Wittgenstein Ludwig Wittgenstein,1966-06 The first thing to be said about this book is that nothing contained herein was written by Wittgenstein himself The notes published here are not Wittgenstein s own lecture notes but notes taken down by students which he neither saw nor checked It is even doubtful if he would have approved of their publication as least in their present form Since however they deal with topics only briefly touched upon in his other published writings and since for some time they have been circulating privately it was thought best to publish them in a form approved by their authors

Lisa H. Sideris,2017-08-15 In Consecrating Science Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe [The Last Piece of the Puzzle](#) Tom Halvorson,2013-02-21 Kyrie Holloway is leaving behind the life of a hair stylist and becoming a professional counselor while taking care of her ailing grandmother Just as she is about to finish her
