The Birds World Nicolae Sfetcu, 2021-10-25 Birds are among the most extensively studied of all animal groups Hundreds of academic journals and thousands of scientists are devoted to bird research while amateur enthusiasts called birdwatchers or more commonly birders probably number in the millions Birds are categorised as a biological class Aves The earliest known species of this class is Archaeopteryx lithographica from the Late Jurassic period According to the most recent consensus Aves and a sister group the order Crocodilia together form a group of unnamed rank the Archosauria Phylogenetically Aves is usually defined as all descendants of the most recent common ancestor of modern birds or of a specific modern bird species like Passer domesticus and Archaeopteryx Modern phylogenies place birds in the dinosaur clade Theropoda Modern birds are divided into two superorders the Paleognathae mostly flightless birds like ostriches and the wildly diverse Neognathae containing all other birds

Owls Heimo Mikkola, 2020-01-15 Owls are soft plumaged short tailed big headed birds that have the most frontally situated eyes of all birds and they can blink the upper eyelids This together with a broad facial disc gives owls all the right characteristics to make them attractive in our eyes At the same time some people fear their presence and even their calls and there are more myths and beliefs about owls than there are about any other bird Bats are often similarly feared as owls partly because both of them inhabit the night a place that is unknown and alien to us Owls and bats symbolise all that is mysterious about the night and their complete mastery of the darkness only highlights our own deficiencies In this book we will get to know the relationships between bats and owls This book

describes the biological control of rats by owls in Malaysia the prey predator interactions in a tropical forest in Mexico and provides an overview of the breeding biology of owls From numerous owl belief and myth studies described in this book are those of the lesser known Central Asian countries where owls are often worshipped for their supernatural powers *Avian Architecture Revised and Expanded Edition* Peter Goodfellow, 2024-02-13 The essential illustrated guide to how birds design and build their nests now fully revised and expanded Birds are the most consistently inventive builders and their nests set the bar for functional design in nature Describing how birds design engineer and build their nests *Avian Architecture* deconstructs all types of nests found around the world using architectural blueprints and detailed descriptions of the construction processes and engineering techniques birds use This spectacularly illustrated book features more than 300 full color images and more than 40 case studies that profile key species worldwide Each chapter covers a different type of nest from tunnel nests and mound nests to floating nests hanging nests woven nests and even multiple nest avian cities Other kinds of avian construction such as bowers and food stores are also featured Now with more case studies and an updated foreword this revised and expanded edition includes intricate step by step sequences visual spreads on nest building materials and methods and insightful commentary by a leading expert Illustrates how birds around the world design engineer and build their nests Features architectural blueprints step by step sequences visual spreads on nest building materials and methods and expert commentary Includes more than 300 full color images Covers more than 100 bird species worldwide
