenges we face and examine new ways of adjusting to the existing condition of protracted uncertainty The book encourages the reader to articulate their own challenges and develop their own language to write speak and live within the reality of uncertain times Our Uncertain World provides tools for individuals and groups to formulate new perspectives and life strategies for the current reality Climate, God and Uncertainty Arthur C. Petersen, 2023-11-28 Climate God and Uncertainty moves beyond Bruno Latour's thought to understand what climate change means for philosophical anthropology and wider culture What are for example the philosophical implications of climate change and its associated uncertainties Referring mainly to works by Latour William James and Heinrich Rickert Petersen develops transcendental naturalism to reinterpret the interface between science and politics in the context of climate change He highlights for instance issues such as the religious disenchantment of nature the scientific disbelief in a plurality of value-laden perspectives and the disregard for non-modern worldviews in politics In developing its argument the book makes a methodological intervention on the sort of naturalism that guides both Latour's work and a large part of the academic field called science and religion Praise for Climate God and Uncertainty The challenges of a changing climate raise disturbing questions about being human in the world ones that cannot adequately be answered through scientific inquiry In this original interrogation and extension of the work of Bruno Latour Petersen constructs a philosophical position that takes seriously the realities of a changing natural world the human search to ground our sense of value and the possibility of God Climate God and Uncertainty is an exciting new addition to the small but growing literature on climate change religion and philosophy Mike Hulme University of Cambridge This innovative and exciting work explores the rich potential of transcendental naturalism as a bridge between science and religion Drawing on the work of William James Heinrich Rickert and Bruno Latour Petersen maps out a fresh approach that goes beyond current accounts of naturalism opening up a deeply satisfying

account of our engagement with the natural world Alister McGrath Emeritus Andreos Idreos Professor of Science and Religion University of Oxford How to live with the pervasive reality of uncertainty and a plurality of perspectives in science religion and politics without playing down the sciences and our responsibilities The transcendental naturalism Arthur Petersen articulates in this book respects science while leaving room for other elements wonder judgements and values and the way we construct provisional models of reality These issues are especially acute in the context of climate change when we face the interplay of science and policy Petersen stresses the importance of imagination to articulate meaning and of recognising a plurality of value laden perspectives striving for responsible action and sensitivity to that which may escape planning and policy This book can be read fruitfully in at least two ways as a highly relevant reflection on religion and science in the face of climate change and as a profound philosophical analysis of pluralism and provisionality and hence of living with uncertainty Willem B Drees Professor Emeritus of Philosophy of Religion and Ethics Leiden University and of Philosophy of the Humanities Tilburg University *Keynes, Uncertainty and the Global Economy* Sheila C. Shook, 2005-01-01 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought [The Philosophy of Environmental Emotions](#) Ondřej Beran, Laura Candiotti, Niklas Forsberg, Antony Fredriksson, David Rozen, 2024-12-09 This volume presents new philosophical perspectives on environmental emotions It explores the motivating nature of emotions such as anger grief and hope in relation to the current climate crisis Many of our emotional responses to the climate crisis take a distressed form like anxiety despair or grief However these emotions almost always coexist with hope a drive toward action or a strengthened sense of relationality and belonging This book explores the different levels at which these tensions take place Part I discusses the conceptual and linguistic notions we use to make sense of our ecological predicament Part II looks at the embedded dimension of our emotions how we feel about the climate crisis as members of our communities and how our emotions are interconnected with what we do and how we work in and for our communities Several chapters in this

section explicitly discuss hope Finally Part III has a phenomenological and existential focus it explores the nature of the rootedness and how it shapes our emotional experiences during the climate crisis The Philosophy of Environmental Emotions will appeal to scholars and graduate students working in environmental philosophy philosophy of emotion and environmental psychology
