Photographic History Of The Century:

Encyclopedia of Nineteenth-Century Photography John Hannavy, 2013-12-16 The Encyclopedia of Nineteenth Century Photography is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century. It sets out to be the standard definitive reference work on the subject for years to come. Its coverage is global, an important first in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication. The Encyclopedia presents new and ground breaking research alongside accounts of the major established figures in the nineteenth century arena. Coverage includes all the key people, processes, equipment, movements, styles, debates, and groupings which helped photography develop from being a solution in search of a problem when first invented to the essential communication tool, creative medium, and recorder of everyday life which it had become by the dawn of the twentieth century. The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth Century Photography an essential reference source for academics, students, researchers, and libraries worldwide.

Encyclopedia of Twentieth-Century Photography, 3-Volume Set Lynne Warren, 2005-11-15 The Encyclopedia of Twentieth Century Photography explores the vast international scope of twentieth century photography and explains that history with a wide ranging interdisciplinary manner. This unique approach covers the aesthetic history of photography as an evolving art and documentary form while also recognizing it as a developing technology and cultural force. This Encyclopedia presents the important developments, movements, photographers, photographic institutions, and theoretical aspects of the field along with information about equipment, techniques, and practical applications of photography. To bring this history alive for the reader, the set is illustrated in black and white throughout, and each volume contains a color plate section. A useful glossary of terms is also included.

Photography and Other Media in the Nineteenth Century Nicoletta Leonardi, Simone Natale, 2018-11-08 In this volume, leading scholars of photography and media examine photography's vital role in the evolution of media and communication in the nineteenth century. In the first half of the nineteenth century, the introduction of telegraphy, the development of a cheaper and more reliable postal service, the rise of the mass circulation press, and the emergence of the railway dramatically changed the way people communicated and experienced time and space. Concurrently, photography developed as a medium that changed how images were produced and circulated. Yet for the most part, photography of the era is studied outside the field of media history. The contributors to this volume challenge those established disciplinary boundaries as they programmatically explore the intersections of photography and new media during a period of fast-paced change. Their essays look at the emergence and early history of photography in the context of broader changes in the history of communications: the role of the nascent photographic press in photography's infancy and the development of photographic techniques as part of a broader media culture that included the mass consumed novel, sound recording, and cinema. Featuring essays by noteworthy historians in photography and media history, this discipline-shifting

examination of the communication revolution of the nineteenth century is an essential addition to the field of media studies In addition to the editors contributors to this volume are Geoffrey Batchen Geoffrey Belknap Lynn Berger Jan von Brevern Anthony Enns Andr Gaudreault Lisa Gitelman David Henkin Erkki Huhtamo Philippe Marion Peppino Ortoleva Steffen Siegel Richard Taws and Kim Timby *Photography* Mary Warner Marien,2006 Each of the eight chapters takes a period of up to forty years and examines the medium through the lenses of art science social science travel war fashion the mass media and individual practitioners Back Cover Routledge Library Editions: Art and Culture in the Nineteenth Century Various,2021-03-29 This set of 11 volumes originally published between 1946 and 2001 amalgamates a wide breadth of research on Art and Culture in the Nineteenth Century including studies on photography theatre opera and music This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject how it has evolved over time and will be of particular interest to students of art and cultural history *Photography, History, Difference* Tanya Sheehan,2014-12-02 Over the past decade historical studies of photography have embraced a variety of cultural and disciplinary approaches to the medium while shedding light on non Western vernacular and other photographic practices outside the Euro American canon *Photography History Difference* brings together an international group of scholars to reflect on contemporary efforts to take a different approach to photography and its histories What are the benefits and challenges of writing a consolidated global history of photography How do they compare with those of producing more circumscribed regional or thematic histories In what ways does the recent emphasis on geographic and national specificity encourage or exclude attention to other forms of difference such as race class gender and sexuality Do studies of other photographs ultimately necessitate the adoption of nontraditional methodologies or are there contexts in which such differentiation can be intellectually unproductive and politically suspect The contributors to the volume explore these and other questions through historical case studies interpretive surveys of recent historiography criticism and museum practices and creative proposals to rethink the connections between photography history and difference A thought provoking collection of essays that represents new ways of thinking about photography and its histories It will appeal to a broad readership among those interested in art history visual culture media studies and social history The Photographic History of the Twentieth Century ,2000 *The Cromer Collection of Nineteenth-century French Photography* ,2022-05-31 A deep dive into the pioneering collection of nineteenth century French photographs equipment and ephemera which is a cornerstone of the George Eastman Museum In the early twentieth century Parisian photographer amateur historian and collector Gabriel Cromer 1873 1934 amassed a collection that traced photography s prehistory invention and development to about 1890 His dream was to found a national museum of the photographic arts in France Although Cromer s ambition was never realized his collection was central to establishing the world s first museum dedicated to photography the George Eastman Museum The Cromer Collection of Nineteenth Century French Photography considers the origin and circulation of the collection as

Photographers Peter E. Palmquist,2000 **Liminalities of Gender and Sexuality in Nineteenth-Century Iranian Photography** Staci Gem Scheiwiller,2016-12-01 Nineteenth century Iran was an ocularcentered society predicated on visibility and what was seen and unseen and photographs became liminal sites of desire that maneuvered betwixt and between various social spaces public private seen unseen accessible and forbidden thus mapping graphing and even transgressing those spaces especially in light of increasing modernization and global contact during the nineteenth and early twentieth centuries Of primary interest is how photographs negotiated and coded gender sexuality and desire becoming strategies of empowerment of domination of expression and of being seen Hence the photograph became a vehicle to traverse multiple locations that various gendered physical bodies could not and it was also the social and political relations that had preceded the photograph that determined those ideological spaces of im mobility In identifying these notions in photographs one may glean information about how modern Iran metamorphosed throughout its own long dur e or resisted those societal transformations as a result of modernization

Nineteenth-Century Photographs and Architecture Micheline Nilsen, 2017-07-05 Eschewing the limiting idea that nineteenth century architecture photography merely reflects functionality the objective of this collection is to reflect the aesthetic intellectual and cultural concerns of the time The essays hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early decades of photography but focuses on the thematic content of the material It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic
