Positive Rights in a Republic of Talk T. Halper, 2012-12-06. Positive Rights in a Republic of Talk will appeal to philosophers and social scientists interested in issues of rights and social justice and to graduate students and journalists seeking a critical survey of the field. Innumerable recent books have addressed the issues of rights and social justice but none combines the comprehensiveness, disinterestedness and brevity found in this work. Positive Rights in a Republic of Talk is unique in its critical yet fair approach to the issues. It is untainted with special pleading for specific philosophical schools or social policies. It is distinctive in its range, examining the views of classical as well as contemporary thinkers and trendy as well as more established approaches. It is relentless in its confrontation of the abstract with the concrete. It discusses positive rights in such contexts as health care, education, foreign aid, homelessness, welfare and disaster relief. Policies are distinctive in its prose, which is vivid, engaging, clear, occasionally funny and never pompous or engorged with jargon. It can be read and enjoyed by serious non-specialists as well as specialists.

Photography and the Contemporary Cultural Condition Peter D. Osborne, 2018-06-28 In this book Osborne demonstrates why and how photography as photography has survived and flourished since the rise of digital processes when many anticipated its dissolution into a generalised system of audio visual representations or its collapse under the relentless overload of digital imagery He examines how photography embodies contributes to and even in effect critiques how the contemporary social world is now imagined how it is made present and how the concept and the experience of the Present itself is produced Osborne bases his discussions primarily in cultural studies and visual cultural studies Through an analysis of different kinds of photographic work in distinct contexts he demonstrates how aspects of photography that once appeared

to make it vulnerable to redundancy turn out to be the basis of its survival and have been utilised by much important photographic work of the last three decades      Memory, Trauma, and History Michael S. Roth, 2011-11-01 In these essays Michael S Roth uses psychoanalysis to build a richer understanding of history and then takes a more expansive conception of history to decode the cultural construction of memory He first examines the development in nineteenth century France of medical criteria for diagnosing memory disorders which signal fundamental changes in the understanding of present and past He next explores links between historical consciousness and issues relating to the psyche including trauma and repression and hypnosis and therapy Roth turns to the work of postmodern theorists in connection with the philosophy of history and then examines photography's capacity to capture traces of the past He considers how we strive to be faithful to the past even when we don't care about getting it right or using it productively Roth concludes with essays defending pragmatic and reflexive liberal education Drawing on his experiences as a teacher and academic leader he speaks of living with the past without being dominated by it      **An Index to Articles on Photography**, 1978      **The Corporate Eye**

Elspeth H. Brown, 2008-03 Winner Association of American Publishers Professional and Scholarly Publishing Award in Business Management and Accounting In the late nineteenth century corporate managers began to rely on photography for everything from motion studies to employee selection to advertising This practice gave rise to many features of modern industry familiar to us today consulting scientific approaches to business practice illustrated advertising and the use of applied psychology In this imaginative study Elspeth H Brown examines the intersection of photography as a mass technology with corporate concerns about efficiency in the Progressive period Discussing among others the work of Frederick W Taylor Eadweard Muybridge Frank Gilbreth and Lewis Hine Brown explores this intersection through a variety of examples including racial discrimination in hiring the problem of photographic realism and the gendered assumptions at work in the origins of modern marketing She concludes that the goal uniting the various forms and applications of photographic production in that era was the increased rationalization of the modern economy through a set of interlocking managerial innovations technologies that sought to redesign not only industrial production but the modern subject as well

Systemic Ethics and Non-Anthropocentric Stewardship Janet McIntyre-Mills, 2014-10-01 This book makes a case for rights and responsibilities to be expressed through a cosmopolitan praxis based on developing strong cosmopolitan approaches This developed approach respects a form of cultural or national identity that is not at the expense of others the environment or future generations This new stoicism is based on a sense of responsibility for others The book also explores systemic ethical praxis in response to the vexed challenge of how to bridge the false dualism of pitting the environment versus profit Systemic Ethics and Non Anthropocentric Stewardship Implications for Transdisciplinarity and Cosmopolitan Politics is organized into seven chapters The book begins by providing readers with an understanding of the way in which cosmopolitanism like all social concepts is shaped by diverse definitions and applied differently by theorists and those that

engage in transformative praxis It also develops an argument based on considering the empirical consequences of social economic and environmental decisions on the quality of life of current and future generations The next chapter critiques anthropocentrism and explores how policy makers develop agreements on what constitutes and supports the wellbeing of the planet rather than the GDP The book then explores the options for social democracy and ways to enhance an ethical approach to post national governance and argues for participatory democracy and governance to respond to diversity within and across national boundaries The following chapters reflect upon the author's own participatory action research process and examines the transformations that can arise through critical systemic thinking and practice Next the book makes the case for systemic ethical governance that is able to manage consumption before concluding with a final look at the book's approach based on critical heuristics
