**Photo Impressionism and the Subjective Image** Freeman Patterson, André Gallant, 2001 In Photo Impressionism and the Subjective Image the authors show how photographs can be used to alter physical reality to express the photographer's personal response to specific subject matter. The impressionist photographer deliberately abandons physical exactitude to convey the reality of feelings more effectively. This book explains how to venture into the non-literal world of photography to create and record impressions that express emotion, feelings and spirit. The first part of the book includes instructional topics such as Multiple exposures, Montages, Subtle and vibrant colors, Selective focus, exposure and speed, Creative image transfer techniques, Trends and film choices. The second part is a gallery of photographs taken around the world with extensive captions that explain the authors' personal approaches to photography.

**Impressionism** John I. Clancy, 2003 Defining an artistic era or movement is often a difficult task as one tries to group individualistic expressions and artwork under one broad brush. Such is the case with impressionism which culls together the art of a multitude of painters in the mid-19th century including Monet, Cézanne, Renoir, Degas and van Gogh. Basically, impressionism involved the shedding of traditional painting methods. The subjects of art were taken from everyday life as opposed to the pages of mythology and history. In addition, each artist painted to express feelings of the moment instead of hewing to time-honored standards. This

description of impressionism obviously is quite broad and can apply to a wide array of styles Nonetheless it remains a very important school in the annals of art Any current or budding art aficionado should become familiar with the impressionist movement and its impact on the art world This book presents a sweeping study of this artistic period from its origins to its manifestations in the works of some of art history's most revered painters Following this overview is a substantial and selective bibliography featuring access through author title and subject indexes
