Photographers Britain The Highlands:

Francis Bedford, Landscape Photography and Nineteenth-century British Culture Stephanie Spencer, 2011 Focusing on one representative figure Francis Bedford this study emphasizes how photographs operated to form and transmit cultural ideas and values The first writing on Bedford since the 1970s the book examines this premier photographer who was also commercially successful Major themes include the intersection of nature and culture the practice of nineteenth century tourism attitudes toward historical identity and the formation of a national identity in England and Wales *Landscapes of the Scottish Highlands and the Isle of Skye* Stephen Whitehorne, 1999 The SUNFLOWER LANDSCAPE series takes visitors away from the tourist centres and out into the countryside exploring by private or public transport or on foot This volume features the Scottish Highlands and the Isle of Skye with timetables for public transport 2 pull out touring maps walking maps and colour photographs Photography, Natural History and the Nineteenth-Century Museum Kathleen Davidson, 2017-12-02 The Victorian era heralded an age of transformation in which momentous changes in the field of natural history coincided with the rise of new visual technologies Concurrently different parts of the British Empire began to more actively claim their right to being acknowledged as indispensable contributors to knowledge and the progress of empire This book addresses the complex relationship between natural history and photography from the 1850s to the 1880s in Britain and its colonies Australia New Zealand and to a lesser extent India Coinciding with the rise of the modern museum photography's arrival was timely and it rapidly became an essential technology for recording and publicising rare objects and valuable collections Also during this period the medium assumed a more significant role in the professional practices and reputations of naturalists than has been previously recognized and it figured increasingly within the expanding specialized networks that were central to the production and dissemination of new knowledge In an interrogation that ranges from the first forays into museum photography and early attempts to document collecting expeditions to the importance of traditional and photographic portraiture for the recognition of scientific discoveries this book not only recasts the parameters of what we actually identify as natural history photography in the Victorian era but also how we understand the very structure of empire in relation to this genre at that time *British Journal Photographic Annual* , 1891 About Britain; Photographs by Michael Peto Kenneth Harris, 1967 **The British Journal of Photography** , 1875 The British Journal Photographic Almanac and Photographer's Daily Companion , 1881 Visual Culture in the Northern British Archipelago Ysanne Holt, David Martin-Jones, Owain Jones, 2018-05-16 This edited collection including contributors from the disciplines of art history film studies cultural geography and cultural anthropology explores ways in which islands in the north of England and Scotland have provided space for a variety of visual cultural practices and forms of creative expression which have informed our understanding of the world Simultaneously the chapters reflect upon the importance of these islands as a space in which and with which to contemplate the pressures and the possibilities within contemporary society This book makes a timely and

original contribution to the developing field of island studies and will be of interest to scholars studying issues of place community and the peripheries *Capturing Japan in Nineteenth-century New England Photography Collections* Eleanor M. Hight, 2011 Expanding the canon of photographic history *Capturing Japan in Nineteenth Century New England Photography Collections* focuses on six New Englanders whose travel and photograph collecting influenced the flowering of Japonism in late nineteenth century Boston The book also explores the history of Japanese photography and its main themes The first history of its kind this study illuminates the ways photographs seeming conveyors of fact imprint mental images and suppositions on their viewers **British Journal of Photography Annual** ,1877 **An Introduction To Scottish**

Ethnology Alexander Fenton, Margaret A. Mackay, 2013-08-06 The publication of *An Introduction to Scottish Ethnology* sees the completion of the fourteen volume *Scottish Life and Society* series originally conceived by the eminent ethnologist Professor Alexander Fenton The series explores the many elements in Scottish history language and culture which have shaped the identity of Scotland and Scots at local regional and national level placing these in an international context Each of the thirteen volumes already published focuses on a particular theme or institution within Scottish society This introduction provides an overview of the discipline of ethnology as it has developed in Scotland and more widely the sources and methods for its study and practical guidance on the means by which it can be examined within its constituent genres based on the experience of those currently working with ethnological materials Theory and practice are presented in an accessible fashion making it an ideal companion for the student the scholar and the interested amateur alike **Writing, Authorship and**

Photography in British Literary Culture, 1880 - 1920 Emily Ennis, 2022-03-24 At the turn of the 20th century printing and photographic technologies evolved rapidly leading to the birth of mass media and the rise of the amateur photographer Demonstrating how this development happened symbiotically with great changes in the shape of British literature *Writing Authorship and Photography in British Literary Culture 1880 1920* explores this co evolution showing that as both writing and photography became tools of mass dissemination literary writers were forced to re evaluate their professional and personal identities Focusing on four key authors Thomas Hardy Bram Stoker Joseph Conrad and Virginia Woolf each of which had their own private and professional connections to photographs this book offers valuable historical contexts for contemporary cultural developments and anxieties At first establishing the authors response to developing technologies through their non fiction personal correspondences and working drafts Ennis moves on to examine how their perceptions of photography extend into their major works of fiction *A Laodicean Dracula The Secret Agent The Inheritors and The Voyage Out* Reflecting on the first graphic revolution in a world where text and image are now reproduced digitally and circulated en masse and online Ennis redirects our attention to when image and text appeared alongside each other for the first time and the crises this sparked for authors how they would respond to increasingly photographic depictions of everyday life and in turn how their writing adapted to a distinctly visual mass media *Recent Geographical Literature, Maps and Photographs*
